welcome speech for graduation ceremony: Christianity and the University Experience Mathew Guest, Kristin Aune, Sonya Sharma, Rob Warner, 2013-09-12 What impact does the experience of university have on Christian students? Are universities a force for secularisation? Is student faith enduring, or a passing phase? Universities are often associated with a sceptical attitude towards religion. Many assume that academic study leads students away from any existing

religious convictions, heightening the appeal of a rationalist secularism increasingly dominant in wider society. And yet Christianity remains highly visible on university campuses and continues to be a prominent identity marker in the lives of many students. Analysing over 4,000 responses to a national survey of students and nearly 100 interviews with students and those working with them, this book examines Christianity in universities across England. It explores the beliefs, values and practices of Christian students. It reveals how the university experience influences their Christian identities, and the influence Christian students have upon university life. Christianity and the University Experience makes fascinating reading for anyone interested in the survival and evolution of religion in the contemporary world. It offers fresh insights relevant to those working with Christian students, including churches, chaplaincies and student organisations, as well as policy-makers and university managers interested in the significance of religion for education, social responsibility and social cohesion.

welcome speech for graduation ceremony: *Higher Education and Social Mobility in France* Shirin Shahrokni, 2020-12-30 This book offers an in-depth sociological exploration of the social trajectories and experiences of children of post-colonial immigrants in France who are embarking on paths of extreme upward intergenerational mobility. The author draws on life history interviews with young adults of North African immigrant background, enrolled at or having recently graduated from the country's elite higher education institutions, the grandes écoles, to delve into largely under-researched pathways and give a voice to high-achieving members of a population that continues to be collectively associated with difficulties to 'integrate'. The volume constitutes the first sociological study to document, from the individual actor's perspective, the everyday experience of racism within France's elite educational institutions and to reveal the upward mobility experience to be informed by the interlocking effects of racial processes, immigrant ancestry, class background, and gender. Challenging the pervasive representation of descendants of North African immigrants as 'unsuccessful' and 'unable to integrate', this book sheds light on the experiences of the largely silent upwardly mobile members of a stigmatized minority group, revealing the strategies used to respond to the constraints to their mobility and the importance of familial histories of post-colonial migration, characterized by the former generation's efforts, sacrifices, and resilience, in informing these 'success stories'.

welcome speech for graduation ceremony: Reflection Keith Melo, 2025-01-14 The Ryukyu Islands, a center of diverse cultures, have absorbed martial arts techniques from various nations, giving birth to the distinctive and deadly Okinawan martial arts. This fusion, a product of centuries of trade and cultural exchange, has created a unique style forbidden for use except in self-defense. However, the question arises as to whether this tradition still holds relevance in Japan's current occupation of the island, especially in light of the Meiji Restoration. Ironically, Master Kyoshi of the prestigious Kyoshi School of Okinawan Martial Arts stands accused of using this sacred technique for murder. Is there a motive behind his actions, or could someone else from his school, who learned the deadly method of ending someone's life from the same institution, be involved?

Along with *The Avengers*, Whedon's contributions to the cinematic Universe include: script doctoring the first *X-Men* film, writing a ground-shaking *Wonder Woman* screenplay, and co-creating ABC's *Agents of S.H.I.E.L.D.* Today, Whedon continues the *Buffy* and *Firefly* stories with innovative comics that shatter the rules of storytelling and force his characters to grow through life-altering conflicts. This collection of new essays focuses on Whedon's comics work and its tie-ins with his film and television productions, emphasizing his auteurism in crossing over from panel to screen to panel.
