percy jackson the lightning thief pdf: Eco-Teen Films Robin L. Murray, Joseph K. Heumann, 2024-09-06 Illuminating the impacts of environmental disasters and climate crises globally, this book examines the experiences of teens grappling with eco-disasters and issues in films of the twenty-first century. With an emphasis on teen activism, international settings and filmmakers, and marginalized perspectives, this book showcases teens on film that are struggling with present and future everyday eco-disasters amplified by climate change. By highlighting and interrogating diverse genres of teen films in which young adults encounter, address, and battle environmental issues and calamities while also struggling with adolescent development, this book acknowledges the young adult point of view missing from most critical ecocinema research and underlines connections between the more complex 'coming-of-age' themes found in teen films with ecocinema themes and approaches. The films examined navigate increasingly realistic conditions, even in fantastical settings, as they showcase teens' relationships with and responses to environmental issues and eco-disasters.

Emphasizing teen activism and under-represented intersectional perspectives outside Hollywood, it establishes the eco-teen film as a notable subgenre. This book will be of interest to students and scholars of film studies, ecocriticism, and environmental studies, especially those with a particular interest in ecocinema and/or ecocritical readings of films.

percy jackson the lightning thief pdf: Imagining Europe: Memory, Visions, and Counter-Narratives Lars Klein, Martin Tamcke, 2015 In the course of the so-called 'economic and financial crisis' from 2008 onwards, there has been a fierce debate about the role and purpose of the European Union. It was led in politics and the media just as in academia. The economic usefulness of the Euro has been discussed, and the political implications of a fostered European unification. Most often, the state of Europeanization has been presented as being without alternatives: no Europe without Greece; no Euro without Greece; no way back to the nation state in its old form. As a result, the debate on Europe was largely narrowed down to the very questions of the immediate crisis, namely economics and finance. Only a few voices held that the crisis in fact was one of politics, not of economics. And only late did politicians mention again that Europe is more than the EU.

Alternative views of Europe, however, were scarce and often presented full of consequences. It thus came without much surprise that the lacking imaginative power of politicians as well as intellectuals was criticized. The idea for this volume sprang from that situation. The editors invited scholars from various disciplines to present them with ways of imagining Europe that go beyond the rather limited view of EU institutions. How was, how is Europe imagined? Which memories are evoked, which visions explicated? Which counter-narratives to prominent discourses are there?
