toronto notes 2023: Condoland James T. White, John Punter, 2023-05-31 Condoland casts CityPlace - a massive residential development of more than thirty condominium towers just outside

Toronto's downtown core – as a microcosm of twenty-first-century urban intensification that has transformed the city skyline beyond all recognition. Built almost entirely by a single private developer, this immense neighbourhood took decades to plan, design, and develop, but the end result lacks a sense of place and is not widely accessible to those who need homes: only a small number of its 13,000 units constitute affordable housing, and public amenities are limited. James T. White and John Punter journey through the forty-year development of Toronto's largest residential megaproject, focusing on its urban design and architectural evolution. They also delve into the background, summarizing the tools used to shape Toronto's built environment, and critically explore the underlying political economy of planning and real estate development in the city. Using detailed field studies, interviews, archival research, and with nearly two hundred illustrations, they reveal an alarmingly flexible approach to planning and design that is acquiescent to the demands of a rapacious development industry. Condoland raises key questions about the sustainability and long-term resilience of city planning.

toronto notes 2023: Insulin Stuart Bradwel, 2023-06-08 In 1922, an unlikely team of researchers in Toronto made one of the most important medical breakthroughs of the century: insulin. Their discovery seemed miraculous. When it was given to diabetic patients on the brink of death, their condition rapidly improved. Those present could barely believe their eyes: they had witnessed resurrection. However, this was no simple cure. Injections must be taken for life. Without them, symptoms quickly return, often with fatal results. But while a lifetime on insulin poses great challenges, it also offers opportunities. In this revelatory history, Stuart Bradwel looks back on one of medicine's most celebrated innovations. Setting professional narrative against subjective patient experience, he tells the story of a drug that has challenged many of the basic assumptions upon which medical practice is built, both inside and outside the clinic. Nevertheless, Bradwel reminds us that the centenary of this apparent "wonder drug" should be no cause for celebration. Insulin often remains inaccessible to those who need it most: elusive prescriptions, uneven availability and sky-high prices result in rationing and desperate do-it-yourself research and development. In the face of bootstraps rhetoric and "Pharma Bro" capitalists, patients across the world are left to fend for themselves. There is a long way to go in the twenty-first century until insulin truly fulfils the extraordinary promises made by its discovery. Also available as an audiobook.

toronto notes 2023: Notes on Feminism Lauren Windle, 2024-03-08 Is it possible to be a Christian and a feminist? The hot topic of feminism has been well documented and debated in mainstream media and yet, as Christians we come to the conversation from a slightly different vantage point. For starters, we have the benefit of a personal relationship with our creator plus the ultimate handbook in the Bible to work out what is right and just when it comes to equality. So why do many Christians feel the Bible presents a barrier rather than a boost when it comes to championing equality between the sexes? Lauren Windle draws upon her years as a journalist to weave together a wide range of voices on a subject that society has been wrestling with but, in the Church, few are brave enough to probe too deeply for fear of what they might find. This book isn't here to tell you what to think. The views it presents are intended to inform, not form, your opinion on key topics, including: defining feminism, the lessons we teach boys, female preachers, a woman's place in the household, beauty standards and #ChurchToo. Notes On Feminism features contributions from several high-profile women: Writer and model Katie Piper on true beauty Olympian Abigail Irozuru on women's bodies Comedian Cassandra Maria on why people think women aren't funny Author Tiffany Bluhm on why people don't believe women Journalist Delphine Chui on why she isn't a feminist. If feminist stirrings feel like a barrier to your faith, let Notes on Feminism help you unpick the confusion and ongoing debate, while keeping God at the centre.

toronto notes 2023: Student Notes from Latin Europe (1400-1750) Xander Feys, Maxime Maleux , Andy Peetermans, Raf Van Rooy, 2025-05-02 The first comprehensive guide dedicated solely to research on Latin-European early modern student notes. The many preserved collections of student notes from the early modern period – ranging from neatly maintained notebooks to barely legible scribbles crammed between lines of printed text – hold considerable but largely untapped potential as an historical source. At the same time, the analysis of these notes poses significant challenges for scholars. This book aims to be a concise and accessible companion for scholars interested in engaging with this young and burgeoning research field. Written by a diverse group of specialists from across Europe and the US, it explores the various technical and practical aspects involved in reading, interpreting, and editing student notes, while also demonstrating how these sources can enrich various areas of historical research. Indeed, student notes reveal that early modern lecture halls were often more dynamic, diverse, and creative than we might have expected.

toronto notes 2023: An Ecumenical Odyssey Stanley Jayakumar Yesudass, 2023-07-01 No less than two decades were needed for the composition of the ecumenical convergence document The Church: Towards a Common Vision (TCTCV) which was published by the World Council of Churches in 2013. The document was intended to reflect a common vision of churches and ecumenical stakeholders on a myriad of ecclesiological themes. The book investigates whether the convergence document TCTCV delivers on its promises. The book focuses on the formation and the reception of TCTCV along with the two draft versions, The Nature and Purpose of the Church (1998) and The Nature and Mission of the Church (2005) and uncovers whether the responses by the churches to TCTCV hold an affirmation of the convergences registered in the document. Furthermore, it seeks to establish whether the responses point towards a common vision concerning various ecclesiological themes that are still contested by the churches today. The book also explores whether the responses to TCTCV reveal an advancement in the conversation surrounding several debated issues, and examines to what extent the churches are willing to creatively engage with the ecclesial other.

toronto notes 2023: In the Best Interest of Students Kelly Gallagher, 2023-10-10 In his new book, In the Best Interest of Students: Staying True to What Works in the ELA Classroom , teacher and author Kelly Gallagher notes that there are real strengths in the Common Core standards, and there are significant weaknesses as well. He takes the long view, reminding us that standards come and go but good teaching remains grounded in proven practices that sharpen students' literacy skills. Instead of blindly adhering to the latest standards movement, Gallagher suggests: Increasing

the amount of reading and writing students are doing while giving students more choice around those activities
Balancing rigorous, high-quality literature and non-fiction works with student-selected titles
Encouraging readers to deepen their comprehension by moving beyond the four corners of the text
Planning lessons that move beyond Common Core expectations to help young writers achieve more authenticity through the blending of genres
Using modeling to enrich students' writing skills in the prewriting, drafting, and revision stages
Resisting the de-emphasis of narrative and imaginative reading and writing
Amid the frenzy of trying to teach to a new set of standards, Kelly Gallagher is a strong voice of reason, reminding us that instruction should be anchored around one guiding question: What is in the best interest of our students?

toronto notes 2023: The (Mis)Representation of Queer Lives in True Crime Abbie E. Goldberg, Danielle C. Slakoff, Carrie L. Buist, 2023-08-25 This book examines the representation and misrepresentation of queer people in true crime, addressing their status as both victims and perpetrators in actual crime, as well as how the media portrays them. The chapters apply an intersectional perspective in examining criminal cases involving LGBTQ people, as well as the true crime media content surrounding the cases. The book illuminates how sexual orientation, gender, race, and other social locations impact the treatment of queer people in the criminal legal system and the mass media. Each chapter describes one or more high-profile criminal cases involving queer people (e.g., the murders of Brandon Teena and Kitty Genovese; serial killer Aileen Wuornos; the Pulse nightclub mass shooting). The authors examine how the cases are portrayed in the media via news, films, podcasts, documentaries, books, social media, and more. Each chapter discusses not only what is visible or emphasized by the media but also what is invisible in the accounting or societal focus surrounding the case. Lesser-known (but similar) cases are used in the book to call attention to how race, gender, sexuality, sexual orientation, social class, and/or other features influence the dominant narrative surrounding these cases. Each chapter addresses teachable moments from each case and its coverage, leaving readers with several considerations to take with them into the future. The book also provides media resources and supplemental materials so that curious readers, including scholars, students, content creators, and advocates, can examine the cases and media content further. The book will appeal to scholars and students of criminology, psychology, sociology, law, media studies, sexuality studies, and cultural studies, and people with an interest in true crime.

toronto notes 2023: Two Wings to Hide My Face Penny Mickelbury, 2023-12-05 Award-winning author and journalist Penny Mickelbury returns to pre-Civil War Philadelphia to continue the powerful saga of Genie Oliver and Abigail Read. In 1857 the US Supreme Court ruled that Blacks were not—and could never be citizens. Black lives were already in peril from the hooligans who would capture and sell them South under the protection of the Runaway Slave Act, even if they weren't runaway slaves. By 1861 Southern states spoke openly of seceding from the Union to form the Confederate States and protect what they believed was their right to own slaves. If the South were to win, slavery would become the law of the land. So for many Blacks, leaving was the only option. Genie Oliver, who frequently dresses as a man to move about the city, is no longer safe in her disguise. White people find themselves just as imperiled for providing any assistance to Blacks—which means that the former Pinkerton's agent Ezra MacKaye, his fiancé Ada Lawrence, and heiress Abigail Read, are in as much danger as Genie and her friends, the Juniper family. Not knowing what to expect, Ezra, Ada, and the Juniper family join Genie and Abigail as they pack up their lives and head to Canada. Their goal is to stay at least one step ahead of the brutalities of the uncivil war, but can they outpace the dangers that cross their paths every step of the way?

toronto notes 2023: Rogers v. Rogers Alexandra Posadzki, 2024-02-13 A riveting, deeply reported account that takes us inside the dramatic battle for control of Canada's largest wireless carrier, and paints a broader picture of the cutthroat telecom industry, the labyrinth of regulatory and political systems that govern it, and the high-stakes corporate games played by the Canadian establishment. Alexandra Posadzki's ground-breaking coverage in the Globe and Mail exposed one of the most spectacular boardroom and family dramas in Canadian corporate history—one that has pitted the company's extraordinarily powerful chairman and controlling shareholder, Edward Rogers, against not only his own management team but also the wishes of his mother and two of his sisters. Hanging in the balance is no less than the pending \$20 billion acquisition of Shaw Communications, a historic deal that promises to transform Rogers into the truly national telecom empire that its late founder, Ted Rogers, always envisioned. Based on deeply sourced, investigative reporting of the iconic \$30 billion publicly traded telecom and media giant, Posadzki takes us inside a company that touches the lives of millions of Canadians, challenging what we thought we knew about corporate governance and who really holds the power. Rogers v. Rogers is also a story of family legacy and succession, of an old guard pushing back at the new guard, and of a company struggling to find its footing in the wake of its legendary founder's death. At the heart of it all is a dispute between warring factions of the family over how they each interpret the desires of the late patriarch and the very identity of the company that bears their name.
