fundamentals of corporate finance 13th edition pdf: *Fundamentals of Corporate Finance* Stephen A. Ross, Randolph Westerfield, Bradford D. Jordan, 2021 When the three of us decided to write a book, we were united by one strongly held principle: Corporate finance should be developed in terms of a few integrated, powerful ideas. We believed that the subject was all too often presented as a collection of loosely related topics, unified primarily by virtue of being bound together in one book, and we thought there must be a better way. One thing we knew for certain was that we didn't want to write a me-too book. So, with a lot of help, we took a hard look at what was truly important and useful. In doing so, we were led to eliminate topics of dubious relevance, downplay purely theoretical issues, and minimize the use of extensive and elaborate calculations to illustrate points that are either intuitively obvious or of limited practical use--

fundamentals of corporate finance 13th edition pdf: Handbook of Corporate Finance Bjørn Espen Eckbo, 2007-05-21 Judging by the sheer number of papers reviewed in this Handbook, the empirical analysis of firms' financing and investment decisions—empirical corporate finance—has become a dominant field in financial economics. The growing interest in everything corporate is fueled by a healthy combination of fundamental theoretical developments and recent widespread access to large transactional data bases. A less scientific—but nevertheless important—source of inspiration is a growing awareness of the important social implications of corporate behavior and governance. This Handbook takes stock of the main empirical findings to date across an unprecedented spectrum of corporate finance issues, ranging from econometric methodology, to raising capital and capital structure choice, and to managerial incentives and corporate investment behavior. The surveys are written by leading empirical researchers that remain active in their respective areas of interest. With few exceptions, the writing style makes the chapters accessible to industry practitioners. For doctoral students and seasoned academics, the surveys offer dense roadmaps into the empirical research landscape and provide suggestions for future work.*The Handbooks in Finance series offers a broad group of outstanding volumes in various areas of finance*Each individual volume in the series should present an accurate self-contained survey of a sub-field of finance*The series is international in scope with contributions from field leaders the world over

fundamentals of corporate finance 13th edition pdf: *Corporate Governance in Africa* Victor Ediagbonya, 2024-12-31 This book discusses the issue of limited stakeholder recognition and protection of stakeholder interests within the Anglo-Saxon corporate governance model practised in many sub-Saharan African countries. The volume argues that the relative success of the Anglo-Saxon model in developed economies is attributed to the presence of functional institutions, such as effective legal systems, active external markets for corporate control, and organised civil societies, among others. Many African countries, such as Nigeria and South Africa, have adopted the UK corporate governance framework despite facing challenges occasioned by an inefficient legal system plagued by systemic corruption. Given the challenging institutional contexts in African countries, this book proposes an alternative corporate governance framework – the functional stakeholder model (FSM) – for the banking industry in countries facing similar institutional challenges; the FSM aims to promote stakeholder recognition and the protection of stakeholders' interests. The book draws on stakeholder and institutional theories in designing an alternative corporate governance model, the 'FSM' for banks operating in challenging institutional contexts. The book will interest regulators, bankers, auditors, academia, policymakers, and researchers in comparative corporate governance and financial regulation, especially banking regulation and stakeholders in developing and emerging markets.
