Astrosmash, Snafu, Star Strike, Utopia—do these names sound familiar to you? No? Maybe? They were all videogames created for the Intellivision videogame system, sold by Mattel Electronics between 1979 and 1984. This system was Atari's main rival during a key period when videogames were moving from the arcades into the home. In Intellivision, Tom Boellstorff and Braxton Soderman tell the fascinating inside story of this overlooked gaming system. Along the way, they also analyze Intellivision's chips and code, games, marketing and business strategies, organizational and social history, and the cultural and economic context of the early US games industry from the mid-1970s to the great videogame industry crash of 1983. While many remember Atari, Intellivision has largely been forgotten. As such, Intellivision fills a crucial gap in videogame scholarship, telling the story of a console that sold millions and competed aggressively against Atari. Drawing on a wealth of data from both institutional and personal archives and over 150 interviews with programmers, engineers, executives, marketers, and designers, Boellstorff and Soderman examine the relationship between videogames and toys—an under-analyzed aspect of videogame history—and discuss the impact of home computing on the rise of videogames, the gendered implications of play and videogame design at Mattel, and the blurring of work and play in the early games industry.

almost maine pdf: *Something Between Us* Anand Pandian, 2025-05-27 An anthropologist's quest to understand the deep social and political divides in American society, and the everyday strategies that can overcome them. In 2016, Anand Pandian was alarmed by Donald Trump's harsh attacks on immigrants to the United States, the appeal of that politics of anger and fear. In the years that followed, he crisscrossed the country—from Fargo, North Dakota to Denton, Texas, from southern California to upstate New York—seeking out fellow Americans with markedly different social and political commitments, trying to understand the forces that have hardened our suspicions of others. The result is *Something Between Us: The Everyday Walls of American Life, and How to Take Them Down*, a groundbreaking and ultimately hopeful exploration of the ruptures in our social fabric, and courageous efforts to rebuild a collective life beyond them. The stakes of disconnection have never been higher. From the plight of migrants and refugees to the climate crisis and the recent pandemic, so much turns on the care and concern we can muster for lives and circumstances beyond our own. But as Pandian discovers, such empathy is often thwarted by the infrastructure of everyday American life: fortified homes and neighborhoods, bulked-up cars and trucks, visions of the body as an armored fortress, and media that shut out contrary views. Home and road, body and mind: these interlocking walls sharpen the divide between insiders and outsiders, making it difficult to take unfamiliar people and perspectives seriously, to acknowledge the needs of others and relate to their struggles. Through vivid encounters with Americans of many kinds—including salesmen, truck drivers, police officers, urban planners, and activists for women's rights and environmental justice—Pandian shares tools to think beyond the twists and turns of our bracing present. While our impasses draw from deep American histories of isolation and segregation, he reveals how strategies of mutual aid and communal caretaking can help to surface more radical visions for a life in common with others, ways of meeting strangers in this land as potential kin.

Choice Highly Recommended Title—January 2017 This book is an interpretive analysis of political campaigns in America: instead of focusing on how campaigns are designed and run, it investigates the role campaigns play in our American politics, and the close symbiosis between campaigns and those politics. The text examines how campaigns are an important manifestation of how we do politics in this country. Hallmarks of this text include: showing how campaigns can undermine our democracy and asking how democratic they—and by extension, our politics--really are; demonstrating that the ability of the media to accurately, fairly, and deeply report on campaigns has been severely compromised, both because of the growing distance between campaigns and media outlets and because of the structure of Big Media corporate ownership and its tight relationship to Big Money. It asks important questions about the media including: How do the media, reporters in particular, cover campaigns? What pressures and forces shape what and how they present campaigns? What is the impact of the ever-increasing chasm separating campaigns and the media? How does the close tie between corporate mainstream media and Super PAC money affect campaign coverage? How does the ability of campaigns and media to segment voters into ever-smaller slices influence how campaigns are covered? tracking the continuing growth of unregulated, private, unaccountable dark money in campaigns as a threat to our democratic elections and politics. Democracy rests fundamentally on transparency and accountability - sunlight - and our campaign laws and norms now allow and encourage exactly the opposite, largely because of decisions by the United States Supreme Court.

almost maine pdf: School Choice Mercedes K. Schneider, 2016-06-01 Proponents of market-driven education reform view vouchers and charters as superior to local-board-run, community-based public schools. However, the author of this timely volume argues that there is no clear research supporting this view. In fact, she claims there is increasing evidence of charter mismanagement—with public funding all-too-often being squandered while public schools are being closed or consolidated. Tracing the origins of vouchers and charters in the United States, this book examines the push to “globally compete” with education systems in countries such as China and Finland. It documents issues important to the school choice debate, including the impoverishment of public schools to support privatized schools, the abandonment of long-held principles of public education, questionable disciplinary practices, and community disruption. *School Choice: The End of Public Education?* is essential reading for anyone seeking a deeper understanding of the past and future of public education in America. Book Features: Provides a comprehensive historical account of the origins of vouchers and charters. Includes accounts of intriguing historical experiences. Examines the defunding of neighborhood public schools in favor of often underregulated charters. Reveals charter school “churn” that often follows the closing of a mismanaged charter. Provides a cogent counternarrative to the claim that charters are necessary for America to compete globally. “How fortunate that we have another soon-to-be classic from Mercedes Schneider that informs and empowers us all for the fight back!” —Joyce E. King, Georgia State University “Schneider provides a must-read for anyone, especially educators, interested in the future of public education.” —Margaret-Mary Sulentic Dowell, Louisiana State University “Outstanding!
