nyseslat test prep: Building Asset-Based Transitions to Postsecondary Education with Multilingual Students with Disabilities Audrey A. Trainor, Lindsay E. Romano, Lynn A. Newman, 2024-09-30 This important volume presents the results from a five-year, mixed methods study on the transition from high school to postsecondary education for young adults who, during secondary school, received both English learner and special education services. It aims to improve our understanding of, and thus the supportive service provisions for, the dually identified student population in secondary and higher education settings. The book explores dually identified students' complex and intersectional experiences, strengths, and needs using multiple methods of inquiry, including the examination of educational transition-focused policies and practices, a comprehensive review of research results, case studies, and comparative analysis of key stakeholder perspectives for this student population. With a focus on equitable, culturally sustaining transition research and practice, the book informs graduate students, researchers, and teacher educators about how to mitigate the effects of historical marginalization, increasing our collective understanding of intersectional experiences and how they shape young adults' choices as they leave high school and move into young adulthood.

nyseslat test prep: Translanguaging with Multilingual Students Ofelia García, Tatyana Kleyn, 2016-06-10 Looking closely at what happens when translanguaging is actively taken up to teach emergent bilingual students across different contexts, this book focuses on how it is already happening in classrooms as well as how it can be implemented as a pedagogical orientation. It extends theoretical understandings of the concept and highlights its promises and challenges. Using a Transformative Action Research design, six empirically grounded ethnographic case studies describe how translanguaging is used in lesson designs and in the spontaneous moves made by teachers and students during specific teaching moments. The cases shed light on two questions: How, when, and why is translanguaging taken up or resisted by students and teachers? What does its use mean for them? Although grounded in a U.S. context, and specifically in classrooms in New York State, Translanguaging with Multilingual Students links findings and theories to different global contexts to offer important lessons for educators worldwide.
