smc textbooks: Sliding Mode Control of Uncertain Parameter-Switching Hybrid Systems Ligang Wu, Peng Shi, Xiaojie Su, 2014-05-27 In control theory, sliding mode control (SMC) is a nonlinear control method that alters the dynamics of a nonlinear system by application of a discontinuous control signal that forces the system to slide along a cross-section of the system's normal behaviour. In recent years, SMC has been successfully applied to a wide variety of practical

engineering systems including robot manipulators, aircraft, underwater vehicles, spacecraft, flexible space structures, electrical motors, power systems, and automotive engines. Sliding Mode Control of Uncertain Parameter-Switching Hybrid Systems addresses the increasing demand for developing SMC technologies and comprehensively presents the new, state-of-the-art sliding mode control methodologies for uncertain parameter-switching hybrid systems. It establishes a unified framework for SMC of Markovian jump singular systems and proposes new SMC methodologies based on the analysis results. A series of problems are solved with new approaches for analysis and synthesis of switched hybrid systems, including stability analysis and stabilization, dynamic output feedback control, and SMC. A set of newly developed techniques (e.g. average dwell time, piecewise Lyapunov function, parameter-dependent Lyapunov function, cone complementary linearization) are exploited to handle the emerging mathematical/computational challenges. Key features: Covers new concepts, new models and new methodologies with theoretical significance in system analysis and control synthesis Includes recent advances in Markovian jump systems, switched hybrid systems, singular systems, stochastic systems and time-delay systems Includes solved problems Introduces advanced techniques Sliding Mode Control of Uncertain Parameter-Switching Hybrid Systems is a comprehensive reference for researchers and practitioners working in control engineering, system sciences and applied mathematics, and is also a useful source of information for senior undergraduate and graduates studying in these areas.

smc textbooks: The Shias of Pakistan Andreas Rieck, 2016-01-15 The Shias of Pakistan are the world's second largest Shia community after that of Iran, but comprise only 10-15 per cent of Pakistan's population. In recent decades Sunni extremists have increasingly targeted them with hate propaganda and terrorism, yet paradoxically Shias have always been fully integrated into all sections of political, professional and social life without suffering any discrimination. In mainstream politics, the Shia-Sunni divide has never been an issue in Pakistan. Shia politicians in Pakistan have usually downplayed their religious beliefs, but there have always been individuals and groups who emphasised their Shia identity, and who zealously campaigned for equal rights for the Shias wherever and whenever they perceived these to be threatened. Shia 'ulama' have been at the forefront of communal activism in Pakistan since 1949, but Shia laymen also participated in such organisations, as they had in pre-partition India. Based mainly on Urdu sources, Rieck's book examines, first, the history of Pakistan's Shias, including their communal organisations, the growth of the Shia 'ulama' class, of religious schools and rivalry between orthodox ulama and popular preachers; second, the outcome of lobbying of successive Pakistan governments by Shia organisations; and third, the Shia-Sunni conflict, which is increasingly virulent due to the state's failure to combat Sunni extremism.

smc textbooks: Education, Social Progress, and Marginalized Children in Sub-Saharan

Africa Obed Mfum-Mensah, 2017-05-04 This book employs sociohistorical, narrative, and discourse frameworks to discuss the sociopolitical complexities and ambiguities of educating marginalized groups in sub-Saharan Africa since western education was introduced in the region. It outlines the systemic and structural challenges faced by marginalized children in the education system that prevent them from fully participating in the education process. This book focuses on how the props underlying Christian missionary education, colonial education, and early postcolonial educational enterprise all served to marginalize certain groups, including women, some geographical regions and/or communities, such as Islamic communities and people with disabilities, from the colonial and postcolonial economic discourses. This historical background provides the springboard for discussions on the complexities and ambiguities of educating marginalized groups in some communities in sub-Saharan Africa in the contemporary times. This book also highlights the challenges of the recent policies of policy makers and the strategies and initiatives of civic societies, non-governmental organizations, and local communities to promote marginalized children's participation in education. This book elucidates the varied ways certain groups and communities continue to interrogate the structural and systemic challenges that marginalize them educationally. It argues that the level of marginalized groups' participation in education in sub-Saharan African in the 21st century will determine the progress the region will make in the Education for All (EFA) initiative and the Millennium Development Goals (MDG). Furthermore, it argues that increasing educational participation in marginalized communities requires implementation of educational programs that address marginalized groups' structural social arrangements and socioeconomic contexts.

smc textbooks: *Comparative Analysis on Universal Primary Education Policy and Practice in Sub-Saharan Africa*, 2015-01-01 Achieving Universal Primary Education (UPE) has received considerable attention since the early 1950s. The concept of universal education is, however, not well defined and is used to mean many different things to different people. This book contains a five-year research work conducted by a group of African and Japanese researchers who have developed an equal partnership and network to review the expansion of primary education, some policies prompting the free primary education intervention, and the challenges of implementation based on the case study of two districts in four countries, namely, Ghana, Kenya, Malawi, and Uganda. The first part discusses issues related to administrative, financial, and perceptive issues related to UPE policies in each country case, followed by the second part that focuses on quality of education and UPE policies. The book contains various lessons learnt and implications for future education policies in developing countries.

Over 250 origin texts, sourced from dozens of linguistic, anthropological, historical, and mythological corpora as well as other publications have been collated and analysed rendering the present literary survey far more comprehensive than any prior study on this subject. Over 100 Formosan myths, many of which were never previously available in English have been translated here for the first time. In the absence of longstanding traditional orthographical records, the Austronesian tribes that inhabit the island of Taiwan have relied on the transmission of oral literatures for the preservation of historical events since the dawn of time. The earliest historical events that are still recited by tribal elders relate to the origins of the gods and first ancestors of mankind. This anthology continues the tradition of collecting and transcribing these myths for everyone interested in the corpus of literature from Taiwan's aboriginal peoples.

smc textbooks: *Moonwalker* Alan Rowan, 2014-05-15 Moonwalker is a unique story, the memoir of a man whose love of Scotland's mountains would override his body-clock and all conventional notions of health and safety. When Alan Rowan finished his shifts as a sub-editor at a national newspaper at midnight, he knew he was too jacked up on deadline adrenaline to attempt sleep. At the same time, he was starting to worry if he would ever complete his ambition to reach the summit of every Munro in Scotland those peaks of over 3000ft. One crazy night, he decided upon a single solution to both problems. He would begin his ascents in the middle of the night, see the sun rise above the clouds and then come down the mountain just as everyone else was going up. We see Alan's transformation from desk jockey to midnight mountaineer, meet dodgy car salesmen, rabid sheepdogs, charging deer, superstitious Germans and crooked confectioners - all the while seeing the best of Scotland in a unique light. Moonwalker is funny and touching; at once a deeply personal memoir and a riotous travelogue.
