and radical potential that fundamentally challenges the damaging ideologies and socializing influence of fairy tales. *The Feminist Architecture of Postmodern Anti-Tales: Space, Time and Bodies* highlights how anti-*tales* take up timely debates about revising old structures, opening our minds up to a broader spectrum of experience or ways of viewing the world and its inhabitants. They show us alternative architectures for the future by deconstructing established spatio-temporal laws and structures, as well as limited ideas surrounding the body, and ultimately liberate us from the shackles of a single-minded and simplistic masculine reality currently upheld by dominant social forces and patriarchal fairy tales themselves. It is only when these masculine fairy tales and social architectures are deconstructed that new, more inclusive feminine realities and futures can be brought into being.

**cinder pdf:** The Impact of eConveyancing on Title Registration Gabriel Brennan, 2014-11-07 This work is an assessment of how to manage risk in property transactions in the context of the move from paper-based to electronic conveyancing (eConveyancing). In particular the focus is on risks that impact on title registration, and the security, protection or lack thereof that this registration offers to land owners, third parties and property claimants. The impact is the extent to which a change in the transactional process may unintentionally affect risk (being the consequence of change and the likelihood of that consequence having a negative effect). The risks are identified, analysed and evaluated against the backdrop of title registration and the development of eConveyancing through a comparative analysis of the systems in Ireland and Ontario, while also referencing other developing electronic systems around the globe.
