cultural anthropology pdf: The Routledge International Handbook of Harmful Cultural Practices Maria Jaschok, U. H. Ruhina Jesmin, Tobe Levin von Gleichen, Comfort Momoh, 2023-12-04 This handbook looks at cross-cultural work on harmful cultural practices considered gendered forms of abuse of women. These include female genital mutilation (FGM), virginity testing, hymenoplasty, and genital cosmetic surgery. Bringing together comparative perspectives, intersectionality, and interdisciplinarity, it uses feminist methodology and mixed methods, with ethnography of central importance, to provide holistic, grounded theorizing within a framework of transformative research. Taking female genital mutilation, a topical, contested practice, and making it a heuristic reference for related procedures makes the case for global action based on understanding the complexity of harmful cultural practices that are contextually differentiated and experienced in intersectional ways. But because this phenomenon is enshrouded in matters of sensitivity and prejudice, narratives of suffering are muted and even suppressed, are dismissed as indigenous ritual, or become ammunition for racist organizing. Such conflicted and often opaque debates obstruct clear vision of the scale of both problem and solution. Divided into six parts: • Discourses and Epistemological Fault Lines • FGM and Related Patriarchal Inscriptions • Gender and Genitalia • Female Bodies and Body Politics: Economics, Law, Medicine, Public Health, and Human Rights • Placing Engagement, Innovation, Impact, Care • Words and Texts to Shatter Silence

Comprised of 24 newly written chapters from experts around the world, this book will be of interest to scholars and students of nursing, social work, and allied health more broadly, as well as sociology, gender studies, and postcolonial studies.

The Dictionary is an introduction for the general reader, a handbook for students of anthropology and many related disciplines, and a reference tool for academic anthropologists. Gravlee, 2014-07-08 The Handbook of Methods in Cultural Anthropology, now in its second edition, maintains a strong benchmark for understanding the scope of contemporary anthropological field methods. The second edition also reflects major developments of the past decade, including: the rising prominence of mixed methods, the emergence of new technologies, and evolving views on ethnographic writing. Spanning the chain of research, from designing a project through methods of data collection and interpretive analysis, the Handbook features new chapters on ethnography of online communities, social survey research, and network and geospatial analysis. cultural anthropology pdf: *Cross-Cultural Leadership Training* Leonard U. Ahanotu PhD EdD, 2020-10-29 The issue of cross-cultural movements of professionals within organizations in the 21st century's network-style of the global organization has created the question of how to prepare professionals to meet the demands of satisfactory service in a culture different from their home

culture. The absence of the cross-cultural preparation of the professionals is causing cross-cultural maladjustments among many professionals, and the Nigerian Catholic priests who move from Nigeria to the United States face this reality. Given the shortage of priests in the United States, the U.S. Roman Catholic Church recruits many priests from overseas, and a significant number of these priests are being recruited from Nigeria whose culture is very different from the U.S. culture. The work of these well-educated priests helps to solve the priest shortage problem but is creating new challenges in some Catholic parishes because of cultural differences. The priests continually face cross-cultural challenges to succeed in their pastoral work. There is little research on the cross-cultural challenges and other experiences of these priests in adjustment and in carrying out their duties. This qualitative study investigated the cross-cultural experiences of Nigerian priests serving in the United States. Interviews with some Nigerian priests serving in the four different geographical regions of the United States yielded important discoveries that comprised of some common challenges and some common strategies to facilitate adjustment. The findings indicated that a cross-cultural preparation before arrival to the United States could reduce the cross-cultural maladjustments and its effects on the pastoral works of these awesome priests. The discoveries influenced the recommendation of Kolb's Learning Theory to design a pre-departure cross-cultural training for Nigerian priests. The study offers an invaluable contribution to the tools that will help expatriates for cross-cultural adjustment and intercultural relations when they work in a foreign environment.
