A presente obra, *Difamação e Antitruste*, revela-se não apenas como um trabalho acadêmico de mérito inegável, mas também como uma contribuição original e necessária ao debate jurídico contemporâneo. Marcel enfrenta um fenômeno antigo – a difamação – com olhar renovado, investigando sua interface com o Direito Concorrencial em um cenário marcado pela economia digital, pela viralização de informações e pela centralidade da reputação no funcionamento dos mercados. Historicamente, a proteção da honra e da imagem foi estudada sob o prisma penal, civil ou consumerista. Entretanto, como demonstra o trabalho, práticas difamatórias podem transcender os danos individuais e alcançar efeitos sistêmicos, capazes de distorcer a dinâmica concorrencial, na esfera do Direito Público. Narrativas falsas ou enganosas sobre empresas, produtos ou serviços, quando amplificadas pela velocidade das redes sociais e pela lógica algorítmica de difusão de conteúdos, podem gerar não apenas perdas reputacionais, mas desvio de demanda, exclusão de concorrentes e até mesmo a manutenção artificial de posições dominantes.
