pleasure activism pdf: *Pleasure Activism* adrienne maree brown, 2019-03-19 How do we make social justice the most pleasurable human experience? How can we awaken within ourselves desires that make it impossible to settle for anything less than a fulfilling life? Editor adrienne maree brown finds the answer in something she calls Pleasure Activism, a politics of healing and happiness that explodes the dour myth that changing the world is just another form of work. pleasure activism pdf: In Defense of Solidarity and Pleasure Firuzeh Shokooh Valle, 2023-09-26 Including women in the global South as users, producers, consumers, designers, and

developers of technology has become a mantra against inequality, prompting movements to train individuals in information and communication technologies and foster the participation and retention of women in science and technology fields. In this book, Firuzeh Shokooh Valle argues that these efforts have given rise to an idealized, female economic figure that combines technological dexterity and keen entrepreneurial instinct with gendered stereotypes of care and selflessness. Narratives about the equalizing potential of digital technologies spotlight these women's capacity to overcome inequality using said technologies, ignoring the barriers and circumstances that create such inequality in the first place as well as the potentially violent role of technology in their lives. In *Defense of Solidarity and Pleasure* examines how women in the Global South experience and resist the coopting and depoliticizing nature of these scripts. Drawing on fieldwork in Costa Rica and a transnational feminist digital organization, Shokooh Valle explores the ways that feminist activists, using digital technologies as well as a collective politics that prioritize solidarity and pleasure, advance a new feminist technopolitics.

pleasure activism pdf: *Exploring Sexuality and Disability* Shanna Katz Kattari, 2023-09-01 Offering a current, comprehensive, and intersectional guide for students, practitioners, and researchers, this book synthesizes existing scholarship on culturally responsive practices that assist in exploring, understanding, and affirming the sexuality(ies) of disabled, chronically ill, neurodivergent, and Mad individuals. Drawing on an intersectional framework, it integrates insights drawn from an interdisciplinary body of scholarship including psychology, social work, sociology, history, political science, women and gender studies, cultural studies, and education along with perspectives from the practitioners who are actively defining the next generation of best practices. By highlighting the incredible resilience and resistance of disabled individuals' and communities' sexuality and sexual well-being, this book challenges narratives that rely primarily on a one-dimensional view derived from the medical model and the view of disability as something to be "fixed" – or at least tolerated – rather than celebrated. In a world that pathologizes and devalues the sexual existence of disabled individuals, it illustrates how to create thriving communities and relationships, and how they can organize to find their voice, providing a counter-narrative of empowerment that fosters hopefulness, power, and health. It will be of interest to all scholars, students, and professionals across a variety of professions, including social work, psychology, counseling, policy, healthcare, education, community organizing, and multiple social service settings.

pleasure activism pdf: Liberating People, Planet, and Religion Joerg Rieger, Terra Rowe, 2024-05-29 There is growing consensus that life on the planet is in peril if climate change continues at its current pace. At stake is not only the future of many species but of humanity itself. As an increasing number of ecological economists have emphasized, these problems will only be adequately addressed by re-examining economic systems from an ecological perspective, fundamentally calling into question assumptions of unlimited growth and the maximization of shareholder profit foundational to neoliberal capitalism. Religion and ecology scholars have also increasingly emphasized the ways climate change challenges assumed divides between nature and culture, religion and labor, economy and ecology, and calls for critical and constructive engagement with the religion, economy, and ecology nexus. Often, though, religious engagements with economy and ecology have placed emphasis on individual morality, action, and agency at the level of consumption patterns or have suggested mere modifications within existing economic paradigms. Contributors to this volume call into question the adequacy of this approach in light of the urgency of climate change which is always ever entwined with ongoing patterns of exploitation, oppression, and colonialism in current economic systems. Rather than tweaking a system of exploitation, for instance by emphasizing individual consumption or care for human and non-human victims, these authors articulate important opportunities for religious engagement, activism, resistance, and solidarity around issues of production and labor. Recalling that Marx linked agencies and labor of people as well as the other-than-human world, these authors aim to articulate a sense in which liberation of people and the planet are intertwined and can be accomplished only through collaboration for their common good. The basic intuition driving this volume is that while Christianity has by and large become the handmaiden of exploitative capitalism and empire, it might also reclaim latent theologies and religious practices that call into question the fundamental valuation of labor without recognition or rest, of extractive exploitation, and a "winner take all" praxis. In the process, Christianity might reclaim and reinvest in tenuous historical materializations of transformed ecological and economic relationships while economics might be re-informed by a valuation of the shared oikos as well as a just accounting of and remuneration for labor. Together they might serve the aim of the flourishing of all people and the planet.

pleasure activism pdf: A Psychospiritual Healing manual with integral psychedelic therapy , 2024-03-28 The invitation to write a foreword for this book came at an opportune time in the

development of the field of psychedelic-assisted therapy, amid the emergence of the future iteration of mental health services, delivered by the promises of the psychedelic renaissance. Also alive in this context are the substantial individual, social and cultural repercussions of a global pandemic on mental health and human behavior. A growing body of research shows encouraging clinical results in treating trauma, depression, demoralization, end-of-life existential issues, addiction, and eating disorders using MDMA, psilocybin, ketamine, and other psychedelic medications. However, the field of psychedelic-assisted therapy has gained accelerated support from donors, the medical establishment, and corporate investors in recent years. Along with the enthusiasm, recognition, funding, and media coverage directed toward psychedelic-assisted therapy, ethical standards; the lack of adequate training; and issues of accessibility, sustainability, diversity and inclusion are increasingly becoming part of the movement's forefront. These gaps in the emerging field highlight the need for more guidance and structure around ethical, clinical, and social considerations for these innovative treatments. This book can serve as a cornerstone for the field of psychedelic-assisted therapy at this time. This essential contribution offers a depth-oriented, somatic and relational therapeutic approach, emphasizing the imperative of ethical standards, the relevance of the therapeutic use of touch, the significance of the unconscious in the construction of symbolic meaning and intersubjective processes, and the need for trauma-informed approaches while centering liberation psychology and decolonial practices. The topics covered in this book and the themes embraced by the authors are of great relevance and are not yet comprehensively articulated in existing publications on psychedelic-assisted therapy. The diverse authors of this book approach their chapters based on their diverse social and cultural identities, as well as their extensive clinical experience providing psychedelic-assisted therapy in government-approved clinical research, private practice, and nonprofit organization settings. Their contributions aim at a vision of psychedelic-assisted therapy centered on decolonial practices, attuned to the somatic, imaginal, cultural and relational dimensions of being, allowing the emergence of transpersonal processes. Each chapter elaborates practical and theoretical aspects of this treatment modality through a unique theoretical framework, providing inspiration and guidance to readers working in this field as well as those compelled to psychedelic work for personal transformation.

pleasure activism pdf: Designed to Fail Roseann Liu, 2024-04-11 When we think of

educational inequalities, money often seems to be an obvious way of fixing them. After all, how else can schools be improved but through an influx of resources, be they aimed at updating old facilities, purchasing computers, or even acquiring new textbooks? But as Roseann Liu argues in *Designed to Fail*, even when schools do get desperately needed funding, much is broken about the way that resources are allocated, even when we account for socioeconomic inequality. Liu sets out to show that even when you account for a full range of socioeconomic statuses, white kids are getting more school funding per pupil than Black and Brown kids. Looking to battles over school funding in Pennsylvania, she sets out to show the legal and social reasons why racial inequality in education is so deeply entrenched. Liu shows that in Pennsylvania, as in several other states, one policy, officially referred to as hold harmless by politicians and hold harmful by antiracist advocates, guarantees that school districts receive at least as much money as they received during a baseline year, regardless of increases or decreases to student enrollment. This means that poor white rural areas that have seen declining student populations are still getting funding for more students than they currently serve, while expanding Black and Brown urban districts are squeezed. But advocates have learned that they can't win if they talk about race. From lawyers to activists to school superintendents, the people with the most power have watched as arguments based on race failed. In light of these failures, Liu calls for a reparations framework of school funding goes beyond redistributive approaches by not only accounting for current inequities of funding, but also reckoning with the compounded effects of intergenerational racism. This call makes for a book that is far more than a local history of school inequality--

The series' playful but poignant exploration of globalization, empathy, transnationalism, queer and trans aesthetics, gender fluidity, imagined communities and communities of sentiment also inspired the interdisciplinary range of contributors to this volume. In this collection, leading academics illuminate *Sense8* as a progressive and challenging series that points to vital, multifarious, contemporary social, political, aesthetic and philosophical concerns. *Sense8: Transcending Television* is much more than an academic examination of a series; it is an account and analysis of the way that we all receive, communicate and consider ourselves as participants in global communities that are social, political and cultural, and now both physical and virtual too.

pleasure activism pdf: *The Children of Solaga* Daina Sanchez, 2024-12-03 In this book, Daina Sanchez examines how Indigenous Oaxacan youth form racial, ethnic, community, and national identities away from their ancestral homeland. Assumptions that Indigenous peoples have disappeared altogether, or that Indigenous identities are fixed, persist in the popular imagination. This is far from the truth. Sanchez demonstrates how Indigenous immigrants continually remake their identities and ties to their homelands while navigating racial and social institutions in the U.S. and Latin America, and, in doing so, transform notions of Indigeneity and push the boundaries of Latinidad. Drawing on long-term ethnographic fieldwork between Los Angeles, California and San Andrés Solaga, a Zapotec town in the Mexican state of Oaxaca, *The Children of Solaga* centers Indigenous ways of knowing and being in the world, and adds a much-needed transnational dimension to the study of Indigenous immigrant adaptation and assimilation. Sanchez, herself a diasporic Solagueña, argues that the lived experiences of Indigenous immigrants offer a unique vantage point from which to see how migration across settler-borders transforms processes of self-making among displaced Indigenous people. Rather than accept attempts by both Mexico and the U.S. to erase their Indigenous identities or give in to anti-Indigenous and anti-immigrant prejudice, Oaxacan immigrants and their children defiantly celebrate their Indigenous identities through practices of *el goce comunal* (communal joy) in their new homes.

pleasure activism pdf: *Precarious Intimacies* Faith MacNeil Taylor, 2025-03-18 In a time of increasing social and economic inequality, this book illustrates the precarity experienced by millennials facing both rising rents and wage stagnation. Featuring the voices of those with lived experience of precarity in north-east London, MacNeil Taylor focuses on intimacy, reproduction and emotional labour. The book widens readers' understanding of a middle-class 'generation rent' beyond those locked out of anticipated home ownership by considering both social and private renters. Situated in a feminist and queer theoretical framework, the book reveals the crucial role of British policy-making on housing, welfare, and immigration in exacerbating inter- and intra-generational inequality.

pleasure activism pdf: *Unwell Writing Centers* Genie Nicole Giaimo, 2023-04-01 *Unwell Writing Centers* focuses on the inroads the wellness industry has made into higher education. Following graduate and undergraduate writing tutors during a particularly stressful period (2016–2019), Genie Nicole Giaimo examines how top-down and bottom-up wellness interventions are received and taken up by workers. Engaging sociocultural research on how workers react to and

experience workplace conflict, Giaimo demonstrates the kinds of interventions welcomed by workers as well as those that fall flat, including the “easy” fixes to workplace issues that institutions provide in lieu of meaningful and community-based support. The book is broken into sections based on journeying: searching for wellness, finding wellness, and imagining a “well” future that includes a sustainable model of writing center work. Each chapter begins with a personal narrative about wellness issues in writing centers, including the author’s experiences in and responses to local emergencies. She shares findings from a longitudinal assessment study on non-institutional interventions in writing centers and provides resources for administrators to create more ethical well writing centers. The book also includes an appendix of training documents, emergency planning documents, and several wellness-specific interventions developed from anti-racist, anti-neoliberal, and organizational theories. Establishing the need for a field-specific response to the austerity-minded eruption of wellness-focused interventions in higher education, Unwell Writing Centers is a critical text for graduate students and new directors that can easily be applied in workplaces in and outside of higher education.
