

labor and delivery nursing diagnosis nanda

Labor and Delivery Nursing Diagnosis NANDA

Understanding and accurately identifying nursing diagnoses during labor and delivery are critical to providing safe, effective, and patient-centered care. The NANDA International (NANDA-I) classification provides standardized nursing diagnoses that guide clinicians in assessing, planning, and implementing interventions for women during this crucial period. Proper utilization of NANDA diagnoses in labor and delivery nursing promotes better outcomes by ensuring that nurses address both physical and psychosocial needs, anticipate potential complications, and support the mother's overall well-being.

Introduction to Labor and Delivery Nursing Diagnoses NANDA

Labor and delivery represent a complex physiological and emotional process that requires vigilant assessment and tailored nursing interventions. The NANDA-I classification system offers a comprehensive list of nursing diagnoses relevant to women in labor, enabling nurses to identify specific problems and prioritize care effectively.

These diagnoses are categorized based on common themes such as pain, anxiety, risk for complications, and physiological alterations. Having a standardized language helps in documentation, communication, and research, ultimately improving patient safety and care quality.

Common Nursing Diagnoses in Labor and Delivery

Labor and delivery nursing diagnoses encompass a broad spectrum of physical and psychosocial issues. The most frequently encountered diagnoses include:

1. Risk for Ineffective Airway Clearance
2. Acute Pain
3. Anxiety
4. Risk for Fetal Distress
5. Impaired Comfort

6. Risk for Postpartum Hemorrhage
7. Knowledge Deficit regarding Labor Process
8. Fear related to Labor and Delivery

Each diagnosis guides specific nursing interventions aimed at promoting maternal and fetal health.

Key Nursing Diagnoses in Labor and Delivery with Details

1. Acute Pain related to uterine contractions and cervical dilation

- Definition: Perceived discomfort during labor resulting from uterine contractions and tissue stretching.
- Manifestations: Verbal reports of pain, facial expressions, changes in vital signs, increased tension.
- Goals: Pain relief to enhance comfort, facilitate labor progression, and promote maternal well-being.
- Nursing Interventions:
 - Assess pain intensity regularly using appropriate pain scales.
 - Implement non-pharmacological pain management techniques such as breathing exercises, massage, and position changes.
 - Administer analgesics as prescribed, considering maternal and fetal status.
 - Provide emotional support and education about pain management options.

2. Anxiety related to unknown labor outcomes and pain

- Definition: Feelings of apprehension or fear about labor progression, pain, and the health of the baby.
- Manifestations: Restlessness, verbal expressions of fear, increased heart rate, elevated blood pressure.
- Goals: Reduce anxiety levels, provide information, and promote relaxation.
- Nursing Interventions:
 - Establish a trusting nurse-patient relationship.
 - Provide detailed information about labor progress and procedures.

- Encourage family involvement and support systems.
- Use relaxation techniques such as guided imagery or breathing exercises.

3. Risk for Fetal Distress

- Definition: Potential for compromised fetal well-being due to hypoxia or other complications.
- Risk Factors: Maternal hypoxia, placental abruption, cord prolapse, uterine tachysystole.
- Monitoring: Continuous fetal heart rate monitoring, assessment of uterine activity.
- Nursing Interventions:
 - Maintain maternal oxygenation by administering oxygen if indicated.
 - Change maternal position to improve uteroplacental blood flow.
 - Monitor fetal heart rate patterns closely for signs of distress.
 - Communicate findings promptly to the healthcare team.

4. Impaired Comfort related to labor pain and environmental factors

- Definition: Discomfort caused by physical pain, noise, or environmental stimuli.
- Manifestations: Verbal expressions of discomfort, restlessness, irritability.
- Goals: Enhance comfort and reduce distress.
- Nursing Interventions:
 - Ensure a quiet, comfortable environment.
 - Assist with positioning and ambulation as tolerated.
 - Provide comfort measures such as warm packs or cool cloths.
 - Offer emotional support and reassurance.

5. Risk for Postpartum Hemorrhage

- Definition: Potential for excessive bleeding after delivery.
- Risk Factors: Uterine atony, placenta previa, retained placenta, coagulopathies.
- Monitoring: Uterine tone, lochia amount, vital signs.
- Nursing Interventions:
 - Perform fundal massage to promote uterine contraction.

- Assess lochia characteristics frequently.
- Maintain IV access for uterotonics administration if needed.
- Educate the mother about signs of excessive bleeding.

6. Knowledge Deficit regarding Labor and Delivery Process

- Definition: Lack of understanding about labor stages, interventions, or postpartum care.
- Manifestations: Questioning, confusion, anxiety.
- Goals: Increase knowledge and promote informed participation.
- Nursing Interventions:
 - Provide clear, age-appropriate information about labor stages and procedures.
 - Encourage questions and clarify misconceptions.
 - Use visual aids or written materials as appropriate.
 - Involve the partner or family in education sessions.

7. Fear related to labor pain, outcomes, and potential complications

- Definition: Emotional response to the anticipation of labor.
- Manifestations: Crying, apprehension, verbal expressions of fear.
- Goals: Alleviate fear and promote positive coping.
- Nursing Interventions:
 - Offer reassurance and empathetic communication.
 - Discuss pain management options openly.
 - Encourage relaxation techniques and breathing exercises.
 - Support the mother's emotional needs and preferences.

Risk Nursing Diagnoses in Labor and Delivery

Certain complications during labor require nurses to anticipate and prevent adverse outcomes. These

risk diagnoses include:

1. Risk for Infection
2. Risk for Fetal Distress
3. Risk for Uterine Rupture
4. Risk for Excessive Bleeding
5. Risk for Altered Fetal Heart Rate Pattern

Early identification and intervention are vital to prevent escalation of these risks.

Using NANDA in Clinical Practice: Implementation and Documentation

Effective utilization of NANDA diagnoses involves:

1. Comprehensive assessment of the laboring woman, including physical, emotional, and psychosocial factors.
2. Accurate formulation of nursing diagnoses based on identified problems and risks.
3. Development of individualized care plans with specific goals and interventions aligned with the diagnoses.
4. Regular evaluation of patient responses and modification of care as needed.
5. Thorough documentation of assessments, diagnoses, interventions, and outcomes using standardized language.

Proper documentation not only ensures continuity of care but also facilitates communication among healthcare team members and supports legal accountability.

Conclusion

Labor and delivery nursing diagnoses based on NANDA International standards serve as a foundation for delivering safe, effective, and holistic care during one of the most critical times in a woman's life. By systematically assessing, diagnosing, planning, implementing, and evaluating care, nurses can address the physical and emotional needs of laboring women, anticipate potential complications, and promote positive outcomes for both mother and baby. Mastery of these diagnoses and their application in clinical practice enhances the quality of maternal healthcare and supports evidence-based nursing practice.

Remember: Always tailor nursing diagnoses and interventions to each individual patient, considering her unique circumstances, cultural background, and preferences. Staying updated with current NANDA classifications and evidence-based practices ensures optimal care during labor and delivery.

Frequently Asked Questions

What are common nursing diagnoses related to labor and delivery according to NANDA?

Common diagnoses include Risk for Infection, Altered Comfort, Anxiety, Risk for Impaired Fetal Gas Exchange, and Risk for Fluid Volume Deficit.

How does NANDA categorize diagnoses specific to labor and delivery nursing care?

NANDA categorizes diagnoses based on physiological, psychological, and environmental factors affecting maternal and fetal health during labor and delivery.

What is the significance of accurately identifying a labor and delivery nursing diagnosis using NANDA standards?

Accurate diagnosis ensures targeted interventions, promotes maternal and fetal safety, and improves overall labor and delivery outcomes.

Can you give an example of a NANDA nursing diagnosis for a woman experiencing labor pain?

Yes, an example is 'Acute Pain related to uterine contractions as evidenced by verbal reports of pain and facial grimacing.'

How does NANDA guide nurses in formulating nursing

interventions for labor complications?

NANDA provides standardized diagnoses that help nurses develop evidence-based interventions tailored to specific maternal or fetal issues during labor.

What are some risk diagnoses in labor and delivery nursing according to NANDA?

Risk diagnoses include Risk for Fetal Distress, Risk for Infection, and Risk for Postpartum Hemorrhage.

How often should nursing diagnoses be reassessed during labor and postpartum using NANDA guidelines?

They should be reassessed continuously throughout labor, delivery, and postpartum to adapt care plans as maternal and fetal conditions change.

Why is NANDA classification important in documenting labor and delivery nursing diagnoses?

It ensures standardized communication among healthcare providers, promotes consistency in care, and supports data collection for quality improvement.

Additional Resources

Labor and Delivery Nursing Diagnosis NANDA: A Comprehensive Guide

Understanding nursing diagnoses related to labor and delivery is essential for providing safe, effective, and compassionate care to mothers and their newborns. The North American Nursing Diagnosis Association (NANDA) provides a standardized framework that guides nurses in identifying patient problems, planning interventions, and evaluating outcomes. This detailed review explores the critical aspects of labor and delivery nursing diagnoses according to NANDA, highlighting their significance, common diagnoses, assessment strategies, and intervention approaches.

Introduction to Labor and Delivery Nursing Diagnoses

Labor and delivery is a complex physiological process that involves multiple physical, emotional, and psychological factors. Nurses play a pivotal role in assessing maternal and fetal well-being, anticipating potential complications, and implementing appropriate interventions. Nursing diagnoses serve as the foundation for individualized care plans, ensuring that each patient's unique needs are addressed comprehensively.

NANDA's standardized diagnoses facilitate clear communication among healthcare providers, promote evidence-based practice, and improve patient outcomes. For labor and delivery, specific

diagnoses help identify issues related to pain, anxiety, risk of complications, and emotional support, among others.

The Role of NANDA in Labor and Delivery Nursing

NANDA-I (International) provides a structured approach to diagnosing nursing problems through:

- Definition of diagnoses: Clear descriptions of patient problems.
- Related factors: Conditions or circumstances contributing to the problem.
- Defining characteristics: Observable signs and symptoms.
- Risk factors: Conditions that increase the likelihood of developing a problem.

In the context of labor and delivery, NANDA diagnoses guide nurses in recognizing both actual and potential issues, enabling proactive care.

Common Nursing Diagnoses in Labor and Delivery

Below are some of the most prevalent NANDA diagnoses associated with labor and delivery, categorized into actual and risk diagnoses:

Actual Nursing Diagnoses

1. Acute Pain (Related to uterine contractions, cervical dilation)
2. Anxiety (Related to uncertainty of labor outcome, pain)
3. Impaired Gas Exchange (Related to fetal distress)
4. Risk for Infection (Related to rupture of membranes, invasive procedures)
5. Deficient Knowledge (Related to labor process, postpartum care)
6. Risk for Constipation (Related to decreased mobility, opioid use)

Risk Nursing Diagnoses

1. Risk for Fetal Distress
2. Risk for Postpartum Hemorrhage
3. Risk for Infection (Endometritis, wound infection)
4. Risk for Altered Family Processes
5. Risk for Anxiety (Related to labor and delivery, unfamiliar environment)

Assessment Strategies for Labor and Delivery Diagnoses

Accurate assessment is the cornerstone of effective nursing diagnoses. Key assessment elements include:

- Maternal vital signs: Heart rate, blood pressure, temperature, respiratory rate.
- Fetal monitoring: Fetal heart rate patterns, activity, and variability.
- Pain assessment: Location, intensity, duration, and factors relieving or aggravating pain.
- Emotional and psychological status: Anxiety, fear, confidence levels.
- Labor progress: Cervical dilation, effacement, station, and contraction pattern.
- Labor history: Previous deliveries, complications, medical conditions.
- Laboratory and diagnostic results: Group B strep status, complete blood count, fluid analysis.

Thorough assessments help identify deviations from normal, enabling timely diagnoses.

Detailed Explanation of Key Nursing Diagnoses

1. Acute Pain

Definition: An unpleasant sensory and emotional experience associated with actual or potential tissue damage.

Related Factors:

- Uterine contractions
- Cervical dilation and effacement
- Fetal descent

Defining Characteristics:

- Verbal reports of pain
- Facial grimacing
- Restlessness
- Increased heart rate and blood pressure

Nursing Interventions:

- Non-pharmacological methods: hydrotherapy, massage, breathing techniques
- Pharmacological analgesia: opioids, epidural anesthesia
- Positioning to optimize comfort
- Providing emotional support and reassurance

Goals:

- Pain relief or management within safe limits
- Patient understanding of pain control options
- Maintaining maternal-fetal well-being

2. Anxiety

Definition: Unpleasant emotional state characterized by feelings of worry, fear, or unease.

Related Factors:

- Uncertainty of labor outcome
- Pain
- Fear of childbirth or unknown environment

Defining Characteristics:

- Restlessness
- Verbal expressions of concern
- Increased heart rate
- Difficulty concentrating

Nursing Interventions:

- Providing information about the labor process
- Offering emotional support
- Encouraging relaxation techniques
- Facilitating presence of support persons

Goals:

- Reduction of anxiety levels
- Enhancing maternal confidence
- Promoting cooperation during labor

3. Risk for Fetal Distress

Definition: Susceptibility of the fetus to experience compromised oxygenation, leading to potential compromise.

Related Factors:

- Uteroplacental insufficiency
- Umbilical cord problems
- Maternal hypoxia or anemia
- Maternal hypotension

Assessment Indicators:

- Abnormal fetal heart rate patterns
- Decreased fetal movement
- Abnormal decelerations on fetal monitoring

Nursing Interventions:

- Continuous fetal monitoring
- Position changes to improve uteroplacental blood flow
- Oxygen therapy for the mother if indicated
- Communicating findings promptly to the healthcare team

Goals:

- Early detection of fetal compromise
- Prevention of adverse outcomes
- Implementation of timely interventions

4. Risk for Postpartum Hemorrhage

Definition: Increased risk of excessive bleeding following delivery.

Related Factors:

- Uterine atony
- Lacerations or episiotomy
- Retained placental tissue
- Coagulopathies

Assessment Indicators:

- Excessive lochia (bleeding >500 mL for vaginal delivery)
- Soft, boggy uterus
- Hemodynamic instability

Nursing Interventions:

- Uterine massage
- Monitoring of blood loss
- Ensuring bladder is empty
- Administering uterotonics as prescribed
- Preparing for possible surgical intervention

Goals:

- Early recognition and management
- Prevention of hypovolemic shock
- Preservation of maternal health

Planning and Implementation of Nursing Interventions

Effective care planning involves setting measurable goals and selecting appropriate interventions based on diagnoses.

Key steps include:

- Prioritizing needs: Addressing immediate risks such as fetal distress or hemorrhage.
- Patient education: Informing about labor progress, pain management, and postpartum care.
- Emotional support: Providing reassurance and facilitating family involvement.
- Monitoring and reassessment: Continuously evaluating maternal and fetal status.
- Collaboration: Working with interdisciplinary teams for comprehensive care.

Sample Interventions:

- Administering medications per protocol
- Assisting with labor positions
- Performing non-pharmacological comfort measures
- Monitoring vital signs and fetal heart rate
- Educating about postpartum signs of complications

Evaluating Outcomes and Reassessing Diagnoses

Evaluation involves determining whether patient goals are met:

- Pain is managed effectively with minimal side effects.
- Anxiety levels decrease with support and information.
- Fetal well-being is maintained, with no signs of distress.
- Maternal hemodynamic stability is preserved postpartum.

Reassessment may reveal new issues or the need for modification of care plans, emphasizing the dynamic nature of labor and delivery nursing.

Conclusion

Labor and delivery nursing diagnoses according to NANDA serve as a vital framework for delivering safe, evidence-based, and patient-centered care. Mastery of these diagnoses enables nurses to anticipate complications, implement timely interventions, and support mothers through one of life's most significant events. As the field evolves, continuous education and adherence to best practices ensure optimal outcomes for both mother and baby.

In summary, understanding and applying labor and delivery nursing diagnoses from NANDA enhances clinical decision-making, fosters effective communication, and ultimately improves maternal and neonatal health outcomes.

Labor And Delivery Nursing Diagnosis Nanda

labor and delivery nursing diagnosis nanda: Handbook of Nursing Diagnosis Lynda Juall Carpenito, 2021-12-10 This handbook offers practical guidance on nursing diagnoses and associated care. It is a quick-reference type scope of content, easy for students to use while in clinical, in the classroom or simulation lab. It provides a condensed, organized outline of clinical nursing practice designed to communicate creative clinical nursing. It is not meant to replace nursing textbooks, but rather to provide nurses who work in a variety of settings with the information they need without

requiring a time-consuming review of the literature. It will assist students in transferring their theoretical knowledge to clinical practice--

labor and delivery nursing diagnosis nanda: Wellness Nursing Diagnosis for Health Promotion Karen M. Stolte, 1996 Preventive care and health promotion are essential in today's demanding health care environment. This concise how-to guide gives you the information you need to assess for and write effective, wellness-oriented nursing diagnoses. Let this easy-to-use resource show you how to maximize wellness and client functioning throughout the lifespan; develop key assessment questions based on developmental tasks; assess individual strengths to promote positive health benefits for the ill and well client; write wellness nursing diagnoses for individuals, groups, families and communities; and link the relationships among wellness nursing diagnosis, client or group behaviors and nursing interventions.

labor and delivery nursing diagnosis nanda: Mosby's Guide to Nursing Diagnosis, 6th Edition Revised Reprint with 2021-2023 NANDA-I® Updates - E-Book Gail B. Ladwig, Betty J. Ackley, Mary Beth Flynn Makic, 2021-11-10 Mosby's Guide to Nursing Diagnosis, 6th Edition Revised Reprint with 2021-2023 NANDA-I® Updates - E-Book

labor and delivery nursing diagnosis nanda: Nursing Diagnosis Reference Manual Sheila Sparks Ralph, Cynthia M. Taylor, 2005 Nursing Diagnosis Reference Manual, Sixth Edition helps nursing students and practicing nurses prepare care plans accurately and efficiently for every NANDA-approved nursing diagnosis. The book features a life-cycle format, with sections on adult, adolescent, child, maternal-neonatal, and geriatric health. Sections on community-based health (care plans on home health, health promotion, and more) and psychiatric/mental health round out the volume. Each care plan includes clear-cut criteria for identifying the right nursing diagnosis, assessment guidelines, outcome statements, rationales with all interventions, and documentation guidelines.

labor and delivery nursing diagnosis nanda: Labor and Delivery Nursing, Second Edition Michelle Murray, Gayle Huelsmann, 2020-06-22 Praise for the First Edition: "Where was this book when I was a new nurse just learning the ropes of labor and delivery? This is a true gem of a book—a must for any new grad going into labor and delivery. I recommend this book for every labor and delivery floor. -Cindy Curtis, RNC, IBCLC, CCE Former Director, The Family Birth Center Culpeper Regional Hospital Lignum, VA The best one-stop reference book for the experienced and novice Labor and Delivery RN....Finally an excellent Labor and Delivery book by RN's -- for RN's. -Garla DeWall, RNC Presbyterian Hospital in the Family Birthing Center Albuquerque, New Mexico The clinically oriented guide to nursing care during childbirth is distinguished by its strong focus on evidence-based practice as well as its engaging style and user-friendly format. It reviews the nursing process from admission to delivery focusing on proper surveillance and care, comprehensive data acquisition, interpretation, and teamwork. The second edition continues to help labor and delivery nurses make wise decisions in the delivery room, optimizing both maternal and fetal outcomes. It clearly explains the stages and phases of labor, delivery, and pain assessment and management—all supported by proven research. This text provides authoritative guidance on intervention options, creating patient-centered care plans, and improving communication with other members of the obstetrics team. New to the Second Edition: Proper analysis of the partograph to facilitate appropriate patient interventions Updated information about clinical pelvimetry New information on psyche, including the religious, spiritual, and cultural dimensions of care Setting priorities in triage and care related to postpartum hemorrhage Identification of "myths" related to childbirth Individualized patient care related to fetal distress and nonreassuring fetal status Oxytocin infusion and its relationship to permanent Erb's palsy and autism Updated information on technology, including connectivity between smart IV pumps and the EMR How to distinguish functional from mechanical dystocia and intervene to enhance fetal and maternal safety Key Features: Applies to nursing care of childbearing clients world-wide Focuses on evidence-based practices Written in engaging, easy-to-understand style for new nurses, seasoned practitioners, and nurses seeking certification Enhances effective decision-making to optimize patient care and outcomes Replete with

informative references, relevant graphics, and review questions Incorporates research to clearly explain concepts and best practices Provides orientation fundamentals, checklists, and log charts

labor and delivery nursing diagnosis nanda: Nursing Diagnoses 2012-14 NANDA

International, North American Nursing Diagnosis Association, 2011-11-14 Nursing diagnoses guide the selection of interventions that are likely to produce the desired treatment effects and are seen key to the future of evidence-based, professionally-led nursing care. This is the definitive guide to nursing diagnoses developed by the diagnosis development committee of NANDA.

labor and delivery nursing diagnosis nanda: Nursing Diagnosis Handbook - E-Book

Betty J. Ackley, Gail B. Ladwig, 2013-01-20 The 10th edition of the Nursing Diagnosis Handbook makes formulating nursing diagnoses and creating individualized care plans a breeze. Updated with the most recent NANDA-I approved nursing diagnoses, this convenient reference shows you how to build customized care plans in three easy steps: assess, diagnose, plan. Authors Elizabeth Ackley and Gail Ladwig use Nursing Outcomes Classification (NOC) and Nursing Interventions Classification (NIC) to guide you in creating care plans that include desired outcomes, interventions, patient teaching, and evidence-based rationales. Unique! Care Plan Constructor on the companion Evolve website offers hands-on practice creating customized plans of care. Alphabetical thumb tabs allow quick access to specific symptoms and nursing diagnoses. Suggested NIC interventions and NOC outcomes in each care plan. Recent and classic research examples promote evidence-based interventions and rationales. NEW! 4 Color text NEW! Includes updated 2012-2014 NANDA-I approved nursing diagnoses NEW! Provides the latest NIC/NOC, interventions, and rationales for every care plan. NEW! QSEN Safety interventions and rationales NEW! 100 NCLEX exam-style review questions are available on the companion Evolve website. NEW! Root Causing Thinking and Motivational Interviewing appendixes on the companion Evolve website.

labor and delivery nursing diagnosis nanda: Mosby's Guide to Nursing Diagnosis - E-Book

Gail B. Ladwig, Betty J. Ackley, 2013-01-31 This pocket-sized reference is ideal for use in clinicals, in class and at the bedside! A condensed version of the Nursing Diagnosis Handbook, 10th Edition, Mosby's Guide to Nursing Diagnosis, 4th edition uses a quick-access format to help you diagnose and formulate care plans with confidence and ease. It includes the most recent NANDA-I approved nursing diagnoses based on more than 1,300 specific symptoms and a step-by-step guide to creating care plans featuring desired outcomes, interventions, and patient teaching. UNIQUE! Care plans for every NANDA-I approved nursing diagnosis, including pediatric, geriatric, multicultural, home care, client/family teaching and discharge planning, and safety interventions Alphabetical thumb tabs provide quick access to specific symptoms and nursing diagnoses Pocketsize portability makes this book easy to carry and use in clinicals, in class, or at the bedside NEW! 4 Color Text NEW! Updated 2012-2014 NANDA-I-approved nursing diagnoses NEW! 16 new and 22 revised diagnoses NEW!

Added content on safety, one of QSEN's six competencies

labor and delivery nursing diagnosis nanda: Nursing Diagnosis Lynda Juall Carpenito-Moyet, 2008 Explains the role of nursing diagnosis in clinical practice; provides information on definitions, characteristics, related factors, and interventions for nursing diagnoses; and offers information on collaborative problems.

labor and delivery nursing diagnosis nanda: Maternal Newborn Nursing Care Plans Carol J. Green, Judith M. Wilkinson, 2004 Maternal Newborn Nursing Care Plans provides students with a necessary care plan reference that includes a strong nursing process approach and comprehensive coverage of maternity nursing content. The goal of the book is to provide interventions for both collaborative problems and nursing diagnoses. It emphasizes the use of standardized nursing languages, including NANDA diagnoses, NIC interventions, and NOC outcomes in each care plan. Includes over 65 of the most common normal and high risk care plans associated with maternal newborn nursing care. UNIQUE! Lists the collaborative problems or potential complications for every condition covered. Incorporates a consistent format presentation for each content area that includes: 1) Focus on Collaborative Practice - definition, etiology, physical findings, diagnostic studies; 2) Collaborative Problems - list of collaborative problems and focus assessments; 3) Nursing Diagnosis Care Plans - list of each diagnosis, care plan for each nursing diagnosis that links NANDA, NIC, and NOC; and 4) Teaching/Collaborative Activities. Emphasizes collaboration throughout to show students how to use standardized approaches such as Critical Paths and individualized approaches (Nursing Care Plans) focusing on individualized care much the same as nurses do in practice. UNIQUE! Includes Care Plans from a wellness perspective to provide a greater emphasis on health promotion and prevention and to provide students with the necessary tools for care for areas other than just the problem. Integrates Home Care for certain interventions to stress the importance of follow-up care. Integrates Patient Teaching Interventions for certain diagnoses to help students understand the importance of teaching the patient self-care.

labor and delivery nursing diagnosis nanda: Nursing Care Plans Lynda J. Carpenito, 2013-11-18 Designed to help students learn how to create nursing care plans and effectively document care, this practical book focuses on the nursing plans that are most important, ensuring that students learn what they need to know and that they can find the information they need easily without being distracted by irrelevant information. Packed with easy-to-understand information and focused on helping students develop critical reasoning skills, this respected text presents the most likely nursing diagnoses and collaborative problems with step-by-step guidance on nursing actions and rationales for interventions. More than 85 nursing care plans translate theory into clinical practice. This exciting revision includes special risk consideration icons called "Clinical Alert" (derived from the most recent IOM report) that integrate patient-specific considerations into each care plan. Other enhancements include a streamlined format for easier use; new care plans for maternity, pediatric, and mental health nursing.

labor and delivery nursing diagnosis nanda: Handbook of Nursing Diagnosis Lynda Juall Carpenito-Moyet, 2006 The newly revised Eleventh Edition of this best-selling handbook is an easy-to-carry, accessible guide to the latest NANDA-approved nursing diagnoses. Section 1 contains all nursing diagnoses, including definitions, characteristics, related factors, outcomes, and interventions. Section 2 contains Diagnostic Clusters with a collaborative focus. Features include Author's Notes, key concepts, interventions with rationales, focus assessment criteria, and outcome criteria. This edition includes listings of associated NIC (Nursing Interventions Classifications) and NOC (Nursing Outcomes Classifications) for every NANDA diagnosis. New diagnoses added and modified in accordance with the latest NANDA meeting are in an appendix for easy access.

labor and delivery nursing diagnosis nanda: Introductory Maternity Nursing N. Jayne Klossner, 2006 This full-color LPN/LVN-level textbook presents maternity nursing using a nursing process framework. Throughout the text are features that help students develop critical thinking skills and apply content to practice—such as nursing procedures, nursing care plans, clinical pearls, patients' and caregivers' stories, critical thinking questions, cultural snapshots, family teaching tips,

and over 200 illustrations. Each chapter is followed by an integrated study guide/workbook with NCLEX®-style questions, Critical Thinking: What Would You Do? scenarios including dosage calculations, and Study Activities including Internet activities. Introductory Maternity Nursing is an ideal complement to Hatfield, Broadribb's Introductory Pediatric Nursing, Sixth Edition. Instructors who prefer a combined maternity/pediatric text can use Klossner/Hatfield, Introductory Maternity and Pediatric Nursing.

labor and delivery nursing diagnosis nanda: Instructor's Manual to Accompany Maternity Nursing Helen L. Van Hoozer, 1999

labor and delivery nursing diagnosis nanda: Introduction to Maternity & Pediatric Nursing - E-Book Gloria Leifer, 2013-11-28 Part of the popular LPN Threads series, Introduction to Maternity & Pediatric Nursing provides a solid foundation in obstetrics and pediatric nursing. An easy-to-follow organization by developmental stages, discussion of disorders by body system from simple-to-complex and health-to-illness, and a focus on family health make it a complete guide to caring for maternity and pediatric patients. Written in a clear, concise style by Gloria Leifer, MA, RN, this edition reflects the current NCLEX® test plan with additional material on safety, health promotion, nutrition, and related psychosocial care. Cultural Considerations boxes and a Cultural Assessment Data Collection Tool help in developing individualized plans of care. Updated health promotion content includes Health Promotion boxes focusing on preventive strategies for achieving prenatal wellness, health during pregnancy, postnatal health, and pediatric illness prevention and wellness -- including the complete immunization schedules for all ages. Nursing Tips provide information applying to the clinical setting. Objectives are listed in each chapter opener. Key terms include phonetic pronunciations and text page references at the beginning of each chapter. Nursing Care Plans with critical thinking questions help you understand how a care plan is developed, how to evaluate care of a patient, and how to apply critical thinking skills. A companion Evolve website includes animations, videos, answers to review questions and answer guidelines for critical thinking questions, an English/Spanish audio glossary, critical thinking case studies, and additional review questions for the NCLEX examination.

labor and delivery nursing diagnosis nanda: Introductory Maternity and Pediatric Nursing Nancy T. Hatfield, 2013-11-07 Written specifically for the LPN/LVN student, this Third Edition of Introductory Maternity and Pediatric Nursing provides clear, well-illustrated, and clinically relevant coverage of pregnancy, birth, and pediatrics to help student's master key clinical and critical thinking skills and prepare for the NCLEX® exam and successful practice. This Third Edition is enhanced by new care plans in the clinical chapters, new case studies, a new art program, a new pronunciation guide, and more. Online video clips of live births, Cesarean delivery, breastfeeding, pediatric milestones, the well child, and the hospitalized child bring concepts to life in dynamic full color. To ensure student mastery of key topics, an integrated workbook at the end of each chapter includes NCLEX-style questions (many NEW to this edition), study activities, and critical thinking: What Would You Do? exercises.

labor and delivery nursing diagnosis nanda: *A Comprehensive Textbook of Midwifery & Gynecological Nursing* Annamma Jacob, 2018-11-10 Section 1 Midwifery Chapter 1. Historical Review Chapter 2. Development of Maternity Services and Current Trends Chapter 3. Midwife: Definition of the Term, Roles and Responsibilities Chapter 4. Nursing Process in Maternal-Newborn Care Section 2 Reproductive System Chapter 5. Female Pelvis and Generative Organs Chapter 6. Hormonal Cycles Chapter 7. Vital Statistics in Obstetric Chapter 56. Perinatal Loss and Grief Chapter

labor and delivery nursing diagnosis nanda: Maternity, Newborn, and Women's Health Nursing Susan A. Orshan, 2008 This new book will be a core text for undergraduate Maternity/Newborn courses. It also will work for courses emphasizing Women's Health across the lifespan. Coverage includes core content on preconception, pregnancy, labor, birth, and postpartum. In addition, the text focuses on important topics throughout a woman's life: health promotion, nutrition, medical issues, psychosocial issues, sexuality, family, fertility control and issues, menopause, and aging. While other texts touch on the different stages of a woman's lifespan, this book provides more detail and information in areas outside the average maternity text.

labor and delivery nursing diagnosis nanda: All-in-One Nursing Care Planning Resource Pamela L. Swearingen, 2015-02-02 The only book featuring nursing care plans for all core clinical areas, Swearingen's All-In-One Nursing Care Planning Resource, 4th Edition provides 100 care plans with the nursing diagnoses and interventions you need to know to care for patients in all settings. It includes care plans for medical-surgical, maternity/OB, pediatrics, and psychiatric-mental health, so you can use just one book throughout your entire nursing curriculum. This edition includes a new care plan addressing normal labor and birth, a new full-color design, new QSEN safety icons, new quick-reference color tabs, and updates reflecting the latest NANDA-I nursing diagnoses and collaborative problems. Edited by nursing expert Pamela L. Swearingen, this book is known for its clear approach, easy-to-use format, and straightforward rationales. NANDA-I nursing diagnoses are incorporated throughout the text to keep you current with NANDA-I terminology and the latest diagnoses. Color-coded sections for medical-surgical, maternity, pediatric, and psychiatric-mental health nursing care plans make it easier to find information quickly. A consistent format for each care plan allows faster lookup of topics, with headings for Overview/Pathophysiology, Health Care Setting, Assessment, Diagnostic Tests, Nursing Diagnoses, Desired Outcomes, Interventions with Rationales, and Patient-Family Teaching and Discharge Planning. Prioritized nursing diagnoses are listed in order of importance and physiologic patient needs. A two-column format for nursing assessments/interventions and rationales makes it easier to scan information. Detailed rationales for each nursing intervention help you to apply concepts to specific patient situations in clinical

practice. Outcome criteria with specific timelines help you to set realistic goals for nursing outcomes and provide quality, cost-effective care. NEW! Care plan for normal labor and birth addresses nursing care for the client experiencing normal labor and delivery. UPDATED content is written by practicing clinicians and covers the latest clinical developments, new pharmacologic treatments, patient safety considerations, and evidence-based practice guidelines. NEW full-color design makes the text more user friendly, and includes NEW color-coded tabs and improved cross-referencing and navigation aids for faster lookup of information. NEW! Leaf icon highlights coverage of complementary and alternative therapies including information on over-the-counter herbal and other therapies and how these can interact with conventional medications.
