You’re not alone. AI is everywhere—and few things are surrounded by so much hype, misinformation, and misunderstanding. In *AI Snake Oil*, computer scientists Arvind Narayanan and Sayash Kapoor cut through the confusion to give you an essential understanding of how AI works and why it often doesn’t, where it might be useful or harmful, and when you should suspect that companies are using AI hype to sell AI snake oil—products that don’t work, and probably never will. While acknowledging the potential of some AI, such as ChatGPT, *AI Snake Oil* uncovers rampant misleading claims about the capabilities of AI and describes the serious harms AI is already causing in how it’s being built, marketed, and used in areas such as education, medicine, hiring, banking, insurance, and criminal justice. The book explains the crucial differences between types of AI, why organizations are falling for AI snake oil, why AI can’t fix social media, why AI isn’t an existential risk, and why we should be far more worried about what people will do with AI than about anything AI will do on its own. The book also warns of the dangers of a world where AI continues to be controlled by largely unaccountable big tech companies. By revealing AI’s limits and real risks, *AI Snake Oil* will help you make better decisions about whether and how to use AI at work and home.

this is how you lose the time war pdf: Shell-Shocked Bonnie Honig, 2021-03-23 A biting, funny, up-to-the-minute collection of essays by a major political thinker that gets to the heart of what feminist criticism can do in the face of everyday politics. Stormy Daniels offered a #metoo moment, and Anderson Cooper missed it. Conservatives don't believe that gender is fluid, except when they're feminizing James Comey. "Gaslighting" is our word for male domination but a gaslight also lights the way for a woman's survival. Across two dozen trenchant, witty reflections, Bonnie Honig offers a biting feminist account of politics since Trump. In today's shock politics, Honig traces the continuing work of patriarchy, as powerful, mediocre men gaslight their way across the landscape of democratic institutions. But amid the plundering and patriarchy, feminist criticism finds ways to demand justice. Shell-Shocked shows how women have talked back, acted out, and built anew, exposing the practices and policies of feminization that have historically been aimed not just at women but also at racial and ethnic minorities. The task of feminist criticism—and this is what

makes it particularly well-suited to this moment—is to respond to shock politics by resensitizing us to its injustices and honing the empathy needed for living with others in the world as equals. Feminist criticism's penchant for the particular and the idiosyncratic is part of its power. It is drawn to the loose threads of psychological and collective life, not to the well-worn fabrics with which communities and nations hide their shortcomings and deflect critical scrutiny of their injustices. Taking literary models such as Homer's Penelope and Toni Morrison's Cee, Honig draws out the loose threads from the fabric of shock politics' domination and begins unraveling them. Honig's damning, funny, and razor sharp essays take on popular culture, national politics, and political theory alike as texts for resensitizing through a feminist lens. Here are insightful readings of film and television, from *Gaslight* to *Bombshell*, *Unbelievable* to *Stranger Things*, *Rambo* to the Kavanaugh hearings. In seeking out the details that might break the spell of shock, this groundbreaking book illustrates alternative ways of living and writing in a time of public violence, plunder, and—hopefully—democratic renewal.

this is how you lose the time war pdf: *Climate Change and the Nation State* Anatol Lieven, 2020 The climate emergency is intensifying, while international responses continue to falter. In *Climate Change and the Nation State*, Anatol Lieven outlines a revolutionary approach grounded in realist thinking. This involves redefining climate change as an existential threat to nation states - which it is - and mobilizing both national security elites and mass nationalism. He condemns Western militaries for neglecting climate change and instead prioritizing traditional but less serious threats. Lieven reminds us that nationalism is the most important force in motivating people to care about the wellbeing of future generations. The support of nationalism is therefore vital to legitimizing the sacrifices necessary to limit climate change and surviving and the effects of it (some of which are now inevitable). This will require greatly strengthened social and national solidarity across lines of class and race. Throughout, Lieven draws on historical examples to show how nationalism has helped enable past movements to implement progressive social reform. Lieven strongly supports plans for a Green New Deal in the USA and Europe. In order to implement and maintain such changes, however, it will be necessary to create dominant national consensus like those that enabled and sustained the original New Deal and welfare states in Europe. Lieven criticizes sections of the environmentalist left for hindering this by their hostility to national interests, their utopian political naiveté, their advancement of divisive cultural agendas, and their commitment to open borders. Radical and timely, *Climate Change and the Nation State* is an essential contribution to the debate on how to deal with a climatic crisis that if unchecked will threaten the survival of Western democracies and every organized human society.

Amid the constant rain of German bombs and the escalating violence of World War II, British parents by the thousands chose to send their children out of the country: the wealthy, independently; the poor, through a government relocation program called CORB. In September 1940, passenger liner *SS City of Benares* set sail for Canada with one hundred children on board. When the war ships escorting the *Benares* departed, a German submarine torpedoed what became known as the Children's Ship. Out of tragedy, ordinary people became heroes. This is their story. This title has Common Core connections.

this is how you lose the time war pdf: *The Climate War* Eric Pooley, 2010-06-08 In *The Climate War*, Eric Pooley--deputy editor of Bloomberg BusinessWeek--does for global warming what Bob Woodward did for presidents and Lawrence Wright did for terrorists. In this epic tale of an American civil war, Pooley takes us behind the scenes and into the hearts and minds of the most important players in the struggle to cap global warming pollution--a fight in which trillions of dollars and the fate of the planet are at stake. Why has it been so hard for America to come to grips with climate change? Why do so many people believe it isn't really happening? As President Obama's science advisor John Holdren has said, We're driving in a car with bad brakes in a fog and heading

for a cliff. We know for sure that cliff is out there. We just don't know exactly where it is. Prudence would suggest that we should start putting on the brakes. But powerful interests are threatened by the carbon cap that would speed the transition to a clean energy economy, and their agents have worked successfully to deny the problem and delay the solutions. To write this book, Pooley, the former managing editor of Fortune and chief political correspondent for Time, spent three years embedded with an extraordinary cast of characters: from the flamboyant head of one of the nation's largest coal-burning energy companies to the driven environmental leader who made common cause with him, from leading scientists warning of impending catastrophe to professional skeptics disputing almost every aspect of climate science, from radical activists chaining themselves to bulldozers to powerful lobbyists, media gurus, and advisors in Obama's West Wing--and, to top it off, unprecedented access to former Vice President Al Gore and his team of climate activists. Pooley captures the quiet determination and even heroism of climate campaigners who have dedicated their lives to an uphill battle that's still raging today. He asks whether we have what it takes to preserve our planet's habitability, and shows how America's climate war sends shock waves from Bali to Copenhagen. No other reporter enjoys such access to this cast of characters. No other book covers this terrain. From the trenches of a North Carolina power plant to the battlefields of Capitol Hill, Madison Avenue, and Wall Street, *The Climate War* is the essential read for anyone who wants to understand the players and politics behind the most important issue we face today.

this is how you lose the time war pdf: *Are Libraries Obsolete?* Mark Y. Herring, 2014-01-17
The digital age has transformed information access in ways that few ever dreamed. But the afterglow of our digital wonders has left libraries reeling as they are no longer the chief contender in information delivery. The author gives both sides--the web aficionados, some of them unhinged, and the traditional librarians, some blinkered--a fair hearing but misconceptions abound. Internet be-all and end-all enthusiasts are no more useful than librarians who urge fellow professionals to be all things to all people. The American Library Association, wildly democratic at its best and worst, appears schizophrenic on the issue, unhelpfully. My effort here, says the author, is to talk about the elephant in the room. Are libraries obsolete? No! concludes the author (also). The book explores how libraries and librarians must and certainly can continue to be relevant, vibrant and enduring.

this is how you lose the time war pdf: *Naval Power in Action* Brent Droste Sadler, 2025-09-02 *Naval Power in Action* focuses attention to the United States' current competition with China, laying out a case for acting in three areas: strengthen the homeland to economic coercion, modernize and reorganize institutions to successfully compete, and winning the positional fight with China over markets and military posture. Amongst duck hunters there is a saying that describes our nation's current predicament in the competition with China - shooting behind the duck. It means that the actions our leaders have been taking for many years have been reactive and ineffective, said another way, missing their mark. To correct this requires adjusting for the target's - China's - reaction and anticipating its course to aim for an interception point. This book aims to inform a near-term (within four years) approach to lead in this competition with China. And there is not much

time to begin getting the aim right. This book refines ideas in Brent Sadler's first book, *U.S. Naval Power in the 21st Century*, and focuses attention to the present, laying out a case for acting in three areas: strengthen the homeland to economic coercion, modernize and reorganize institutions to successfully compete, and winning the positional fight with China over markets and military posture. Achieving success in these three areas all requires urgent action with effects following in waves - increased maritime presence, followed by improvements in national industrial resiliency and capacities. Doing this requires acting with what is at hand to deter China, while setting the conditions for a sustained competition well into the future. Bore-sighting on China while necessary can be dangerous if it blinds the nation to other dangers - our nation must be prepared and armed to be able to "chew gum and walk" as often eloquently stated by our political leaders. Top of the 'to-do' list - bolstering our economy's defense to coercion via a variety of vectors - cyber, sanctions, direct attacks. Most urgent is addressing the paucity of shipping on which the nation's economy floats. This book is a roadmap for how to accomplish this complex task with urgency and effectiveness.

this is how you lose the time war pdf: *Roll Over, Che Guevara* Marc Cooper, 1994 At the age of twenty, after being expelled from his California university for anti-war activism, Marc Cooper moved to Santiago and worked as translator for Chilean President Salvador Allende. The heat of Allende's socialist revolution forged Cooper's political and reporting skills, indelibly imprinting them with a radical perspective. In 1973, at great personal risk, he began first-hand reporting on the fiery destruction of Allende's government and Chilean democracy as a result of the US-financed coup. Twenty years later, traveling as a radical journalist in a reactionary world, Cooper continues to chronicle, with biting humor and revealing detail, the events that make our headlines. In *Roll Over, Che Guevara*, he takes us on a breakneck tour of the New World Order, including Pinochet's Chile, Nicaragua in the last hours of the Sandinistas, Soweto under siege, Panama still smoking after the US invasion, Baghdad bracing for the apocalypse, and into the new Moscow mafia. In the title piece, we met up with Che Guevara's grandson and a new generation of Cuban youth still yearning for Che's ever-elusive promise of freedom. The book's second half, set exclusively in the USA, gives us a ground-level view of a society in dizzying decay. We fly in Bill Clinton's private campaign plane from New Hampshire to Georgia while the candidate shifts his image - even his accent - in the quest for votes. We are guided through America's cultural battleground, from Dan Quayle and his confrontation with Hollywood to the Ambassadors from Armageddon who dominated the 1992 Republican convention. And when Cooper's home town, Los Angeles, burns with a thousand fires of rage, he takes us to the very edge of history, describing America's war against itself. This incredible journey culminates in a swirling, careening and highly personal trip to the city that stands as an icon for the marketplace ethos of our times: Las Vegas.
