Active recall helps reinforce memory and identify weak areas.

sociology 101 final exam: *My Brother Tom* James J. Ware, James J. Ware Jr, 2008-04 This biography of Thomas E. Ware covers (78) years of relentless struggle for achievement and success in a segregated society on the streets of Washington D.C. Starting in 1929 and ending in 2007. As his younger brother I was blessed to grow up with him and watch him skillfully work his way through numerous Jim Crow policies, educational barriers, adversity and police intimidation. (Excerpts from passages in the book) Chap. 5 During the 1930's 1201 was a land mark stop over point for family members migrating from the south. At one point I counted five families with twenty-three people living in our four bedroom home, I slept in the bathroom tub. While others slept on floor pallets. Chap.3 The highlight of our corner experience was the appearance of the local police. As they got closer to our group some one would yell police and we would scatter and hide. After passing us, some one would yell all clear, and we would return. One day, Tom said we have not done anything wrong, why should we run every time we see a policeman? I'm not going to run anymore! Nervously, I sat with him. Chap. 1 When we were little guys, I remember Tom telling me There is no Santa

Claus. This is all a game, but I want my toys on Christmas Day. I said yes there is a Santa Claus, look at all the toys he brought us last year. Tom said; alright tell me how a group of reindeer can fly through the air with no engine power or wings? And how can Santa bring toys to all the kids on our block in his small sled, and how can a big fat Santa slide down our small chimney? We decided to wait up for Santa on Christmas Eve. Finally we say our parents placing toys under the tree for us. We knew then that our parents were Santa Claus. We still rejoiced on Christmas morning. I am pleased that my survival in life is attributed to the life goals that he set for himself, but I followed. His inner strength, tenacity, and visionary leadership were helpful to many people whose lives he touched. He was a courageous, remarkable man. James J. Ware Jr.

sociology 101 final exam: Comparative Sociology of Examinations Fumiya Onaka, 2019-03-28 Contemporary societies are constructed, constricted, and constrained by various series of examinations. Governments of both Western and non-Western countries tend to conduct detailed, multi-layered and continuous systems of tests or examinations. International tests, such as PISA and TIMSS, have also been introduced to compare the relative performances of learners within diverse educational institutions across different countries. Examinations therefore provide a methodological pivot for comparing a range of societies. They enable us to contrast the West and the East; the North and the South; tribal and mass society; ancient and postmodern civilization; and so on. Comparing parallel societies from across Asia, the Middle East, Europe, and North America, this book proposes fundamental transitions in sociological research from system to process and from communication to composition through intensive studies on examinations. It uses ethnographies, interviews, questionnaires, documents, statistics, and big-data analyses to make comparisons on broad scales of time and space. In so doing, it suggests hypotheses encompassing different kinds of societies in human history, including those in the Axial Age and the Modern Ages.

sociology 101 final exam: *Rivalry and Reform* Sidney M. Milkis, Daniel J. Tichenor, 2019-01-25

Few relationships have proved more pivotal in changing the course of American politics than those between presidents and social movements. For all their differences, both presidents and social movements are driven by a desire to recast the political system, often pursuing rival agendas that set them on a collision course. Even when their interests converge, these two actors often compete to control the timing and conditions of political change. During rare historical moments, however, presidents and social movements forged partnerships that profoundly recast American politics. *Rivalry and Reform* explores the relationship between presidents and social movements throughout history and into the present day, revealing the patterns that emerge from the epic battles and uneasy partnerships that have profoundly shaped reform. Through a series of case studies, including Abraham Lincoln and abolitionism, Lyndon Johnson and the civil rights movement, and Ronald Reagan and the religious right, Sidney M. Milkis and Daniel J. Tichenor argue persuasively that major political change usually reflects neither a top-down nor bottom-up strategy but a crucial interplay between the two. Savvy leaders, the authors show, use social movements to support their policy goals. At the same time, the most successful social movements target the president as either a source of powerful support or the center of opposition. The book concludes with a consideration of Barack Obama's approach to contemporary social movements such as Black Lives Matter, United We Dream, and Marriage Equality.

Miller, 2005-03-15 In 1987, the U.S. Congress established the Malcolm Baldrige National Quality Award program to raise awareness about the importance of quality and performance excellence as a competitive edge. Since 1999, the program has outlined criteria for educational institutions to align

their mission, values, goals, processes, and resources into a comprehensive, long-term, systematic improvement effort. The book profiles six unique institutions that have successfully implemented these criteria: the Montfort College of Business at the University of Northern Colorado, National University, New Mexico State University-Carlsbad, Northwest Missouri State University, University of Wisconsin-Stout, and Western Wisconsin Technical College. The University of Wisconsin-Stout was the first higher education institution to win the Baldrige Award in 2001, and has since worked with educational institutions in 39 states and 25 countries that are interested in implementing quality improvement through the application of the Baldrige criteria. This book will appeal to academic administrators at all levels and at all types of institutions who are interested in applying a systematic approach to leadership, quality improvement, and change management within their institutions--Unedited summary from book cover.
