a tree grows in brooklyn pdf: A Tree Grows in Brooklyn Arthur Schwartz, 1951 Play based on *A Tree Grows in Brooklyn*: Francie Nolan, avid reader, penny-candy connoisseur, and adroit observer of human nature, has much to ponder in colorful, turn-of-the-century Brooklyn. She grows up with a sweet, tragic father, a severely realistic mother, and an aunt who gives her love too freely--to men, and to a brother who will always be the favored child. Francie learns early the meaning of hunger and the value of a penny. She is her father's child--romantic and hungry for beauty. But she is her mother's child, too--deeply practical and in constant need of truth. a tree grows in brooklyn pdf: Yard Birds Philip Levy, 2023-04-18 In 2009, the New Yorker declared chickens the it bird and heralded the return of the backyard chicken. This honor occurred as, a host of American cities were changing their laws to allow chickens in residents' backyards. Philip Levy, a sometime chicken keeper himself, mixes cultural history with husbandry to chronicle the weird and wonderful story of Americans' urban chickens. From the streets of Brooklyn to council chambers in Albany to the beat of Key West's Chicken Nuisance Patrol, yard birds are an important and growing part of American city life. Part history, part travelogue, and part reportage, Yard Birds takes the reader on a tour-de-force journey across America, past and present, to profile its urban chickens housed in luxury coops or dying at yearly rituals. What emerges is a compelling picture of city chickens that can both serve as hipster status symbols and guarantee that the families keeping them have at least something to eat. Levy's smart and entertaining investigation of the contemporary urban chicken craze reveals that poultry flocks were historically an integral part of America's urban spaces; chickens have simply returned home now, some to very fancy roosts.

a tree grows in brooklyn pdf: Beauty in the City Robert A. Slayton, 2017-06-21 Presents a major new interpretation of the Ashcan School of Art, arguing that these artists made the working-class city at the turn of the century a subject for beautiful art. At the beginning of the twentieth century the Ashcan School of Art blazed onto the art scene, introducing a revolutionary vision of New York City. In contrast to the elite artists who painted the upper class bedecked in finery, in front of magnificent structures, or the progressive reformers who photographed the city as a slum, hopeless and full of despair, the Ashcan School held the unique belief that the industrial working-class city was a fit subject for great art. In *Beauty in the City*, Robert A. Slayton illustrates how these artists portrayed the working classes with respect and gloried in the drama of the subways and excavation sites, the office towers, and immigrant housing. Their art captured the emerging metropolis in all its facets, with its potent machinery and its class, ethnic, and gender issues. By exposing the realities of this new, modern America through their art—expressed in what they chose to draw, not in how they drew it—they created one of the great American art forms. "A delight for the eyes, a treat for city lovers, and a fine example of how historians can use art, *Beauty in the City* will enrich such fields as urban history, art history, the history of New York City, and America in the twentieth century. Robert Slayton has identified a group of artists who saw in the gritty details of city life real beauty and social meaning." —Hasia R. Diner, author of *Roads Taken: The Great Jewish Migrations to the New World and the Peddlers Who Forged the Way* "A century ago, the Ashcan painters created an art that was of, by, and for urban Americans—in all their exhilarating pluralism. Robert Slayton analyzes and celebrates their accomplishment in a work that combines brilliant scholarship and a profound passion for his subject. To his great credit, he reveals the beauty already there." —Michael Kazin, author of *War Against War: The American Fight for Peace, 1914–1918* "With great narrative skill and finely drawn characters, Robert Slayton paints a vivid picture of New York and the art world in the early twentieth century. He reminds us that these artists and the city they inhabited continue to influence our perspective—about class, about gender,

about race—a century later. This book is a wonderful, vibrant look at a forgotten part of our history.

a tree grows in brooklyn pdf: From the Ground Up Alison Sant, 2022-01-11 For decades, American cities have experimented with ways to remake themselves in response to climate change. These efforts, often driven by grassroots activism, offer valuable lessons for transforming the places we live. In *From the Ground Up: Local Efforts to Create Resilient Cities*, design expert Alison Sant focuses on the unique ways in which US cities are working to mitigate and adapt to climate change while creating equitable and livable communities. She shows how, from the ground up, we are raising the bar to make cities places in which we don't just survive, but where all people have the opportunity to thrive. The efforts discussed in the book demonstrate how urban experimentation and community-based development are informing long-term solutions. Sant shows how US cities are reclaiming their streets from cars, restoring watersheds, growing forests, and adapting shorelines to improve people's lives while addressing our changing climate. The best examples of this work bring together the energy of community activists, the organization of advocacy groups, the power of city government, and the reach of federal environmental policy. Sant presents 12 case studies, drawn from research and over 90 interviews with people who are working in these communities to make a difference. For example, advocacy groups in Washington, DC are expanding the urban tree canopy and offering job training in the growing sector of urban forestry. In New York, transit agencies are working to make streets safer for cyclists and pedestrians while shortening commutes. In San Francisco, community activists are creating shoreline parks while addressing historic environmental injustice. *From the Ground Up* is a call to action. When we make the places we live more climate resilient, we need to acknowledge and address the history of social and racial injustice. Advocates, non-profit organizations, community-based groups, and government officials will find examples of how to build alliances to support and embolden this vision together. Together we can build cities that will be resilient to the challenges ahead.

a tree grows in brooklyn pdf: *Designing Hollywood* Christian Esquevin, 2023-08-29 Since the 1920s, fashion has played a central role in Hollywood. As the movie-going population consisted largely of women, studios made a concerted effort to attract a female audience by foregrounding fashion. Magazines featured actresses like Jean Harlow and Joan Crawford bedecked in luxurious gowns, selling their glamour as enthusiastically as the film itself. Whereas actors and actresses previously wore their own clothing, major studios hired costume designers and wardrobe staff to fabricate bespoke costumes for their film stars. Designers from a variety of backgrounds, including haute couture and art design, were offered long-term contracts to work on multiple movies. Though their work typically went uncredited, they were charged with creating an image for each star that would help define an actor both on- and off-screen. The practice of working long-term with a single studio disappeared when the studio system began unraveling in the 1950s. By the 1970s, studios had disbanded their wardrobe departments and auctioned off their costumes and props. In *Designing Hollywood: Studio Wardrobe in the Golden Age*, Christian Esquevin showcases the designers who

dressed Hollywood's stars from the late 1910s through the 1960s and the unique symbiosis they developed with their studios in creating iconic looks. Studio by studio, Esquevin details the careers of designers like Vera West, who worked on Universal productions such as *Phantom of the Opera* (1925), *Dracula* (1931), and *Bride of Frankenstein* (1931); William Travilla, the talent behind Marilyn Monroe's dresses in *Gentleman Prefer Blondes* (1953) and *The Seven Year Itch* (1955); and Walter Plunkett, the Oscar-winning designer for film classics like *Gone with the Wind* (1939) and *An American in Paris* (1951). Featuring black and white photographs of leading ladies in their iconic looks as well as captivating original color sketches, *Designing Hollywood* takes the reader on a journey from drawing board to silver screen.
