Regarding these prepositions as path-prepositions, the authors show that the prepositional semantic structures are conceptually grounded in the PATH and the MOTION-EVENT frames and explain that prepositional senses emerge as a result of the PATH image schema transformations and metaphorical mappings related to the EVENT STRUCTURE metaphor. Based on their findings, the authors show how senso-motoric functioning, life experience, individual knowledge, imagery and different ways in which people conceptualize the world influence the relation between language and conceptualization.

Det samme gjaldt det meste af kødet på resten af den døde krop. Han kunne ikke se hendes øjne. Formodentlig ville han heller ikke have kunnet se dem, hvis hun havde vendt den anden vej. Han rakte ned i lommen efter sin mobiltelefon. Hvem fanden ringer man til, når der ligger et meget dødt menneske, der på ingen måde har brug for akut hjælp, på en i øvrigt efterårstom strand? En kvinde driver op på stranden ved Lalandia på Lolland. Det eneste genkendelige er hendes lange, rødlilla hår. Fem uger tidligere har hun i al hemmelighed for sin mand, krisepsykologen, taget en fridag fra jobbet. Hvad var kvindens historie? Hvem var hun, og hvor var hun på vej hen? Liv i mine hænder spænder over årtier og forener spændingsroman med hverdagsdrama i en historie om liv og død, overgreb, tvillinger, håb, bristede drømme, loyalitet og svigt.
