

functional strategic planning involves decisions related to:

Functional strategic planning involves decisions related to: a comprehensive approach that outlines how different departments and functions within an organization align their goals and activities to achieve overall strategic objectives. This process ensures that every functional area, such as marketing, operations, finance, human resources, and IT, works synergistically towards common organizational goals. Effective functional strategic planning not only enhances organizational efficiency but also fosters innovation, competitive advantage, and sustainable growth.

Understanding Functional Strategic Planning

Functional strategic planning is a critical component of the broader strategic management process. While corporate-level strategy defines the overall direction of an organization, functional strategies focus on specific departments or units. These plans translate high-level objectives into actionable initiatives tailored to the unique needs and capabilities of each function.

Decisions Related to Marketing

Marketing plays a pivotal role in positioning a brand, attracting customers, and driving sales. Decisions in this domain include:

Market Segmentation and Targeting

- Identifying specific customer segments that align with the company's offerings
- Deciding which segments to prioritize based on profitability, growth potential, and competitive landscape

Product Development and Portfolio Management

- Determining which products or services to develop or discontinue
- Managing product lifecycle stages to maximize revenue and market share

Pricing Strategies

- Setting competitive and profitable price points
- Deciding on discounts, promotions, and value-based pricing models

Promotion and Advertising

- Choosing the most effective channels for reaching target audiences (digital, print, broadcast)
- Designing campaigns that reinforce brand positioning and drive demand

Distribution and Sales Channels

- Deciding on direct vs. indirect sales channels
- Expanding into new markets or regions

Decisions Related to Operations

Operational decisions focus on the processes, systems, and resources that produce goods or deliver services efficiently. These include:

Process Optimization

- Streamlining workflows to reduce waste and increase productivity
- Implementing technology solutions such as automation and ERP systems

Supply Chain Management

- Selecting suppliers and managing procurement processes
- Ensuring timely delivery of raw materials and finished goods

Quality Control and Assurance

- Establishing standards for product quality and service delivery
- Implementing inspection, testing, and continuous improvement practices

Capacity Planning

- Forecasting demand to adjust production capacity
- Investing in equipment or facilities to meet future growth

Technology Adoption

- Deciding on the integration of new tools and platforms
- Ensuring systems support operational agility and scalability

Decisions Related to Finance

Financial decisions underpin the sustainability and growth of an organization. Key areas include:

Budget Allocation

- Distributing financial resources across departments and projects
- Prioritizing initiatives that align with strategic goals

Investment Planning

- Deciding on capital investments in equipment, technology, and infrastructure
- Evaluating funding options such as loans, equity, or internal accruals

Cost Management

- Identifying areas for cost reduction without compromising quality
- Implementing cost control measures and efficiency programs

Financial Risk Management

- Assessing risks related to currency fluctuations, interest rates, and credit
- Developing mitigation strategies

Financial Reporting and Compliance

- Ensuring adherence to accounting standards and regulatory requirements
- Providing transparency for stakeholders and investors

Decisions Related to Human Resources

People are an organization's most valuable asset. HR-related decisions include:

Talent Acquisition and Retention

- Developing recruitment strategies to attract skilled professionals
- Creating retention programs and career development opportunities

Training and Development

- Identifying skill gaps and implementing training initiatives
- Promoting continuous learning to adapt to changing industry demands

Performance Management

- Establishing KPIs and appraisal systems
- Linking performance outcomes to rewards and recognition

Organizational Structure and Culture

- Designing structures that promote collaboration and agility
- Fostering a culture aligned with strategic values and goals

Employee Engagement and Well-being

- Implementing policies for work-life balance
- Enhancing workplace satisfaction and productivity

Decisions Related to Information Technology (IT)

Technology decisions are crucial in enabling operational efficiency and innovation. These include:

IT Infrastructure and Systems

- Investing in hardware, software, and network infrastructure
- Ensuring scalability and security

Digital Transformation

- Integrating digital tools into business processes
- Leveraging data analytics, artificial intelligence, and cloud computing

Data Management and Security

- Establishing policies for data collection, storage, and analysis
- Protecting against cyber threats and ensuring compliance with data privacy laws

Innovation and Technology Adoption

- Staying ahead of technological trends relevant to the industry
- Encouraging experimentation and adoption of emerging technologies

IT Governance

- Defining policies for IT decision-making
- Aligning IT strategy with overall business objectives

Integrating Functional Strategies for Organizational Success

The effectiveness of functional strategic planning depends on how well these decisions are integrated across departments. Key factors for successful integration include:

- **Communication:** Ensuring transparent and consistent information flow among functions.
- **Coordination:** Synchronizing activities to avoid duplication and conflicts.
- **Alignment:** Making sure that departmental goals support overarching organizational objectives.
- **Flexibility:** Adapting plans in response to market changes or internal challenges.

Benefits of Effective Functional Strategic Planning

When decisions are thoughtfully made within each function and aligned cohesively, organizations benefit from:

- Enhanced operational efficiency and reduced waste
- Improved market positioning and customer satisfaction
- Better financial performance and resource utilization
- Greater innovation and adaptability
- Strong organizational culture and employee engagement

Conclusion

Functional strategic planning involves decisions related to a diverse array of areas essential for organizational success. From marketing and operations to finance, human resources, and IT, each function's decisions must align with the company's strategic goals. By effectively managing these decisions, organizations can create a cohesive, agile, and competitive enterprise capable of navigating complex market dynamics and sustaining long-term growth. Ultimately, the integration and execution of these functional strategies are vital for transforming strategic visions into tangible results, ensuring the organization remains resilient and poised for future success.

Frequently Asked Questions

What are the key areas involved in functional strategic planning decisions?

Functional strategic planning involves decisions related to marketing, operations, finance, human resources, and technology to align departmental goals with overall organizational strategy.

How does decision-making in functional strategic planning impact organizational performance?

Effective decisions in functional strategic planning ensure resource allocation aligns with strategic priorities, improving efficiency, competitive advantage, and overall organizational success.

What role does technology play in functional strategic planning decisions?

Technology influences decisions by enabling process improvements, data-driven insights, and innovation adoption, which are critical for achieving strategic objectives within functions.

How do cross-functional decisions contribute to effective strategic planning?

Cross-functional decisions foster collaboration, ensure consistency across departments, and help in aligning goals, leading to a cohesive and effective strategic plan.

What are common challenges in making decisions related to functional

strategic planning?

Challenges include siloed thinking, insufficient data, misalignment with overall strategy, and resistance to change within departments.

How can organizations ensure decisions in functional strategic planning are aligned with overall corporate strategy?

Organizations can ensure alignment by establishing clear communication channels, involving leadership in decision-making, and regularly reviewing departmental goals against strategic objectives.

Additional Resources

Functional strategic planning involves decisions related to: [A Deep Dive into Organizational Decision-Making](#)

In the complex and dynamic landscape of modern business, organizations are continually challenged to align their resources, capabilities, and objectives in a manner that ensures sustainable growth and competitive advantage. Among the various facets of strategic management, functional strategic planning stands out as a critical component that translates overarching corporate strategies into actionable plans within specific departments or functions. This investigative article explores the depths of functional strategic planning, focusing on the decisions it involves, its importance, and how organizations can effectively leverage it to achieve their long-term goals.

Understanding Functional Strategic Planning

Functional strategic planning is a process that involves developing detailed strategies within specific departments or functions—such as marketing, operations, finance, human resources, and research & development—that support the overall corporate strategy. It bridges the gap between high-level organizational objectives and operational activities, ensuring that each function contributes effectively to the company's mission and vision.

Unlike corporate-level strategic planning, which sets the broad direction, and business-level planning, which focuses on competitive positioning, functional planning zooms into the particulars of each department, addressing how they can best allocate resources, streamline processes, and develop capabilities to meet strategic objectives.

This process requires a series of critical decisions that influence daily operations, resource allocation,

organizational structure, and innovation initiatives. Understanding these decisions provides insight into how organizations maintain coherence across departments and adapt to external changes.

The Core Decisions in Functional Strategic Planning

Functional strategic planning involves a spectrum of decisions. While these decisions are specific to each function, they are interconnected within the broader strategic framework. Here, we examine the key areas of decision-making within each major function.

Marketing Function

The marketing function plays a pivotal role in positioning the organization within its target markets. Decisions include:

- Target Market Selection: Which customer segments should the organization prioritize? This involves analyzing market data, customer behaviors, and competitive landscapes to identify high-potential segments.
- Brand Positioning and Messaging: How should the brand be perceived? This includes developing value propositions, branding strategies, and communication channels.
- Marketing Mix (4Ps): Decisions regarding Product offerings, Pricing strategies, Promotion methods, and Place/distribution channels.
- Digital vs. Traditional Marketing: Choosing the appropriate mix of online and offline marketing tactics based on target demographics and resource availability.
- Marketing Budget Allocation: How much financial resource should be dedicated to various campaigns and initiatives?
- Customer Relationship Management: Strategies for engagement, loyalty programs, and after-sales service to retain customers.

Operations Function

Operational decisions directly impact efficiency, quality, and cost management:

- Process Design and Optimization: How should workflows be structured to maximize productivity? This includes selecting manufacturing processes, supply chain configurations, and service delivery methods.
- Capacity Planning: Determining production or service capacity to meet demand without excessive inventory or resource wastage.
- Quality Control Measures: Establishing standards and inspection procedures to ensure product or service

quality.

- Technology and Automation: Deciding on the adoption of new technologies, automation tools, and software to streamline operations.
- Supply Chain Management: Selecting suppliers, logistics partners, and inventory management systems.
- Sustainability Practices: Incorporating environmentally friendly practices into operations to meet regulatory requirements and corporate social responsibility goals.

Finance Function

Financial decisions underpin the organization's ability to fund initiatives and sustain operations:

- Budgeting and Forecasting: Developing financial plans that align with strategic priorities.
- Capital Investment Decisions: Choosing projects or assets to acquire or develop, considering ROI and strategic fit.
- Cost Management: Identifying areas for cost reduction without compromising quality or strategic objectives.
- Funding and Financing Strategies: Deciding on debt, equity, or internal funding sources.
- Risk Management: Implementing financial controls, hedging strategies, and contingency plans.
- Performance Measurement: Establishing financial KPIs to monitor progress and inform decision-making.

Human Resources Function

People are at the core of any organization; thus, HR decisions are vital:

- Talent Acquisition and Retention: Strategies for attracting, hiring, and retaining skilled employees.
- Training and Development: Planning skill development programs aligned with strategic needs.
- Compensation and Benefits: Designing packages that motivate performance while managing costs.
- Organizational Structure: Deciding on hierarchies, reporting lines, and team configurations.
- Employee Engagement and Culture: Initiatives to foster a positive work environment aligned with organizational values.
- Labor Relations and Compliance: Ensuring adherence to labor laws and managing unions or employee relations.

Research & Development (R&D) Function

Innovation is often a strategic differentiator; decisions include:

- Innovation Focus Areas: Identifying technologies or products to develop based on market needs and

organizational capabilities.

- Resource Allocation: Investing in R&D projects, labs, and personnel.
- Partnerships and Collaborations: Deciding on joint ventures, licensing, or external partnerships to accelerate innovation.
- Intellectual Property Management: Protecting patents, trademarks, and proprietary knowledge.
- Time-to-Market Strategies: Balancing the pace of development with quality and strategic importance.

Interdependence and Alignment of Decisions

While each function makes specific decisions, their effectiveness hinges on alignment with the overall corporate strategy and with each other. Misalignment can lead to resource wastage, conflicting priorities, and strategic drift.

For example, a decision by marketing to target a new customer segment must be supported by operations capacity, HR staffing, and R&D development of suitable products. Similarly, financial constraints may limit the scope of operational improvements or marketing campaigns.

Achieving harmony requires ongoing communication, strategic review processes, and adaptive planning mechanisms.

Strategic Decisions in the Context of External Environment

Functional decisions are also influenced by external factors such as market trends, technological advancements, regulatory changes, and competitive actions. Organizations must regularly scan their environment and adjust their functional strategies accordingly.

Key external considerations include:

- Market Dynamics: Consumer preferences, economic conditions, and emerging markets.
- Technological Change: Disruptive innovations that render existing products or processes obsolete.
- Regulatory Environment: Compliance requirements and legal constraints.
- Competitive Landscape: Actions by competitors that necessitate strategic responses at the functional level.

This external context underscores the importance of agility in functional strategic planning, enabling organizations to pivot when necessary.

Challenges in Making Functional Strategic Decisions

Despite its importance, functional strategic planning faces several challenges:

- Information Overload: Managing vast amounts of data to inform decisions.
- Siloed Operations: Departments working in isolation, leading to misaligned strategies.
- Resource Constraints: Limited budgets and personnel impacting decision scope.
- Rapid Change: Keeping pace with external environment shifts.
- Balancing Short-term and Long-term Goals: Ensuring immediate operational efficiency does not undermine future competitiveness.

Overcoming these challenges requires robust leadership, cross-functional collaboration, and a culture of continuous improvement.

Conclusion: The Significance of Strategic Decisions in Functionality

Functional strategic planning involves a comprehensive set of decisions that, collectively, determine an organization's capacity to realize its strategic vision. From marketing campaigns to supply chain logistics, financial investments, human resource policies, and R&D initiatives, these decisions shape operational excellence and competitive positioning.

Successful organizations recognize that effective functional decision-making is not isolated but integrated within a strategic framework that emphasizes alignment, agility, and responsiveness. As external environments become more volatile, the importance of deliberate, well-informed functional decisions grows, underscoring the need for organizations to invest in strategic planning capabilities at every level.

In sum, understanding the decisions involved in functional strategic planning provides organizations with the clarity and agility needed to navigate an increasingly complex business world and to sustain long-term success.

Functional Strategic Planning Involves Decisions Related To

functional strategic planning involves decisions related to: Comprehensive Textbook of Nursing Management and Leadership_1e - E-Book Nipin Kalal, 2025-04-11 • The textbook covers all the chapters outlined in the revised curriculum for the BSc Nursing programme. • The content presentation is organized with clear headings, bullet points and charts to enhance accessibility and understanding. • Diagrams, flowcharts and tables have been used to simplify intricate concepts for effortless reference. • Each chapter aligns with current healthcare regulations, safety guidelines and ethical standards in nursing management and leadership. • The book is beneficial for nursing students, educators and professionals at all levels who wish to enhance their leadership and management abilities. • End-of-chapter multiple choice questions, short- and long-answer questions assist students in preparing for competitive examinations. • It promises to enhance the administration capabilities of nurses in a variety of healthcare environments by incorporating the most recent research and evidence-based practices. • Appendix: Case-based discussions, formats, scenario-based learning and self-assessment exercises have been covered. Digital Resources • Complimentary access to MCQs, along with the e-book, is provided.

functional strategic planning involves decisions related to: Global Master of Strategic Leadership Administration & Management Dr MD USMAN CMgr DBA PhD MBA MSc LLM ITC, level-7, SLM level 7 & 8. PgDPR, PgDHE, 2025-06-22 Global Master of Strategic Leadership Administration & Management A comprehensive, professional, practical guide to leadership to become a top-tier leadership professional, covering all diploma levels (3, 4, 5, 7 & 8) and Q&A with samples. Assignment: Self-Study Handbook for Managers, Directors, Leaders keywords Strategic Leadership Global Business Leadership Development Innovation Digital Leadership Cultural Dynamics High-Performance Teams Business Strategy Conflict Management Financial Management Personal Branding Succession Planning Organizational Growth Professional Networks Data Analytics GLOBAL STRATEGIC LEADERSHIP MANAGEMENT is designed for a wide range of individuals striving to excel in leadership roles within the global business environment. This includes: Students: Seeking to understand the foundations of strategic leadership and management. Teachers: Looking to enrich their curriculum with practical insights into contemporary leadership challenges. functional strategic planning involves decisions related to: MANAGEMENT IT'S

PRINCIPLES & FUNCTIONS ABIR PRAMANIK, 2024-01-18 Management its principles and functions are designed to provide a contemporary and comprehensive Study of Management. It covers a wide range of relevant topics on how management works in an organization or business. It also includes sub-topics that justify the topics. It is an impromptu student-oriented book for those who are pursuing courses in commerce, management, and allied disciplines. It covers syllabi from CBSE Commerce to Post Graduate in Commerce or Post Graduate in Management or allied discipline. There are lots of day-to-day examples that justify different topics. The language used is easy to understand.

functional strategic planning involves decisions related to: Wiley CPA Exam Review 2012,

Business Environment and Concepts O. Ray Whittington, Patrick R. Delaney, 2011-12-06 Published annually, this comprehensive four-volume paperback reviews all four parts of the CPA exam. Many of the questions are taken directly from previous CPA exams. With 3,800 multiple-choice questions, these study guides provide all the information candidates need to master in order to pass the computerized Uniform CPA Examination.

functional strategic planning involves decisions related to: Wiley CPA Examination

Review, Outlines and Study Guides Patrick R. Delaney, O. Ray Whittington, 2011-07-05 Complete coverage of the new CBT-e format for the newly revised CPA Exam With 2011 bringing the greatest changes to the CPA exam in both form and content, Wiley CPA Exam Review 38th Edition is completely revised for the new CBT-e CPA Exam format. Containing more than 2,700 multiple-choice questions and including complete information on the new Task Based Simulations, these books provide all the information needed to pass the uniform CPA examination. Covers the new addition of IFRS material into the CPA exam Features multiple-choice questions, new AICPA Task Based Simulations, and written communication questions, all based on the new CBT-e format Covers all requirements and divides the exam into 45 self-contained modules for flexible study Offers nearly three times as many examples as other CPA exam study guides Published annually, this comprehensive two-volume paperback set provides all the information candidates need to master in order to pass the new Uniform CPA Examination format.

functional strategic planning involves decisions related to: Management of Marketing Paul

Reynolds, Geoff Lancaster, 2005-06-02 The text provides information on the core elements of the subject of marketing without the depth that often surrounds these to ensure that the basic concepts are easily identifiable and accessible. Students on MBA courses often do not have time to read a long text as they are studying many subjects, therefore they require a good, basic guide pitched at the appropriate level to be able to be absorbed quickly but still provide enough of a strategic element to stretch them. Written by a successful author team, Management of Marketing covers the key topics of the marketing component of an MBA course and provides a good balance of theory and application to ensure both aspects of the core concepts are covered.

functional strategic planning involves decisions related to: Principles of Marketing Gary

Armstrong, Stewart Adam, Sara Denize, Philip Kotler, 2014-10-01 The 6th edition of Principles of Marketing makes the road to learning and teaching marketing more effective, easier and more enjoyable than ever. Today's marketing is about creating customer value and building profitable customer relationships. With even more new Australian and international case studies, engaging real-world examples and up-to-date information, Principles of Marketing shows students how

customer value-creating and capturing it-drives every effective marketing strategy. The 6th edition is a thorough revision, reflecting the latest trends in marketing, including new coverage of social media, mobile and other digital technologies. In addition, it covers the rapidly changing nature of customer relationships with both companies and brands, and the tools marketers use to create deeper consumer involvement.

functional strategic planning involves decisions related to: *Production & Operations Management* Upendra Kachru, 2009 This book takes a pedagogical approach that is participative and interactive, involving the case study method of learning. Chapters start with an Indian case study of a well known company. This is used as a capstone case for the chapter. The student will find this an easy learning experience as data and additional information for these enterprises is readily available. The selection of such cases makes classroom learning truly suited to the Indian business environment. The value driven approach to Operations Management is used in structuring the text into three modules. The first module discusses the infrastructure function of Operations Management. Infrastructure function is considered to be product, process, capacity and location. Module Two describes the structure of the operations function. This includes quality and other product transformation processes. Module Three focuses on the organization, people and processes i.e. the job, the work, and the workplace. In addition, most of the mathematical techniques have been separated into supplements attached to the relevant chapters. Software solutions for the techniques have been explained in the text. Every mathematical technique is exemplified with a number of solved problems. Unlike many Production and Operations Management texts, this book covers E-commerce, Industrial Safety, Maintenance, Environmental Management (Green Productivity) and new technological trends in the discipline. These sections should add to the significance of exploring how firms can gain competitive advantage and promote sustainable development at the same time. The last section of the book comprises of a selection of cases from The Indian Institute of Management at Ahmedabad. The cases encompass the entire spectrum of Indian Industry the private and the public sectors, professional and family managed business organizations, service and manufacturing industries, single industry and conglomerates. The cases relate to Operations Strategy, Supply Chain Management, Capacity Planning, New Products, Manufacturing Technologies, etc. The Case Studies are of world class. Prof. Tirupati, one of the authors of the case studies, according to Management Science, has penned one of the top 100 management articles in the 50 years. The book is comprehensive, lucid and easy to read and understand. It should be of great value both to students and faculty.

functional strategic planning involves decisions related to: Retail Category Management Alexander Hübner, 2011-08-30 Retail shelf management means cost-efficiently aligning retail operations with consumer demand. As consumers expect high product availability and low prices, and retailers are constantly increasing product variety and striving towards high service levels, the complexity of managing retail business and its operations is growing enormously. Retailers need to match consumer demand with shelf supply by balancing variety (number of products) and service levels (number of items of a product), and by optimizing demand and profit through carefully calibrated prices. As a result the core strategic decisions a retailer must make involve assortment sizes, shelf space assignment and pricing levels. Rigorous quantitative methods have emerged as the most promising solution to this problem. The individual chapters in this book therefore focus on three areas: (1) combining assortment and shelf space planning, (2) providing efficient decision support systems for practically relevant problem sizes, and (3) integrating inventory and price optimization into shelf management.

functional strategic planning involves decisions related to: The Strategic Management of Health Care Organizations Peter M. Ginter, W. Jack Duncan, Linda E. Swayne, 2018-01-16 A comprehensive guide to effective strategic management of health care organizations. Strategic Management of Health Care Organizations provides essential guidance for leading health care organizations through strategic management. This structured approach to strategic management examines the processes of strategic thinking, consensus building and documentation of that thinking

into a strategic plan, and creating and maintaining strategic momentum – all essential for coping with the rapidly evolving health care industry. *Strategic Management of Health Care Organizations* fully explains how strategic managers must become strategic thinkers with the ability to evaluate a changing industry, analyze data, question assumptions, and develop new ideas. The book guides readers through the strategic planning process demonstrating how to incorporate strategic thinking and create and document a clear and coherent plan of action. In addition, the all-important processes of creating and maintaining the strategic momentum of the organization are fully described. Finally, the text demonstrates how strategic managers in carrying out the strategic plan, must evaluate its success, learn more about what works, and incorporate new strategic thinking into operations and subsequent planning. This strategic management approach has become the de facto standard for health care management as leadership and strategic management are more critical than ever in coping with an industry in flux. This book provides health care management students as well as health care administrators with foundational guidance on strategic management concepts and practices, tailored to the unique needs of the health care industry. Included are a clear discussion of health services external analysis, organizational internal analysis, the development of directional strategies, strategy alternative identification and evaluation, and the development and management of implementation strategies providing an informative and insightful resource for anyone in the field. This new eighth edition has been fully updated to reflect new insights into strategic thinking, new methods to conceptualize and document critical environmental issues, practical steps for carrying out each of the strategic management processes, industry and management essentials for strategic thinkers, and new case studies for applying the strategic management processes. More specifically, readers of this edition will be able to: Create a process for developing a strategic plan for a health care organization. Map and analyze external issues, trends, and events in the general environment, the health care system, and the service area. Conduct a comprehensive service area competitor analysis. Perform an internal analysis and determine the competitive advantages and competitive disadvantages. Develop directional strategies. Identify strategic alternatives and make rational strategic decisions for a health care organization. Develop a comprehensive strategy for a health care organization. Create effective value-adding service delivery and support strategies. Translate service delivery and support plans into specific action plans. The health care industry's revolutionary change remains ongoing and organizational success depends on leadership. Strategic management has become the single clearest manifestation of effective leadership of health care organizations and the strategic management framework's strengths are needed now more than ever. *The Strategic Management of Health Care Organizations* provides comprehensive guidance and up-to-date practices to help leaders keep their organizations on track.

functional strategic planning involves decisions related to: Principles of Leadership and Management in Law Enforcement Michael L. Birzer, Gerald J. Bayens, Cliff Roberson, 2012-06-18 Effective police organizations are run with sound leadership and management strategies that take into account the myriad of challenges that confront today's law enforcement professionals. *Principles of Leadership and Management in Law Enforcement* is a comprehensive and accessible textbook exploring critical issues of leadership within police agencies.

functional strategic planning involves decisions related to: The Changing Organization Kaijun Guo, Maurice Yolles, Gerhard Fink, Paul Iles, 2016-11-10 *The Changing Organization* provides a multidisciplinary approach for studying the management of change under conditions of complexity. Single-discipline approaches frequently miss essential elements that reduce the possibility of coherence within a multi-agency organizational setting. Combining a systems and cybernetic 'living system' perspective, Guo, Yolles, Fink, and Iles offer a new agency paradigm designed to model, diagnose and analyse complex, real-world situations. Its capacity to anticipate patterns of behaviour provides useful means by which the origin of crises can be understood, and resolutions reflected upon. Scholars and graduate students in fields as diverse as management, politics, anthropology and psychology will find numerous applications for this book when considering socio-political and organizational change, and it offers an invaluable guide for

consultants who may wish to apply advanced techniques of contextual analysis to real-world situations.
