almanac 2023 pdf: Return to Growth Volume One Jon Moynihan, 2024-09-10 The UK has, in recent years, been suffering from what is nothing short of an economic crisis. Growth has now completely stalled in those western democracies, the UK included, where high government spending and high taxes have steadily burgeoned, decade after decade. Free-market economies now threaten to leave us behind in terms of wealth, opportunity and standards of living. At the end of Rishi Sunak's 2024 government, expenditure was at 45 per cent of GDP and taxes were 36 per cent and

rising – yet still nowhere near sufficient to cover public expenditure. The government's net annual borrowing is now a completely unsustainable 4.4 per cent of GDP, with our overall national debt growing rapidly and alarmingly. In this arresting and powerful manifesto for economic change, Jon Moynihan analyses the UK's decades-long stagnant economy and looks at what can be done to resuscitate it. Combining rigorous research with unparalleled business experience, he explores the key dynamics affecting economic growth, ranging from government borrowing, expenditure, tax and regulation to the way national resources are deployed on non-productive and futile, growth-stifling endeavours. Ultimately, Moynihan shows that unless we act now to reverse the decline, by radically restructuring our economy to stimulate economic growth, the UK risks stagnation, financial collapse and a long-term disintegration in our standard of living. Ignore his warning at your peril.

Inspiring and empowering, this is essential reading for scholars, students, NGOs and activists alike.

almanac 2023 pdf: Planning for Protraction Iskander Rehman, 2023-11-09 As Sino-US relations have deteriorated, concerns have grown in Washington over its ability to defeat China in a major conflict. A conflict between such peer competitors would likely become a protracted war of attrition drawing on all dimensions of national power, but this reality has yet to receive a sufficient degree of analytical attention. In this Adelphi book, Iskander Rehman provides a historically informed and empirically grounded study of protracted great-power war, its core drivers and characteristics, and an examination of the elements that have most often determined a competitor's long-term strategic performance. Final victory in a protracted conflict, this book argues, rests on a combination of three core factors: a state's military effectiveness and adaptability, its socio-economic power and resiliency, and the soundness of its alliance management and grand strategy. A detailed analysis of the contemporary Sino-US rivalry assesses how both parties might fare in the event of a protracted war, while highlighting some of its key differentiating aspects – most notably its nuclear and cyber dimensions.

almanac 2023 pdf: Public Education in Turbulent Times Faiza M. Jamil, Javaid E. Siddiqi, 2023-12-17 Public Education in Turbulent Times communicates a bold vision for the future of education, addressing the evolving purpose of American public education and the structural innovations schools are using to meet the needs of a rapidly transforming world. Highlighting key challenges that emerged during the immense economic and social disruptions of recent years, the book leverages case studies of four unique school districts where school communities overcame concerns high in the public consciousness – trauma, danger, economic inequality, and racial injustice. These obstacles have hampered efforts to reclaim lost learning opportunities that could define the educational experiences of a generation of students. If educators revert to business as usual, they risk dismissing essential lessons from resilient schools that thrived in the chaos of a global pandemic and its fallout. This book provides rich insights to refocus readers' attention on achieving a more equitable and safe education system for the future.

almanac 2023 pdf: Reinventing the Heartland Nicholas Lalla, 2025-03-04 The story of one Heartland city's efforts to reinvent itself for the innovation age is a powerful example of the change America needs. Every city in America wants to become a tech hub, yet so few succeed—and that's the problem. Tech jobs, venture capital, and R&D are concentrated in a handful of big coastal cities, while the broad middle of the country is left out. But to thrive in the twenty-first century, cities must create innovation economies of their own and grow in more inclusive ways. In January 2020, Nicholas Lalla founded Tulsa Innovation Labs to help Tulsa, Oklahoma transition from its oil and gas legacy to tech. Lalla's organization would go on to build the first tech-led economic development

strategy in northeast Oklahoma's history, raise over \$200 million, and create thousands of tech jobs. This success catalyzed a massive, city-wide endeavor—the first time in American history a city has dedicated itself in such a concerted way to becoming a player in the innovation economy. Drawing upon Lalla's experience in Tulsa, *Reinventing the Heartland* lays out a bold and pragmatic plan for urban reinvention, showing cities how to reorient their entire civic ecosystems toward inclusive tech-led growth. Each chapter covers a core plank of the action plan—from how cities can establish their own tech niche based on existing assets to how they can rapidly up-skill talent in the era of AI to how to build urban-rural partnerships and compete for federal funding as a region. In *Reinventing the Heartland*, Lalla provides the path forward, not just for Tulsa, but for any city ready to embrace the future.

almanac 2023 pdf: Andy Varipapa Glenn Gerstner, 2024-05-01 Born in Italy in 1891, Andy Varipapa immigrated to the United States in 1903, uneducated and unable to speak English. Equipped with little more than athletic ability, the will to succeed, and a healthy dose of self-confidence, he became bowling's first superstar. In the 1940s and 1950s, Varipapa was the world's most famous bowler. For more than 50 years, he dazzled fans with an array of never-before-seen trick shots in person, on movie screens, and on television. Varipapa was not only a performer but one of the greatest bowlers ever. He won the prestigious BPAA All-Star tournament in 1946, silencing critics who claimed he was just an entertainer. And he did so at age 55, long past most bowlers' retirement age. To prove it was no fluke, he repeated in 1947. Bowling fans recognized the outspoken and brash Great Varipapa, who once said, I'm the most skillful, talkative, and controversial bowler who ever lived. Few knew Andy, the kind and loyal family man and friend. Sourced from interviews with family and friends and more than 1,000 secondary sources, this first-ever biography of Varipapa tells the personal story of bowling's greatest showman and one of its most influential figures.

almanac 2023 pdf: The Path to Paralysis Donald G. Nieman, 2024-10-15 How did the world's oldest democracy lose its mojo? How did we get to a point where we face existential crises like climate change yet leaders can't agree that there's a problem let alone develop solutions? Political leaders bear some of the responsibility. Newt Gingrich, Sarah Palin and Donald Trump, to name a few, have shattered political norms and transformed our politics into a free-for-all in which personal attacks, appeals to bigotry and fear, disregard for truth, and disdain for governing have become the norm. But they are more a symptom than the cause. *The Path to Paralysis* examines changes in political culture during the past 60 years – conflict over race, religion and gender; wrenching economic changes and growing concentration of wealth; the end of the Cold War; hardening regional divisions; and dramatic changes in communications – that made Donald Trump possible, if not inevitable. Long in the making, these cross-currents came together in the early 21st century – as the United States experienced the deepest recession since the 1930s and elected its first Black president – to create the perfect storm. The result was toxic and deeply polarised politics that threatened the existence of constitutional government.

almanac 2023 pdf: The Future of Charity Marketing Sarah-Louise Mitchell, Fran Hyde, 2024-11-07 Charities play an increasingly important role in our society. Whether caring for the vulnerable, campaigning for change or enabling access to the arts, they are organisations on a mission, underpinned by social purpose. However, charities now face unique challenges in a turbulent global economic climate due to structural changes in society post Covid and pressure on disposable incomes. Charities need to transform and, in some cases, modernise for sustained increasing demand from their service users. They need to engage with a wider range of stakeholders, meet higher public expectations on transparency and governance and compete for resources from existing as well as a continuous range of new competitors. This book brings together leading scholars to think about what is needed to future proof the nonprofit sector in areas such as partnerships, collaborations, branding, communications, income generation and fundraising, stakeholder involvement and meeting the future needs of service users. This edited collection builds

upon the research in the editors' first book *Charity Marketing: Contemporary Issues, Research and Practice* to challenge students, researchers and practitioners in understanding the challenges and opportunities ahead and think about how to future proof nonprofit marketing. Drawing from a diverse group of academics and deep-thinking practitioners, *The Future of Charity Marketing* focuses on how charities can prepare for the future through sharing big ideas and examples of best practice. Presenting contrasting perspectives and the latest thinking on a range of challenges, this book gives topics for classroom debate, identifies areas for future research and offers practitioners useful insights.

almanac 2023 pdf: The Routledge Handbook of Artificial Intelligence and Philanthropy Giuseppe Ugazio, Milos Maricic, 2024-11-07 The Routledge Handbook of Artificial Intelligence and Philanthropy acts as a catalyst for the dialogue between two ecosystems with much to gain from collaboration: artificial intelligence (AI) and philanthropy. Bringing together leading academics, AI specialists, and philanthropy professionals, it offers a robust academic foundation for studying both how AI can be used and implemented within philanthropy and how philanthropy can guide the future development of AI in a responsible way. The contributors to this Handbook explore various facets of the AI-philanthropy dynamic, critically assess hurdles to increased AI adoption and integration in philanthropy, map the application of AI within the philanthropic sector, evaluate how philanthropy can and should promote an AI that is ethical, inclusive, and responsible, and identify the landscape of risk strategies for their limitations and/or potential mitigation. These theoretical perspectives are complemented by several case studies that offer a pragmatic perspective on diverse, successful, and effective AI-philanthropy synergies. As a result, this Handbook stands as a valuable academic reference capable of enriching the interactions of AI and philanthropy, uniting the perspectives of scholars and practitioners, thus building bridges between research and implementation, and setting the foundations for future research endeavors on this topic. almanac 2023 pdf: As Finanças do Dragão Marcello Azevedo, 2024-05-28 O livro aborda a evolução do sistema financeiro chinês, a partir do processo de abertura e reformas começadas em 1978. Um sistema que, em 45 anos, evoluiu de um modelo de monobanco para se tornar o segundo maior do mundo. A obra é construída majoritariamente de documentos oficiais chineses. O sistema financeiro chinês combina Estado, mercado, desenvolvimento e Partido Comunista em uma perspectiva própria e singular, diferentemente dos sistemas ocidentais e do antigo sistema soviético, reformando-se a todo tempo, conforme as decisões dos governantes chineses. Hoje, o sistema financeiro da China está presente em quase todo o mundo, com diversos tipos de instituições, financiando obras em quase todos os continentes. A presença financeira chinesa pode ser notada em iniciativas, como a criação do novo Banco de Desenvolvimento do BRICS e o projeto Cinturão e Rota (Rota da Seda). Em quase tudo o que é produzido e exportado pela China, tem no sistema financeiro chinês um importante componente. Não é possível entender a China de hoje sem conhecer o seu sistema financeiro.

almanac 2023 pdf: Net Zero: Decarbonizing the Global Economies Sinan Küfeoğlu, 2024-10-15 This monograph is designed to provide a comprehensive and accessible reference to Net Zero efforts globally. Firstly, the book explains the basics of Net Zero, Greenhouse Gas Emissions (GHG), and the global climate change struggle. A chapter on Environmental, Social, and Governance (ESG), as standardisation and screening of sustainability follows. Next comes a chapter on carbon pricing and carbon tax. After these background chapters, the book continues with eight chapters that cover Net Zero across a variety of economic sectors: energy supply, business sector, transport, residential, industrial processes, waste management, public (and government), and agriculture, forestry and land use. These economic sectors are adopted from the Intergovernmental Panel on Climate Change (IPCC) and UK National Statistics. Each chapter includes basic background information, technical or scientific, and a policy section. The sector-based chapters also include sectoral emissions analysis, review, and then a horizon scanning for innovative companies and their business models. This will enable non-experts from the business sector to read and understand the dynamics and trends in other sectors. Similarly, students and fresh graduates will easily follow the chapter (or the industry) that interests them and comprehend the basics and contemporary business trends. By joining research work with the business models of 400 noteworthy and innovative companies, this book constructs a vital bridge between academia, practical reality, policy, and business implementation, with a keen focus on environmental value.
