study island answers: Supporting Inclusion Faith Edmonds Andreasen, 2014-04-02

Supporting Inclusion: School Administrators' Perspectives and Practices provides significant insights that arm the reader with a variety of ideas and easy-to-implement applicable strategies gleaned from knowledgeable contemporaries. This book details various approaches taken by administrators as they transitioned their schools from a segregated resource environment to an inclusive framework. From elementary to high school, administrators in both large and small school districts describe approaches that best suited their populations' needs. While transitioning to inclusion, administrators created structures that maximized staff talent and encouraged faculty buy-in. Challenges included calendaring collaboration time, providing inclusion and co-teaching training, properly mentoring first year teachers, securing expert ancillary staff, retraining paraprofessionals from resource to inclusive supporting roles, procuring appropriate technology and supplemental resources, and presenting strategies to accommodate behaviorally challenged students. Programing often required shifting populations and leveling classes. Ultimately, administrators established and sustained inclusive classrooms with a good deal of success.

Since being founded in 1998, this conference has consistently been devoted to finding new approaches to learning, with a focus on collaborative learning. Today the ICL conferences have established themselves as a vital forum for the exchange of information on key trends and findings, and of practical lessons learned while developing and testing elements of new technologies and pedagogies in learning.

study island answers: Restoring Opportunity Greg J. Duncan, Richard J. Murnane, 2014-01-01 In this landmark volume, Greg J. Duncan and Richard J. The authors offer a brilliant synthesis of recent research on inequality and its effects on families, children, and schools.
