I have literally taken just about every page that I though was worth challenging and extracted the lies and exposed them to be the best of my ability. The scope of his work was not only about him and his community, but also about freeing the minds of those who came in contact or will come in contact with these pathogenic teachings that seem to have premeated the nation. I also take the time to do Dawah (propagate Islam) towards the end of the book by dispelling myths like did the Vatican create Islam?, The Moon god Myth, did the prophet Muhammad really exist? I also show and prove diligently that this man is not from planet Rizq, He is not from the Sudan, or apart of the Al-Mahdi family. In this work Inshallah (God Willing) the reader will see for themselves the fraud unveiled and that his teachings are a hodgepodge of Sumerian, Akkadian, Babylonian and Hindu extractions wrapped with a miniscule amount of truth. man from planet rizq: *The Nuwaubian Nation* Susan Palmer, 2016-12-05 The Nuwaubian Nation takes the reader on a journey into an African-American spiritual movement. The United Nuwaubian Nation has changed shape since its inceptions in the 1970s, transforming from a Black Hebrew mystery school into a Muslim utopian community in Brooklyn, N.Y.; from an Egyptian theme park into an Amerindian reserve in rural Georgia. This book follows the extraordinary career of Dwight York, who in his teens started out in a New York street gang, but converted to Islam in

prison. Emerging as a Black messiah, York proceeded to break the Paleman's spell of Kingu and to guide his people through a series of racial/religious identities that demanded dramatic changes in costume, gender roles and lifestyle. Dr. York's Blackosophy is analyzed as a new expression of that ancient mystical worldview, Gnosticism. Referring to theories in the sociology of deviance and media studies, the author tracks the escalating hostilities against the group that climaxed in a Waco-style FBI raid on the Nuwaubian compound in 2002. In the ensuing legal process we witness Dr. York's dramatic reversals of fortune; he is now serving a 135-year sentence as his Black Panther lawyer prepares to take his case to the Supreme Court. This book presents fresh and important insights into racialist spirituality and the social control of unconventional religions in America.

man from planet rizq: Islam, Science Fiction and Extraterrestrial Life Jörg Matthias Determann, 2020-09-17 The Muslim world is not commonly associated with science fiction. Religion and repression have often been blamed for a perceived lack of creativity, imagination and future-oriented thought. However, even the most authoritarian Muslim-majority countries have produced highly imaginative accounts on one of the frontiers of knowledge: astrobiology, or the study of life in the universe. This book argues that the Islamic tradition has been generally supportive of conceptions of extra-terrestrial life, and in this engaging account, Jörg Matthias Determann provides a survey of Arabic, Bengali, Malay, Persian, Turkish, and Urdu texts and films, to show how scientists and artists in and from Muslim-majority countries have been at the forefront of the exciting search. Determann takes us to little-known dimensions of Muslim culture and religion, such as wildly popular adaptations of Star Wars and mysterious movements centred on UFOs. Repression is shown to have helped science fiction more than hurt it, with censorship encouraging authors to disguise criticism of contemporary politics by setting plots in future times and on distant planets. The book will be insightful for anyone looking to explore the science, culture and politics of the Muslim world and asks what the discovery of extra-terrestrial life would mean for one of the greatest faiths.

Zeller, offers the most expansive and detailed study of the persistent, popular, and global phenomenon of religious engagements with ideas about extraterrestrial life. The present work considers not only new religions founded on ideas about extraterrestrials and UFOs, but how those within more mainstream religions have responded to the science, scientific speculation, and popular culture involving extraterrestrials, UFOs, and related concepts. Global in reach, it includes chapters considering South and East Asia, Europe, and North and South America, and draws on several interdisciplinary methods. In addition, the handbook traces connections between UFO religiosity and cultural patterns such as science and scientism, esoterism and occultism, millennialism, and popular culture.

man from planet rizq: Metaphysical Africa Michael Muhammad Knight, 2020-09-15 The Ansaru Allah Community, also known as the Nubian Islamic Hebrews (AAC/NIH) and later the Nuwaubians, is a deeply significant and controversial African American Muslim movement. Founded in Brooklyn in the 1960s, it spread through the prolific production and dissemination of literature and lecture tapes and became famous for continuously reinventing its belief system. In this book, Michael Muhammad Knight studies the development of AAC/NIH discourse over a period of thirty years, tracing a surprising consistency behind a facade of serial reinvention. It is popularly believed that the AAC/NIH community abandoned Islam for Black Israelite religion, UFO religion, and Egyptosophy. However, Knight sees coherence in AAC/NIH media, explaining how, in reality, the community taught that the Prophet Muhammad was a Hebrew who adhered to Israelite law; Muhammad's heavenly ascension took place on a spaceship; and Abraham enlisted the help of a pharaonic regime to genetically engineer pigs as food for white people. Against narratives that treat the AAC/NIH community as a postmodernist deconstruction of religious categories, Knight demonstrates that AAC/NIH discourse is most productively framed within a broader African American metaphysical history in which boundaries between traditions remain quite permeable. Unexpected and engrossing, *Metaphysical Africa* brings to light points of intersection between communities and traditions often regarded as separate and distinct. In doing so, it helps move the field of religious studies beyond conventional categories of "orthodoxy" and "heterodoxy," challenging assumptions that inform not only the study of this particular religious community but also the field at large.

man from planet rizq: Nuwaubian Pan-Africanism Emeka C. Anaedozie, 2019-12-03 This book examines the contemporary operational and theoretical parameters of Pan-Africanism and black nationalism in the post-civil rights era. It uses the Nuwaubian movement as a case study to explore this essential strand in African Diasporan history, culture, and tradition. The author argues that the Nuwaubian Nation, like their contemporaries such as the Nation of Islam, represents contemporary efforts of African descendants to dialectically and culturally fight oppression. He argues that unlike the classical Back to Africa movements, the contemporary ones do not seek to primarily relocate to Africa, but to go to Africa culturally and bring back Africa to the diaspora. This effort can be seen in the Nuwaubian attempts at unearthing and importing classical African traditions, mores, and values in their various communities across the United States, especially in Eatonton, Georgia. Their aim was to chart an identity for their adherents and inspire racial pride for people of African descent.

man from planet rizq: The Aliites Spencer Dew, 2019-08-20 "Citizenship is salvation,"

preached Noble Drew Ali, leader of the Moorish Science Temple of America in the early twentieth century. Ali's message was an aspirational call for black Americans to undertake a struggle for recognition from the state, one that would both ensure protection for all Americans through rights guaranteed by the law and correct the unjust implementation of law that prevailed in the racially segregated United States. Ali and his followers took on this mission of citizenship as a religious calling, working to carve out a place for themselves in American democracy and to bring about a society that lived up to what they considered the sacred purpose of the law. In *The Aliites*, Spencer Dew traces the history and impact of Ali's radical fusion of law and faith. Dew uncovers the influence of Ali's teachings, including the many movements they inspired. As Dew shows, Ali's teachings demonstrate an implicit yet critical component of the American approach to law: that it should express our highest ideals for society, even if it is rarely perfect in practice. Examining this robustly creative yet largely overlooked lineage of African American religious thought, Dew provides a window onto religion, race, citizenship, and law in America.

Page, Jr. assemble twenty groundbreaking essays that provide a rationale and parameters for Africana Esoteric Studies (AES): a new trans-disciplinary enterprise focused on the investigation of esoteric lore and practices in Africa and the African Diaspora. The goals of this new field — while akin to those of Religious Studies, Africana Studies, and Western Esoteric Studies — are focused on the impulses that give rise to Africana Esoteric Traditions (AETs) and the ways in which they can be understood as loci where issues such as race, ethnicity, and identity are engaged; and in which identity, embodiment, resistance, and meaning are negotiated.

man from planet rizq: *Why Was Man Created?* Sam Oputa, 2016-10-11 In the beginning, God created the earth, and He looked upon it in His cosmic loneliness. And God said, Let Us make living creatures out of mud, so the mud can see what We have done. And God created every living creature that now moveth, and one was man. Mud as man alone could speak. God leaned close to mud as man sat up, looked around, and spoke. Man blinked. What is the purpose of all this? he asked politely. Everything must have a purpose? asked God. Certainly, said man. Then I leave it to you to think of one for all this, said God. And He went away. -Kurt Vonnegut, *Cat's Cradle* Most people must have at one point or another asked themselves the question, why am I here? One thing is certain--we were not here from the beginning. Some have asked questions like What is life all about? Many others have wondered What is the nature of life? and What is the nature of reality?. These questions can be a passing thought that launches into a full-on existential exploration. What are we anyway? We are born. We grow into adults and before you can bat an eyelid, you are in the old people's home waiting to die. How fulfilling is that? Do you now wonder why some people ask the question What are we here for anyway? Some great people have asked these questions. What is my purpose? It is a difficult and profound question, and a common conclusion is that we were created for God's glory. That may be a religious truth but is it logical? There must be a far more specific reason for our creation. In Sam Oputa's *Why Was Man Created?* he explores this question from many angles--spirituality, religion, psychology, philosophy, and other sciences--but mostly he draws from the Holy Books, which contain a wealth of scientific evidence. The result of years of research and soul-searching *Why Was Man Created?* is a fascinating and sometimes controversial study of the age-old question of creation and evolution. The answers to these questions are not easy to resolve but the answers are out there.

man from planet rizq: CHAPTER 1-B AFROO OONOO,

man from planet rizq: Real Black John L. Jackson Jr., 2005-11-15 New York's urban neighborhoods are full of young would-be emcees who aspire to keep it real and restaurants like Sylvia's famous soul food eatery that offer a taste of authentic black culture. In these and other venues, authenticity is considered the best way to distinguish the real from the phony, the genuine from the fake. But in Real Black, John L. Jackson Jr. proposes a new model for thinking about these issues--racial sincerity. Jackson argues that authenticity caricatures identity as something imposed on people, imprisoning them within stereotypes--turning them into racial objects and inanimate things, instead of living, breathing human beings. Contending that such assumptions deny people agency--not to mention humanity--in their search for identity, Jackson counterposes sincerity, an internal and more productive analytical model for thinking about race. Moving in and around Harlem and Brooklyn, Jackson offers a kaleidoscope of subjects and stories that directly and indirectly address how race is negotiated in today's world--including tales of name-changing hip-hop emcees, book-vending numerologists, urban conspiracy theorists, corrupt police officers, mixed-race neo-Nazis, and high-school gospel choirs forbidden to catch the Holy Ghost. Enlisting Anthroman, his cape-crusading critical alter ego, Jackson records and retells these interconnected sagas in virtuosic detail and, in the process, shows us how race is defined and debated, imposed and confounded every single day.
