african holistic health pdf free: *Epidemics and the Health of African Nations* MISTRA
MISTRA, 2019-07-25 News footage of disease in Africa is a familiar sight. Yet these outbreaks are often presented out of context, with no reference to the conditions that have triggered them. MISTRAs new book, *Epidemics and the Health of African Nations*, aims to redress that. Researchers and practitioners from within the continent explore why Africa is so vulnerable to disease, and show how this vulnerability is closely linked to political and economic factors. They demonstrate how these same factors determine the way epidemics are treated. Authors extract lessons from case studies in different parts of Africa; challenge conventional frameworks about disease to argue for a syndemics approach that takes into account the interrelationship between disease and political and socio-economic contexts; explore challenges of Africas future. They argue that a well-functioning health system is at the core of a countrys capacity to counter an epidemic. This volume brings African experts together to probe possible solutions to the continents heavy burden of disease. The insights offered will be helpful in devising policy for the control of disease and the combatting of epidemics in Africa.

african holistic health pdf free: *African Traditional Medicine: Autonomy and Informed Consent* Peter Ikechukwu Osuji, 2014-07-18 This book focuses on informed consent in African Traditional Medicine (ATM). ATM forms a large portion of the healthcare systems in Africa. WHO statistics show that as much as 80% of the population in Africa uses traditional medicine for primary health care. With such a large constituency, it follows that ATM and its practices should receive more attention in bioethics. By comparing the ethics of care approach with the ATM approach to Relational Autonomy In Consent (RAIC), the authors argue that the ATM focus on consent based on consensus constitutes a legitimate informed consent. This book is distinctive insofar as it employs the ethics of care as a hermeneutic to interpret ATM. The analysis examines the ethics of care movement in Western bioethics to explore its relational approach to informed consent. Additionally, this is the first known study that discusses healthcare ethics committees in ATM.

african holistic health pdf free: Children's Palliative Care in Africa Justin Amery, 2009 Children's palliative care has developed rapidly as a discipline, as health care professionals recognise that the principles of adult palliative care may not always be applicable to children at the end of life. The unique needs of dying children are particularly evident across Africa, where the scale of the problem is overwhelming and the figures so enormous that they are barely comprehensible: over 400,000 children in Africa died from AIDS in 2003, and out of the 166,000 children a year diagnosed with cancer, 84% of these are in the developing world. Despite the enormous need, provision of children's palliative care in Africa is almost non-existent, with very few health workers trained and confident to provide care for dying children. The challenges of providing palliative care in this setting are different to those in more developed countries, contending with the shortage of physical and human resources in addition to the vast scope of the care needed. Written by a group with wide experience of caring for dying children in Africa, this book provides practical, realistic guidance on improving access to, and delivery of, palliative care in this demanding setting. It looks at the themes common to palliative care - including communication, assessment, symptom management, psychosocial issues, ethical dilemmas, end of life care, and tips for the professional on compassion and conservation of energy - but always retains the focus on the particular needs of the health care professional in Africa. Whilst containing some theory, the emphasis is on practical action throughout. It will provide health care professionals working in Africa, and other resource-poor settings, with the confidence, knowledge, and capacity to improve care for the terminally ill child in constrained and demanding environments.

african holistic health pdf free: Beyond The Secret Alexandra Bruce, 2007-09-01 Based on a best-selling documentary film of the same name, this book presents the "Law of Attraction," which, according to the tagline, "has traveled through centuries to reach you." By synthesizing "how to get rich" ideas from classic self-help books by Wallace D. Wattles (*The Science of Getting Rich*), Napoleon Hill (*Think and Grow Rich!*), and Charles Haanel (*The Master Key System*) with twenty-five modern-day self-improvement gurus like Jack Canfield, Bob Proctor, Michael Bernard Beckwith, James Ray, Lisa Nichols, and Joe Vitale, author Rhonda Byrne and her team have created an almost alchemically rich and compelling promise. They claim that "The Secret" was discovered by such historical luminaries as Plato, da Vinci, Galileo, Napoleon, Hugo, Beethoven, Newton, Edison, and Einstein/ that "The Secret" has existed in fragments in religions, philosophies, and oral traditions for centuries . . . but only now has it all been put together. "The Secret is everything you have dreamed of . . . and is beyond your wildest dreams," trumpet the marketing materials. Could it really be true, or is it just a new spin on the very old (and decidedly not secret) "the power of positive thinking" wedded to "ask and you shall receive"? Alexandra Bruce goes behind the scenes to investigate the phenomenon, from its roots in Australia to the sales bonanza that has seen creator Rhonda Byrne become the most successful debut author in memory. Bruce takes a hard but fair look at the "teachers" featured in *The Secret* and the "Law of Attraction" that is the central theme. To truly understand the significance of *The Secret*, perspective is needed. *Beyond The Secret* delivers that and much more.

The Southern African Gender Protocol Alliance is a network of country and regional NGOs that campaigned for the Protocol, it's updating, implementation and tracking. Originally aligned to the Millennium Development Goals that expired in 2015, SADC Gender Ministers updated the Protocol and aligned it to the Sustainable development Goals (SDGs), Beijing Plus Twenty and the Africa Agenda 2063 in 2016. In July 2017, the Ministers adopted a Monitoring, Evaluation and Results Framework (MERF) that is now the basis of reporting. 2018 marks the tenth anniversary of the SADC Gender Protocol and the Barometer. Moving with the times, the Alliance has expanded the two yardsticks in the Barometer: the SADC Gender and Development Index (SGDI) and the Citizen Score Card (CSC). The Barometer incorporates many MERF and SDG indicators, as well as its own unique measures of voice, choice and control. The Barometer also introduces the Gender Responsive Assessment of Constitutions and Laws conducted by Alliance experts and networks around the region. A wealth of data, insights and analysis awaits all readers of the Barometer, that will also be made available online and in multi-media formats. african holistic health pdf free: The Psychosocial Aspects of a Deadly Epidemic Judy Kuriansky, 2016-03-21 Edited by a clinical psychologist who has been on the ground helping to develop psychosocial support for Ebola survivors in one of the hardest-hit regions of West Africa, this book explains the devastating emotional aspects of the epidemic and its impact on survivors and the population in West Africa, families in the diaspora, and people in the United States and other countries. It also describes lessons learned from past epidemics like HIV/AIDS and SARS, and valuable approaches to healing from future epidemics. While the devastating Ebola epidemic has been contained, the effects of this outbreak—referred to by the World Health Organization as the most severe acute public health emergency seen in modern times—have wreaked a tremendous emotional toll on the populations of West Africa as well as on families and survivors worldwide. This groundbreaking book covers the psychosocial needs, programs, and policies related to the Ebola epidemic and examines broader lessons of the outbreak, such as changes in the ways in which healing from future epidemics can be handled. Edited by Judy Kuriansky, PhD, a noted clinical psychologist and United Nations NGO representative with extensive experience helping after

disasters worldwide, and direct experience gained from being on the ground in West Africa in the midst of the epidemic, this book identifies and explains universal psychological factors at play in all such crises. It debunks myths regarding Ebola and describes the resulting psychological and social harm caused by the epidemic. The chapters cover overarching emotional issues and problems as well as the long-term impact on at-risk groups, such as children, women, and health workers; the impact of emotional issues on social and economic life; responses of government officials, media, and various aid organizations; and solutions being offered by groups worldwide, including service and humanitarian organizations, politicians, policymakers, and public health education groups.

african holistic health pdf free: Litigating the Right to Health in Africa Ebenezer Durojaye, 2016-03-09 Health rights litigation is still an emerging phenomenon in Africa, despite the constitutions of many African countries having provisions to advance the right to health. Litigation can provide a powerful tool not only to hold governments accountable for failure to realise the right to health, but also to empower the people to seek redress for the violation of this essential right. With contributions from activists and scholars across Africa, the collection includes a diverse range of case studies throughout the region, demonstrating that even in jurisdictions where the right to health has not been explicitly guaranteed, attempts have been made to litigate on this right. The collection focusses on understanding the legal framework for the recognition of the right to health, the challenges people encounter in litigating health rights issues and prospects of litigating future health rights cases in Africa. The book also takes a comparative approach to litigating the right to health before regional human rights bodies. This book will be valuable reading to scholars, researchers, policymakers, activists and students interested in the right to health.

african holistic health pdf free: Religion, Public Health and Human Security in Nigeria Abiodun Alao, 2022-12-28 This book critically examines the intersection of religion, public health and human security in Nigeria. Focusing on Christianity, Islam, traditional religions and intra-religious doctrinal divergencies, the book explores the impact faith has on health-related decisions and how this affects security in Nigeria. The book assesses the connection between religion and five contemporary major health and medical issues in the country. This includes the issue of epidemics and pandemics such as the Covid-19 pandemic, vaccines, contraception, blood transfusion and the controversies associated with miracle healing. In particular, this book explores situations where individuals have the power of choice but instead embraces faith and religious positions that contradict science in the management of their health and, in the process, expose themselves and others to personal health insecurity. It investigates aspects of human security including the wider international ramifications of health issues, approaches to cures and the interpretation of causes of diseases, as well as the ethno-religious connotations of such interpretations. Exploring key issues that have brought religion into the politics of health and human security in Nigeria, this book will be of interest to students and scholars in the field of African Religion, African Politics, African Studies, public health, security, and Sociology.
