legend by marie lu pdf: The Planetary Humanism of European Women's Science Fiction Eleanor Drage, 2023-10-13 The Planetary Humanism of European Women's Science Fiction argues that utopian science fiction written by European women has, since the seventeenth century, played an important role in exploring the racial and gender possibilities of the outer limits of the humanist imagination. This book focuses on six works of science fiction from the UK, France, Spain, and Italy: Jennifer Marie Brissett's Elysium; Nicoletta Vallorani's Sulla Sabbia di Sur and Il Cuore Finto di DR; Aliette de Bodard's Xuya Universe series; Elia Barcelo's Consecuencias Naturales; and Historias del Crazy Bar, a collection of stories by Lola Robles and Maria Concepcion Regueiro. It sets these in conversation with key gender and critical race scholars: Judith Butler, Rosi Braidotti, Gayatri Chakravorty Spivak, Paul Gilroy, and Jack Halberstam. It asserts that a key concern for feminism, anti-racism, and science fiction now is to seek inventive ways of returning to the question of the human in the context of increasing racial and gender divisions. Offering unique access to contemporary and historical women writers who have mobilised the utopian imagination to rethink the human, this book is of use to those conducting research in Gender Studies, Philosophy, History, and Literature.

legend by marie lu pdf: Stronger, Truer, Bolder Karen L. Kilcup, 2021-05-15 Virtually every famous nineteenth-century writer (Harriet Beecher Stowe, Nathaniel Hawthorne, Ralph Waldo Emerson)— and many not so famous—wrote literature for children; many contributed regularly to children's periodicals, and many entered the field of nature writing, responding to and forwarding the century's huge social and cultural changes. Appreciating America's unique natural wonders dovetailed with children's growth as citizens, but children's journals often exceeded a pedagogical purpose, intending also to entertain and delight. Though these volumes aimed at a relatively conservative and mostly white, middle-class, and affluent audience, some selections allowed both children and their parents room for imaginative escape from restrictive social norms. Covering a period that initially regarded children's natural bodies as laboring resources, Stronger, Truer, Bolder traces the shifting pedagogical impulse surrounding nature and the environment through the transformations that included America's nineteenth century emergence as an industrial power. Karen L. Kilcup shows how children's literature mirrored those changes in various ways. In its earliest incarnations, it taught children (and their parents) facts about the natural world and about proper behavior vis-à-vis both human and nonhuman others. More significantly, as periodical writing for children advanced, this literature increasingly promoted children's environmental agency and envisioned their potential influence on concerns ranging from animal rights and interspecies equity to conservation and environmental justice. Such understanding of and engagement with nature not only propelled children toward ethical adulthood but also formed a foundation for responsible American citizenship.

Whether it be war-based, national, physical, or sexual trauma, this volume looks at a wide variety of trauma and the psychological pain and devastation that arise during and—crucially for the question of trauma narratives—following the events as the psychological (and often physical) wounds are processed. Essayists in the collection engage with questions of how comics process trauma through depictions and receptions. Viewing trauma through the lens of comics such as *Maus*, *Persepolis*, and *Fun Home*, as well as works by comics writers who are little known or unknown outside their communities, contributors analyze how trauma is used in artistic style, writing, and overall storytelling. Together, the essays in *Comics and Catharsis* show how people who have suffered trauma often flock to these works to find a way to acknowledge and process their own suffering.
