Implications for directing:

- Study and understand the script thoroughly.

This philosophy ensures that the film remains true to its narrative and emotional objectives.

Key ideas:

david mamet on directing film pdf: *Coppola's Monster Film* Steven Travers, 2016-06-23 In 1975, after his two Godfather epics, Francis Ford Coppola went to the Philippines to film *Apocalypse Now*. He scrapped much of the original script, a jingoistic narrative of U.S. Special Forces winning an unwinnable war. Harvey Keitel, originally cast in the lead role, was fired and replaced by Martin Sheen, who had a heart attack. An overweight Marlon Brando, paid a huge salary, did more philosophizing than acting. It rained almost every day and a hurricane wiped out the set. The Philippine government promised the use of helicopters but diverted them at the last minute to fight communist and Muslim separatists. Coppola filmed for four years with no ending in the script. The shoot threatened to be the biggest disaster in movie history. Providing a detailed snapshot of American cinema during the Vietnam War, this book tells the story of how *Apocalypse Now* became one of the great films of all time.

david mamet on directing film pdf: *Television Dramatic Dialogue* Kay Richardson, 2010-04-07 When we watch and listen to actors speaking lines that have been written by someone else—a common experience if we watch any television at all—the illusion of people talking is strong. These characters are people like us, but they are also different, products of a dramatic imagination, and the talk they exchange is not quite like ours. *Television Dramatic Dialogue* examines, from an applied sociolinguistic perspective, and with reference to television, the particular kind of artificial talk that we know as dialogue: onscreen/on-mike talk delivered by characters as part of dramatic storytelling in a range of fictional and nonfictional TV genres. As well as trying to identify the place which this kind of language occupies in sociolinguistic space, Richardson seeks to understand the conditions of its production by screenwriters and the conditions of its reception by audiences, offering two case studies, one British (*Life on Mars*) and one American (*House*).

This text examines the process and considers how to create the best processes and environments for developing stories and concepts for film.

david mamet on directing film pdf: *Body Double* Lucy Fischer, 2013-01-15 *Body Double* explores the myriad ways that film artists have represented the creative process. In this highly innovative work, Lucy Fischer draws on a neglected element of auteur studies to show that filmmakers frequently raise questions about the paradoxes of authorship by portraying the onscreen writer. Dealing with such varied topics as the icon of the typewriter, the case of the writer/director, the authoress, and the omnipresent infirm author, she probes the ways in which films can tell a plausible story while contemplating the conditions and theories of their making. By examining many forms of cinema, from Hollywood and the international art cinema to the avant-garde, Fischer considers the gender, age, and mental or physical health of fictionalized writers; the dramatized interaction between artists and their audiences and critics; and the formal play of written words and nonverbal images. By analyzing such movies as *Adaptation*, *Diary of a Country Priest*, *Naked Lunch*, *American Splendor*, and *Irezumi*, Fischer tracks the parallels between film author and character, looking not for the creative figure who stands outside the text, but for the one who stands within it as corporeal presence and alter-ego.

By exploring the ways in which performance choices and improvised moments can work in conjunction with texts themselves, *Performing in Comedy* offers an indispensable practical tool for enhancing comic performance. This volume is a must-read for any actors, directors or students who work with comic texts. Wilkie synthesises theories and principles of comedy with practical tips, and re-evaluates the ways in which these ideas can be used by the performer. Most importantly, these skills – timing, focus, awareness – are teachable rather than being innate talents. Exercises, interviews and guides to further resources enhance this comprehensive exploration of comic acting.
