pirates of the curry bean: American Christians and Islam Thomas S. Kidd, 2018-06-05 In the wake of the September 11 terrorist attacks, many of America's Christian evangelicals have denounced Islam as a demonic and inherently violent religion, provoking frustration among other Christian conservatives who wish to present a more appealing message to the world's Muslims. Yet as Thomas Kidd reveals in this sobering book, the conflicted views expressed by today's evangelicals have deep roots in American history. Tracing Islam's role in the popular imagination of American Christians from the colonial period to today, Kidd demonstrates that Protestant evangelicals have viewed Islam as a global threat--while also actively seeking to convert Muslims to the Christian faith--since the nation's founding. He shows how accounts of Mahometan despotism and lurid stories of European enslavement by Barbary pirates fueled early evangelicals' fears concerning Islam, and describes the growing conservatism of American missions to Muslim lands up through the post-World War II era. Kidd exposes American Christians' anxieties about an internal Islamic threat from groups like the Nation of Islam in the 1960s and America's immigrant Muslim population today, and he demonstrates why Islam has become central to evangelical end-times narratives. Pointing to many evangelicals' unwillingness to acknowledge Islam's theological commonalities with Christianity and their continued portrayal of Islam as an evil and false religion, Kidd explains why Christians themselves are ironically to blame for the failure of evangelism in the Muslim world. *American Christians and Islam* is essential reading for anyone seeking to understand the causes of the mounting tensions between Christians and Muslims today.

pirates of the curry bean: Troubling (Public) Theologies Jione Havea, 2023-02-06 Theologies, no matter their designations, are public measures—they disclose as well as gauge the publics (near and far) on which they stand, sit, lie, or fall. Because publics shift and mingle, theologies require reimagining, relocating, and embracing fresh insights and energies. The insights and energies embraced in this work are in three clusters: spaces, bodies, and technologies. The spotlighted spaces are in Africa, Asia, Black America, the Caribbean, and Pasifika—beyond the eyes

of mainline theologies; the privileged bodies have survived, with scars from empire and missionary positionings; and the welcomed technologies include Dalit, indigenous, art, poetry, cyborg, and the novel. This collection is troubling in several ways: first, reimagining and relocating are troubling acts upon their subject matter—here, public theologies. On that note, what theology is not public? Second, this work takes theologies in general, and not just the theologies that carry the “public” designation, to be public theologies. Third, this work takes theologies in general to be inherently troubling. In other words, theologies that are not troubling are not public enough.
