foundations of financial management pdf free download: **Islamic Microfinance** Hussain Mohi ud Din Qadri, Hassnain Ali, 2024-05-20 Islamic microfinance is one of the most important sectors of Islamic social finance, which plays a very important role in curbing poverty and improving the standard of living, per capita income, employment level as well as achieving Maqasid al-Shariah, profitability and sustainability. This role of Islamic microfinance has become more crucial in the pandemic period. It has been clearly witnessed in developing countries such as Pakistan and Bangladesh, how Islamic microfinance institutions helped deprived and affected communities during the pandemic. Another important development during the pandemic was the introduction of blended models of Islamic microfinance such as waqf-based Islamic microfinance, a zakat-based model and the combination of Islamic commercial and social finance. Islamic microfinance institutions also aim to harness the power of digitalization and fintech, but they need to consider the necessary success factors to realize and gain the real benefits of technology. There are some major challenges related to regulations, management issues, lack of skilled human resources, a wide digital divide and low level of financial literacy in developing countries. These challenges need to be addressed to ensure stability, steady growth and sustainability in the sector. This book is a compendium on Islamic microfinance, including case studies from seven jurisdictions and prospects for the sector. The book will be a major contribution to the literature of Islamic economics and finance and a guide of equal importance for students, academics, institutions, regulators, fintechs, policy makers and the general public.

foundations of financial management pdf free download: Assessing Risk Assessment Christian Hugo Hoffmann, 2017-11-14 Christian Hugo Hoffmann undermines the citadel of risk assessment and management, arguing that classical probability theory is not an adequate foundation for modeling systemic and extreme risk in complex financial systems. He proposes a new class of models which focus on the knowledge dimension by precisely describing market participants' own positions and their propensity to react to outside changes. The author closes his thesis by a synthetical reflection on methods and elaborates on the meaning of decision-making competency in a risk management context in banking. By choosing this poly-dimensional approach, the purpose of his work is to explore shortcomings of risk management approaches of financial institutions and to point out how they might be overcome.
