integrated korean beginning 2 3rd edition pdf: Pragmatics in Korean and Japanese Translation Jieun Kiaer, Ben Cagan, 2022-09-30 This book explores how the greater amount of pragmatic information encoded in Korean and Japanese can result in pragmatic (in)visibility when translating between those languages and English. Pragmatic information must be added when translating from English to Korean or Japanese and is easily lost when translating in the other direction. This book offers an analysis of translations in Japanese and Korean of Harry Potter and the Philosopher's Stone and The Hobbit, or There and Back Again to show how the translated versions crystallise the translators' interpretations of relationships in the way characters address one another. This book discusses fan translations of Korean and Japanese to English of various popular media, observing that the emotional meanings easily lost when translating in this direction are often deemed important enough to warrant the insertion of additional explanatory material. The book additionally discusses the role of fan translation in the construction of international online communities and a heightened communal commentary on translation. Western translation commentary has historically lacked sufficient emphasis on translation to and from East Asian languages, and these case studies help to address a problem of central importance to translation to and from languages that encode interpersonal dynamics in dramatically different ways to English. This book will be of interest to students and researchers in translation studies, particularly in Korean and Japanese translation. The book will also appeal to students and researchers of the Korean and Japanese languages.

integrated korean beginning 2 3rd edition pdf: Life and Learning of Korean Artists and Craftsmen Dae Joong Kang, 2015-04-17 This book brings out the need for lifelong learning theory and explores how it is possible from a postmodern perspective. The book uses life history that has gained its popularity in social science research to overcome the dichotomy between individual and society or between agency and structure. Life history also reflects the postmodern or late-modern conditions of social life. In this book, the author uses a collection of published oral history narratives of famous Korean artists and craftsmen. The author maps out life and learning of five such artists and craftsmen with figurations of escaping, creating, controlling and formalizing. These figurations are images of 'Rhizoactivity' that the author proposes as a new conceptual tool to navigate lifelong learning from a postmodern perspective. This book signals a new way of theory building in the field of adult and lifelong education.
