isoprep training: Invited to a War Alan Reed, 2022-09-21 The life of Air Vice-Marshal Alan Reed AO is one that could read like a 'boy's own adventure'. From humble beginnings as a National Service trainee in Perth in 1952, Alan's career took him all the way to the rank of Air Vice-Marshal and in command of over 12,000 people within the RAAF Support Command organisation. Along the way Alan flew a wide variety of RAAF aircraft, including the maritime version of the Lincoln, the Canberra bomber, the F-4E Phantom and the F-111. His experiences included fortuitously being removed from a doomed Lincoln flight that crashed into Mt Superbus in South-East Queensland, a 24-day around the world trip in a Canberra formation, and his opportunities to fly both the Phantom and the F-111C in RAAF service. Alan was also privileged to be one of only six RAAF pilots to fly Phantoms on exchange with the USAF during the Vietnam War, where he flew over 100 reconnaissance missions during a 179 temporary duty assignment, receiving the USAF Distinguished Flying Cross. Alan passed away on 24 July 2021, not before he had the chance to reminisce with many of his compatriots at the Air Force's centenary commemorations on 31 March 2021. This book draws upon the content of Alan's autobiography, also entitled Invited to a War, and presents the episodes of Alan's life in the RAAF. It tells the story of a man who dedicated his life to the RAAF and, despite the highs and lows of any service career, never lost his passion for flying.

[THE CORRECT VERSION OF THIS EBOOK IS NOW AVAILABLE TO DOWNLOAD.] On the night of March 24, 1999, NATO forces began military action to stop Serbia's campaign of repression during the Kosovo War. Initially planned to be a 72-hour operation, it took 78 days of sustained air warfare for Operation Allied Force to cause Slobodan Milosevic to withdraw his forces. Despite such setbacks as the loss of an F-117 stealth fighter and the bombing of the Chinese embassy in Belgrade, Allied Force ended with perhaps the most complete airpower victory of modern times. However, there is a dearth of written histories on NATO's air war over Kosovo. In this book Dr Brian D. Laslie, one of the leading scholars of modern air power operations, offers a complete history of the campaign, based on a wide range of primary and secondary sources. Although predominantly a USAF effort, the campaign also featured multinational contributions as well as significant naval aviation. Using spectacular original battlescenes, maps and 3D diagrams, Dr Laslie examines the aircraft, weapons and doctrine used, the Serbian air defenses, how the Allied forces planned and launched their air campaign, and how NATO had to rapidly adapt its initial plans to achieve success.
