engaga: BattleTech: Redemption Rites Jason Schmetzer, 2022-05-06 OUT FOR BLOOD... Wolf's Dragoons, the most storied and elite mercenary unit in the Inner Sphere, has been utterly shattered for the first time in its centuries-long history. In 3151, most of the Dragoons listened to Marotta Kerensky and followed Alaric Ward to Terra. There, they helped him destroy the Republic of the Sphere and establish the ilClan. Four out of five Dragoons died in the fighting. The survivors were injured, shell-shocked, and finally, gravely insulted by Alaric Ward's token payment of thirty pieces of silver. In one brutal gesture, the ilKhan did what no other enemy had ever done: He broke Wolf's Dragoons. The decimated survivors limped off Terra to rendezvous with their remnants that had stayed behind. Colonel Henry "Hack" Kincaid, senior striker officer, is waiting when the Dragoons convoy appears, full of wrecked machines, but depleted of personnel. Kincaid is a man of reputation in the Dragoons. His word carries weight. And he hasn't been tarnished by Terra. Three regiments and one of his irreplaceable striker battalions have all been ground to dust. All that is left now is duty. And vengeance...

engaga: *Neo-Spiritual Aesthetics* Lina Aschenbrenner, 2022-12-15 Tracing embodied transformation in the context of Gaga, the Israeli dance improvisation practice, this book demystifies what Lina Aschenbrenner coins as "neo-spiritual aesthetics." This book takes the reader on an analytical journey through a Gaga class, outlining the effective aesthetics of Gaga as an example for the broader field of neo-spiritualities. It distinguishes a threefold effect of Gaga practice-from a momentary extraordinary experience, to a lasting therapeutic effect, and finally Gaga's worldview potential. It situates the effect in an assemblage of interrelating aesthetics of environment, movement, and bodies. The book shows why seemingly leisure time activities such as Gaga form fruitful research objects to an academic study of religion and opens up research on neo-spiritual

practices. In understanding the sensory effect of practice and its cultural and social implications, the book follows an Aesthetics of Religion approach. It departs from the idea that cognition is embodied and that the body is thus central to understanding cultural and social phenomena. Drawing upon a wide array of data gathered in the context of Gaga at the Suzanne Dellal Center in Tel Aviv, the book weaves together different methods of discourse, ritual, movement, body knowledge, and narrative analysis, while acknowledging insights from neuroscience and cognitive science.
