Sample SOHCAHTOA Practice Problem with Solution

To illustrate, here's a typical problem you might find on a SOHCAHTOA worksheet with answers PDF:

Problem:

In a right triangle, the length of the side opposite angle A is 7 cm, and the hypotenuse is 25 cm. Find the value of $\sin A$ and $\cos A$.

Solution:

Using sine:

$$\sin A = \text{Opposite} / \text{Hypotenuse} = 7 / 25 = 0.28$$

Using cosine:

First, find the adjacent side using Pythagoras:

$$\text{adjacent} = \sqrt{(\text{hypotenuse}^2 - \text{opposite}^2)} = \sqrt{(25^2 - 7^2)} = \sqrt{(625 - 49)} = \sqrt{576} = 24$$

$$\text{Now, } \cos A = \text{Adjacent} / \text{Hypotenuse} = 24 / 25 = 0.96$$

Answer:

$$\sin A = 0.28$$

$$\cos A = 0.96$$

This type of problem, along with detailed solutions, is typically included in a SOHCAHTOA worksheet with answers PDF to help students learn effectively.
