shooting kabul pdf: From Cape Town to Kabul Penelope Andrews, 2016-04-15 Using her experience of living under apartheid and witnessing its downfall and the subsequent creation of new governments in South Africa, the author examines and compares gender inequality in societies undergoing political and economic transformation. By applying this process of legal transformation as a paradigm, the author applies this model to Afghanistan. These two societies serve as counterpoints through which the book engages, in a nuanced and novel way, with the many broader issues that flow from the attempts in newly democratic societies to give effect to the promise of

gender equality. Developing the idea of 'conditional interdependence', the book suggests a new approach based on the communitarian values which underpin newly democratic societies and would allow women's rights to gain momentum and reap greater benefits. Broad in its thematic approach, the book generates challenging and complex questions about the achievement of gender equality. It will be of interest to academics interested in gender and human rights, international and comparative law.

shooting kabul pdf: Peace Operations and Organized Crime James Cockayne, Adam Lupel, 2011-05-10 Peace operations are increasingly on the front line in the international community's fight against organized crime; this book explores how, in some cases, peace operations and organized crime are clear enemies, while in others, they may become tacit allies. The threat posed by organized crime to international and human security has become a matter of considerable strategic concern for national and international decision-makers, so it is somewhat surprising how little thought has been devoted to addressing the complex relationship between organized crime and peace operations. This volume addresses this gap, questioning the emerging orthodoxy that portrays organized crime as an external threat to the liberal peace championed by western and allied states and delivered through peace operations. Based upon a series of case studies it concludes that organized crime is both a potential enemy and a potential ally of peace operations, and it argues for the need to distinguish between strategies to contain organized crime and strategies to transform the political economies in which it flourishes. The editors argue for the development of intelligent, transnational, and transitional law enforcement that can make the most of organized crime as a potential ally for transforming political economies, while at the same time containing the threat it presents as an enemy to building effective and responsible states. The book will be of great interest to students of peacebuilding, peace and conflict studies, organised crime, Security Studies and IR in general.

shooting kabul pdf: Flight Risk Forrest L. Marion, 2018-10-15 From the 1920s Afghanistan maintained a small air arm that depended heavily upon outside assistance. Starting in 2005, the United States led an air advisory campaign to rebuild the Afghan Air Force (AAF). In 2007 a formal joint/combined entity, led by a U.S. Air Force brigadier general, began air advisor work with Afghan airmen. Between 2007 and 2011, these efforts made modest progress in terms of infrastructures, personnel and aircraft accessions, and various training courses. But by 2010, advisors increasingly viewed AAF command and control (C2) as a problem area that required significant improvement if a professional air force was to be built. In the spring of 2011, major institutional changes to AAF C2 procedures were being introduced when nine U.S. air advisors were killed. The attack was the worst single-incident loss of U.S. Air Force personnel in a deployed location since 1996 and the worst insider-attack since 2001. From the day of that tragic event, the cultural chasm between Afghanistan and the West became more apparent. This dilemma continues with no end in sight to an air advisory mission of uncertain long-term value.

shooting kabul pdf: Hubris, Self-Interest, and America's Failed War in Afghanistan Thomas P. Cavanna, 2015-07-22 This book describes the conduct of the US-led post-9/11 war in Afghanistan. Adopting a long-term perspective, it argues that even though Washington initially had

an opportunity to achieve its security goals and give Afghanistan a chance to enter a new era, it compromised any possibility of success from the very moment it let bin Laden escape to Pakistan in December 2001, and found itself locked in a strategic overreach. Given the bureaucratic and rhetorical momentum triggered by the war on terror in America, the Bush Administration was bound to deploy more resources in Afghanistan sooner or later (despite its focus on Iraq). The need to satisfy unfulfilled counter-terrorism objectives made the US dependent on Afghanistan's warlords, which compromised the country's stability and tarnished its new political system. The extension of the US military presence made Washington lose its leverage on the Pakistan army leaders, who, aware of America's logistical dependency on Islamabad, supported the Afghan insurgents - their historical proxies - more and more openly. The extension of the war also contributed to radicalize segments of the Afghan and Pakistani populations, destabilizing the area further. In the meantime, the need to justify the extension of its military presence influenced the US-led coalition into proclaiming its determination to democratize and reconstruct Afghanistan. While highly opportunistic, the emergence of these policies proved both self-defeating and unsustainable due to an inescapable collision between the US-led coalition's inherent self-interest, hubris, limited knowledge, limited attention span and limited resources, and, on the other hand, Afghanistan's inherent complexity. As the critical contradictions at the very heart of the campaign increased with the extension of the latter's duration, scale, and cost, America's leaders, entrapped in path-dependence, lost their strategic flexibility. Despite debates on troops/resource allocation and more sophisticated doctrines, they repeated the same structural mistakes over and over again. The strategic overreach became self-sustaining, until its costs became intolerable, leading to a drawdown which has more to do with a pervasive sense of failure than with the accomplishment of any noble purpose or strategic breakthrough.

shooting kabul pdf: An Enemy We Created Alex Strick van Linschoten, Felix Kuehn, 2012-08-23 To this day, the belief is widespread that the Taliban and al-Qaeda are synonymous, that their ideology and objectives are closely intertwined, and that they have made common cause against the West for decades. In *An Enemy We Created*, Alex Strick van Linschoten and Felix Kuehn debunk this myth and reveal the much more complex reality that lies beneath it. Drawing upon their unprecedented fieldwork in Afghanistan, as well as their Arabic, Dari, and Pashtu skills, the authors show that the West's present entanglement in Afghanistan is predicated on the false assumption that defeating the Taliban will forestall further terrorist attacks worldwide. While immersing themselves in Kandahar society, the authors interviewed Taliban decision-makers, field commanders, and ordinary fighters, thoroughly exploring the complexity of the relationship between the Taliban and al-Qaeda and the individuals who established both groups. They show that from the mid-1990s onward, the Taliban and al-Qaeda diverged far more often than they converged. They also argue that this split creates an opportunity to engage the Taliban on two fundamental issues: renouncing al-Qaeda and guaranteeing that Afghanistan will not be a sanctuary for international terrorists. Yet the insurgency is changing, and it could soon be too late to find a political solution. The authors contend that certain aspects of the campaign in Afghanistan, especially night raids, the killings of innocent civilians, and attempts to fragment and decapitate the Taliban are having the unintended consequence of energizing the resistance, creating more opportunities for al-Qaeda, and helping it to attain its objectives. The first book to fully untangle the myths from the realities in the relationship between the Taliban and al-Qaeda, *An Enemy We Created* is essential reading for anyone who wants to understand what's really happening in Afghanistan.

shooting kabul pdf: Convergence Defense Department, Michael Miklaucic, Jacqueline Brewer, 2013 The Center for Complex Operations (CCO) has produced this edited volume, *Convergence: Illicit Networks and National Security in the Age of Globalization*, that delves deeply into everything mentioned above and more. In a time when the threat is growing, this is a timely effort. CCO has gathered an impressive cadre of authors to illuminate the important aspects of transnational crime and other illicit networks. They describe the clear and present danger and the magnitude of the challenge of converging and connecting illicit networks; the ways and means used by transnational criminal networks and how illicit networks actually operate and interact; how the proliferation, convergence, and horizontal diversification of illicit networks challenge state sovereignty; and how different national and international organizations are fighting back. A deeper understanding of the problem will allow us to then develop a more comprehensive, more effective, and more enduring solution. shooting kabul pdf: Militants, Criminals, and Warlords Vanda Felbab-Brown, Harold Trinkunas, Shadi Hamid, 2017-11-28 Conventional political theory holds that the sovereign state is the legitimate source of order and provider of public services in any society, whether democratic or not. But Hezbollah and ISIS in the Middle East, pirate clans in Africa, criminal gangs in South America, and militias in Southeast Asia are examples of nonstate actors that control local territory and render public services that the nation-state cannot or will not provide. This fascinating book takes the reader around the world to areas where national governance has broken down—or never

really existed. In these places, the vacuum has been filled by local gangs, militias, and warlords, some with ideological or political agendas and others focused primarily on economic gain. Many of these actors have substantial popularity and support among local populations and have developed their own enduring institutions, often undermining the legitimacy of the national state. The authors show that the rest of the world has more than a passing interest in these situations, in part because transborder crime and terrorism often emerge but also because failed states threaten international interests from trade to security. This book also poses, and offers answers for, the question: How should the international community respond to local orders dominated by armed nonstate actors? In many cases outsiders have taken the short-term route—accepting unsavory local actors out of expediency—but at the price of long-term instability or damage to human rights and other considerations. From Africa and the Middle East to Asia and Latin America, the local situations highlighted in this book are, and will remain, high on today's international agenda. The book makes a unique contribution to global understanding of how those situations developed and what can be done about them. This title is part of the Geopolitics in the 21st Century series.
