kristen stories archives: *Legal Stories* Gregory Steirer, 2024-07-01 Tracing the emergence of what the media industries today call transmedia, story worlds, and narrative franchises, *Legal Stories* provides a dual history of copyright law and narrative-based media development between the Copyright Act of 1909 and the Copyright Act of 1976. Drawing on archival material, including legal case files, and employing the principles of actor-network theory, Gregory Steirer demonstrates how the meaning and form of narrative-based property in the twentieth century was integral to the letter and practice of intellectual property law during this time. Steirer's expansive view of intellectual property law encompasses not only statutes and judicial opinions, but also the everyday practices and productions of authors, editors, fans, and other legal laypersons. The result is a history of the law as improvisatory and accident-prone, taking place as often outside the courtroom as inside, and shaped as much by laypersons as lawyers. Through the examination of influential legal disputes involving early properties such as Dashiell Hammett's *Sam Spade*, H. P. Lovecraft's *Cthulhu Mythos*, and Robert E. Howard's *Conan the Barbarian*, Steirer provides a ground's eye view of how copyright law has operated and evolved in practice.

kristen stories archives: *Archives and Emotions* Ilaria Scaglia, Valeria Vanesio, 2024-11-14 *Archives and Emotions* argues, at its most fundamental level, that emotions matter and have always mattered to both the people whose histories are documented by archives and to those working with the documents these contain. This is the first study to put archivists and historians-scholars and practitioners from different settings, geographical provenance, and stages of career-in conversation with one another to examine the interplay of a broad range of emotions and archives, traditional and digital, from the eighteenth to the twenty-first centuries across national and disciplinary borders. Drawing on methodologies from the history of emotions and critical archival studies, this book provides an original analysis of two interconnected themes through a selected number of case studies: the emotional dynamics affecting the construction and management of archives; and the emotions and their effects on the people engaging with them, such as archivists, researchers, and a broad range of communities. Its main message is that critically investigating the history and mechanics of emotions-including their suppression and exclusion-also being conscious of their effects on people and societies is essential to understanding how archives came to hold deep civic and ethical implications for both present and future. This study thus establishes a solid base for future scholarship and interdisciplinary collaborations and challenges academic and non-academic readers to think, work, and train new generations differently, fully aware that past and present choices have-and might again-hurt, inspire, empower, or silence.

kristen stories archives: *Stories of Our Living Ephemera* Emily Legg, 2023-12-15 *Stories of Our Living Ephemera* recovers the history of the Cherokee National Seminaries from scattered archives and colonized research practices by critically weaving together pedagogy and archival artifacts with Cherokee traditional stories and Indigenous worldviews. This unique text adds these voices to writing studies history and presents these stories as models of active rhetorical practices of assimilation resistance in colonized spaces. Emily Legg turns to the Cherokee medicine wheel and

cardinal directions as a Cherokee rhetorical discipline of knowledge making in the archives, an embodied and material practice that steers knowledge through the four cardinal directions around all relations. Going beyond historiography, Legg delineates educational practices that are intertwined with multiple strands of traditional Cherokee stories that privilege Indigenous and matriarchal theoretical lenses. *Stories of Our Living Ephemera* synthesizes the connections between contemporary and nineteenth-century academic experiences to articulate the ways that colonial institutions and research can be Indigenized by centering Native American sovereignty. By undoing the erasure of Cherokee literacy and educational practices, *Stories of Our Living Ephemera* celebrates the importance of storytelling, especially for those who are learning about Indigenous histories and rhetorics. This book is of cultural importance and value to academics interested in composition and pedagogy, the Cherokee Nation, and a general audience seeking to learn about Indigenous rhetorical devices and Cherokee history.

kristen stories archives: *The Drama of Social Life* Charles Edgley, 2016-03-23 Whatever else they may be doing, human beings are also and always expressing themselves whenever they are in the awareness of others. As such, the metaphor of life as theater - of people playing roles to audiences who review them and then coordinate further action - is an ancient idea that has been resurrected by social scientists as an organizing simile for the analysis and understanding of social life. *The Drama of Social Life* examines this dramaturgical approach to social life, bringing together the latest original work from leading contemporary dramaturgical thinkers across the social sciences. Thematically organized, it explores: ¢ the work of classical and contemporary thinkers who have contributed most to this theoretical framework ¢ the foundational concepts of the dramaturgical approach ¢ a rich array of substantive areas of empirical investigation to which dramaturgy continues to contribute ¢ directions for future dramaturgical thinking. An indispensable collection that updates and extends the dramaturgical framework, *The Drama of Social Life* will appeal to scholars and students of sociology, social psychology, performance studies, cultural studies, communication, film studies, and anthropology - and all those interested in the work of Goffman and symbolic interactionist theory and practice.

kristen stories archives: *Absent the Archive* Lia Brozgal, 2020-11-04 *Absent the Archive* is the first cultural history devoted to literary and visual representations of the police massacre of peaceful Algerian protesters. This corpus, or anarchive, includes a variety of cultural texts whose formal, diegetic, and discursive strategies represent the massacre and its erasure, its "becoming invisible," and its afterlives as a trace, a memory, a sign.

kristen stories archives: *Media Matter* Francisca Comas Rubí, Karin Priem, Sara González Gómez, 2021-11-22 This volume discusses a broad range of themes and methodological issues around images, photography and film. It is about sharing a fascination about the visual history of education and how images became the most influential (circulating) media within the field of education on local, regional, national and international levels. Within this volume images are primarily analyzed as presenters, mediators, and means of observation. Images are seen as mobile reproducible media which play an active role within the public and educational sphere. They are means of observation and storytelling, they shape identities by presenting models of how we should act in and perceive the world, they circulate through different contexts and media, all of which impacts their meanings.

kristen stories archives: *International Women Artists and War, 1560-2023* Deborah A. Deacon, 2024-09-25 Like many of their male peers, women artists have used their chosen mediums to explore and express their reactions to the violence of war, which they frequently experienced firsthand. The 345 named artists discussed in this book come from diverse backgrounds across hundreds of years. The book divides the 652 covered works of art into five general categories: those that provide support for the war effort, those that oppose war and/or support peace, those that document the impacts of war on the individuals who fight and the civilians who experience it, those that commemorate and memorialize the events and participants in war, and general representations of

those who fight. While most of the women who documented the impact of war on those who experienced it were professional artists, self-taught artists have told equally compelling stories in their works. Whether working in a studio or on the battlefield, the women's professionalism and dedication allowed them to convey the impact of war powerfully.

kristen stories archives: *The New Art Museum Library* Amelia Nelson, Traci E. Timmons, 2021-04-15 The New Art Museum Library addresses the issues facing today's art museum libraries through a series of scholarly essays written by top librarians in the field. In 2007, the publication, *Art Museum Libraries and Librarianship*, edited by Joan Benedetti, was the first to solely focus on the field of art museum librarianship. In the decade since then, many changes have occurred in the field--both technological and ideological--prompting the need for a follow-up publication. In addition to representing current thinking and practice, this new publication also addresses the need to clearly articulate and define the art museum library's value within its institution. It documents the broad changes in the environment that art museum libraries now function within and to celebrate the many innovative initiatives that are flourishing in this new landscape. Librarians working in art museum face unique challenges as museums redefine what object-based, visitor-centric learning looks like in the 21st century. These unique challenges mean that art museum libraries are developing new strategies and initiatives so that they can continue to thrive in this environment. The unique nature of these initiatives mean that they will be useful to librarians working in a wide range of special libraries, as well as more broadly in academic and public libraries. The New Art Museum Library is uniquely positioned to present new strategies and initiatives including digital art history initiatives, the new norms in art museum library staffing, and the public programming priorities that are core to many art museum libraries today. This book is an endorsed project of ARLIS/NA.

kristen stories archives: *The Archive Effect* Jaimie Baron, 2013-12-13 *The Archive Effect: Found Footage and the Audiovisual Experience of History* examines the problems of representation inherent in the appropriation of archival film and video footage for historical purposes. Baron analyses the way in which the meanings of archival documents are modified when they are placed in new texts and contexts, constructing the viewer's experience of and relationship to the past they portray. Rethinking the notion of the archival document in terms of its reception and the spectatorial experiences it generates, she explores the 'archive effect' as it is produced across the genres of documentary, mockumentary, experimental, and fiction films. This engaging work discusses how, for better or for worse, the archive effect is mobilized to create new histories, alternative histories, and misreadings of history. The book covers a multitude of contemporary cultural artefacts including fiction films like *Zelig*, *Forrest Gump* and *JFK*, mockumentaries such as *The Blair Witch Project* and *Forgotten Silver*, documentaries like *Standard Operating Procedure* and *Grizzly Man*, and videogames like *Call of Duty: World at War*. In addition, she examines the works of many experimental filmmakers including those of Péter Forgács, Adele Horne, Bill Morrison, Cheryl Dunye, and Natalie Bookchin.

kristen stories archives: *The Medieval Archive of Antisemitism in Nineteenth-Century Sweden* Cordelia Heß, 2021-12-20 The significance of religion for the development of modern racist antisemitism is a much debated topic in the study of Jewish-Christian relations. This book, the first study on antisemitism in nineteenth-century Sweden, provides new insights into the debate from the specific case of a country in which religious homogeneity was the considered ideal long into the modern era. Between 1800 and 1900, approximately 150 books and pamphlets were printed in Sweden on the subject of Judaism and Jews. About one third comprised of translations mostly from German, but to a lesser extent also from French and English. Two thirds were Swedish originals, covering all genres and topics, but with a majority on religious topics: conversion, supersessionism, and accusations of deicide and bloodlust. The latter stem from the vastly popular medieval legends of Ahasverus, Pilate, and Judas which were printed in only slightly adapted forms and accompanied by medieval texts connecting these apocryphal figures to contemporary Jews, ascribing them a physical, essential, and biological coherence and continuity – a specific Jewish temporality shaped in

medieval passion piety, which remained functional and intelligible in the modern period. Relying on medieval models and their combination of religious and racist imagery, nineteenth-century debates were informed by a comprehensive and mostly negative knowledge about Jews.

kristen stories archives: Remembering Ludlow but Forgetting the Columbine Leigh Campbell-Hale, 2023-02-15 Mining the American West Remembering Ludlow but Forgetting the Columbine examines the causes, context, and legacies of the 1927 Columbine Massacre in relation to the history of labor organizing and coal mining in both Colorado and the United States. While historians have written prolifically about the 1914 Ludlow Massacre, there has been a lack of attention to the violent event remembered now as the Columbine Massacre in which police shot and killed six striking coal miners and wounded sixty more protestors during the 1927-1928 Colorado Coal Strike, even though its aftermath exerted far more influence upon subsequent national labor policies. This volume is a comparative biography of three key participants before, during, and after the strike: A. S. Embree, the IWW strike leader; Josephine Roche, the owner of the coal mine property where the Columbine Massacre took place; and Powers Hapgood, who came to work for Roche four months after she signed the 1928 United Mine Worker's contract. The author demonstrates the significance of this event to national debates about labor during the period, as well as changes and continuities in labor history starting in the progressive era and continuing with 1930s New Deal labor policies and through the 1980s. This examination of the 1927-1928 Colorado Coal Strike reorients understandings of labor history from the 1920s through the 1960s and the construction of public memory—and forgetting—surrounding those events. Remembering Ludlow but Forgetting the Columbine appeals to academic and general readers interested in Colorado history, labor history, mining history, gender studies, memory, and historiography.

kristen stories archives: WE Rania H. Anderson, 2018-09-18 You cannot win without a workplace where women and men have equal opportunities, equal input, and equal power. —Dominic Barton, Global Managing Partner, McKinsey & Company On almost a daily basis, we read stories in the news about high-profile male leaders, CEOs, venture capitalists, and entrepreneurs harassing and acting inappropriately toward the women with whom they work. Following such revelations, these men generally lose their jobs, and their companies lose valuable female talent, customers/clients, and their reputations. And, although we regularly hear stories about the bro culture that obstructs women's progress and creates hostile work environments for them, we haven't heard as much about the efforts of good men who want to change the in-office behavior of their teams and companies so that they and women they work with can realize their full potential and their businesses can thrive. This book teaches men and managers how to respond in these situations and how to lead by example. In *WE: Men, Women, and the Decisive Formula for Winning at Work*, Rania Anderson lends her guidance on this exact topic. Social mores have changed, and yet, well-intentioned managers simply don't always know what to do and what's appropriate and useful to actively recruit, retain, and advance more women into leadership. They want to be told how this can make a difference to them and how they can make a difference— this book shows you how to improve your own results and win in business: A new playbook to recruit and retain high-caliber women Take actions to work effectively, elevate and lead with women in the workplace Discover how traditional social roles exert a powerful pull on people of both genders and what to do about it. End confusion of male leaders In the #MeToo era when everyone else is focused on what's wrong and what not to do, *WE: Men, Women, and the Decisive Formula for Winning at Work*, is about what's going well and what you can do. Men who are front-line managers, middle managers, and senior managers have been sidelined and left out of efforts to achieve gender parity for too long. Now, these guys can get back in the game!

kristen stories archives: Supervision Sophie Hamacher, 2023-04-25 A wide-ranging, first-of-its-kind anthology of art and writing exploring how surveillance impacts contemporary motherhood. The tracking of our personal information, activities, and medical data through our digital devices is an increasingly recognizable field in which the lines between caretaking and

control have blurred. In this age of surveillance, mothers' behaviors and bodies are observed, made public, exposed, scrutinized, and policed like never before. *Supervision: On Motherhood and Surveillance* gathers together the work of fifty contributors from diverse disciplines that include the visual arts, legal scholarship, ethnic studies, sociology, gender studies, poetry, and activism to ask what the relationship is between how we watch and how we are watched, and how the attention that mothers pay to their children might foster a kind of counterattention to the many ways in which mothers are scrutinized. A groundbreaking collection, *Supervision* is a project about vision (and supervision), and all the ways in which vision intersects with surveillance and politics, through motherhood and personal history as well as through the histories and relations of the societies in which we live. kristen stories archives: *Arts and Culture in Global Development Practice* Cindy Maguire, Ann Holt, 2022-03-30 This book explores the role that arts and culture can play in supporting global international development. The book argues that arts and culture are fundamental to human development and can bring considerable positive results for helping to empower communities and provide new ways of looking at social transformation. Whilst most literature addresses culture in abstract terms, this book focuses on practice-based, collective, community-focused, sustainability-minded, and capacity-building examples of arts and development. The book draws on case studies from around the world, investigating the different ways practitioners are imagining or defining the role of arts and culture in Belize, Canada, China, Ethiopia, Guatemala, India, Kosovo, Malawi, Mexico, Peru, South Africa, Sri Lanka, Taiwan, Thailand, the USA, and Western Sahara refugee camps in Algeria. The book highlights the importance of situated practice, asking what questions or concerns practitioners have and inviting a dialogic sharing of resources and possibilities across different contexts. Seeking to highlight practices and conversations outside normative frameworks of understanding, this book will be a breath of fresh air to practitioners, policy makers, students, and researchers from across the fields of global development, social work, art therapy, and visual and performing arts education.

kristen stories archives: Reshaping True Crime Stories from the Global Margins Francesca Borrione, Heather J. Macpherson, 2024-12-03 *Reshaping True Crime Stories from the Global Margins: Voicing the Less Dead* uses criminal cases, news stories, and media analysis from around the globe to reflect upon the thousands and thousands of missing and murdered individuals from marginalized communities. Contributors ask readers to consider: How do we see these human beings compared to others, and how are they viewed by law enforcement and government officials? These vulnerable populations are often rendered invisible, so how do the media decide what story is told to the public and which one is neglected? Drawing on Steven Egger's concept of the 'less dead,' this collection provides an interdisciplinary, global perspective on how vulnerable groups are erased and demonstrates ways their stories can be made visible.

kristen stories archives: *San Francisco's Bernal Heights*, 2007 San Francisco's Bernal Heights is a hilltop village tucked away in the southern part of the city. Freeways and urban thoroughfares now bound the neighborhood, once defined by the swamps and creeks of the original Mexican land grant. The legacy of Potrero Viejo, or old pasture, and the farms of the 19th and 20th centuries have developed into today's passion for the preservation of open space. From the 1860s legend of Widow

OBriens cow to the 1970s fight that saved the hills crest from development, Bernal residents have tirelessly guarded their environment. An unofficial coyote mascot reigns over one of San Francisco's few remaining wild areas.

Coming off of the 2020 election, *THE BIDENS* tells the Biden Family story in full, from the secrets lurking in the deep recesses of Joe's family tree to his son Hunter's foreign deal-making spree—and the Trump gang's ham-handed efforts to exploit it. They are sure to play a defining role in his presidency, just as they have in every other one of his endeavors. Inside, you'll find these and other stories and revelations about the Biden family, including: Joe's childhood, the stunning 1972 Senate upset engineered by his sister Valerie, and the car accident that took the lives of his first wife and infant daughter soon after Joe's early years in the Senate and his role in the creation of the cozy "Delaware Way" of conducting politics. The Biden brothers' business escapades, including the '70s rock club rivalry that pitted Jim Biden against Jill's first husband and ended in a banking scandal. The Delaware lawman who oversaw an FBI investigation into Joe's 2007 campaign fundraising and now has Hunter in his sights. Hunter's surprisingly close friendship with his Fox News antagonist, Tucker Carlson. What Steve Bannon really hoped to accomplish by giving the contents of "the Laptop from Hell" to the New York Post. New evidence that sheds light on the authenticity of Hunter's alleged computer files. Like the Kennedys before them, the Bidens are a tight-knit, idealistic Irish Catholic clan with good looks, dynastic ambitions, and serious personal problems. As *THE BIDENS* reveals, the best way to understand Joe Biden—his values, fears, and motives—is to understand his family: Their Irish (and not-so-Irish) roots, their place in the Delaware pecking order, their dodgy business deals, and their personal struggles and triumphs alike.

kristen stories archives: Contemporary Challenges for Religious and Spiritual Education Arniika Kuusisto, Terry Lovat, 2017-10-02 From being on the margins of scholarly debate for much of the past century and a half, religion is being recognized once again as an area of concern for scholars, politicians, and public policy makers, and thus, the role of religious and spiritual education has taken on a new importance. Apart from its socio-political ramifications, the place of religiousness and spirituality in the make-up of individuals has been given renewed prominence through updated brain science, and neuroscientists regularly refer to elements of this brain science in terms such as spiritual intelligence and even mystical consciousness. This book explores many of the new directions being taken in the field of religious and spiritual education, as new developments challenge the priorities of formal education, and open up new avenues for incorporating religion and spirituality into the modern curriculum. It asks whether the educational aims of teachers should be focused on specifically personal development, or whether religious education should be used to develop understanding of more global and social issues such as citizenship, conflict, and ethics. The book also addresses neuroscientific insights, which suggest a need to engage with cognition and emotion in order to create a rich learning environment, something to which a particularly contested subject area like religion and spirituality is well-placed to contribute. This book was originally published as a special issue of the *Journal of Beliefs & Values*.
