The 2015 FDIP Report and Scorecard seek to answer a set of fundamental questions about today's global financial inclusion efforts, including: 1) Do country commitments make a difference in progress toward financial inclusion?; 2) To what extent do mobile and other digital technologies advance financial inclusion?; and 3) What legal, policy, and regulatory approaches promote financial inclusion? John D. Villaseñor, Darrell M. West, and Robin J. Lewis analyzed the financial inclusion landscape in Afghanistan, Bangladesh, Brazil, Chile, Colombia, Ethiopia, India, Indonesia, Kenya, Malawi, Mexico, Nigeria, Pakistan, Peru, the Philippines, Rwanda, South Africa, Tanzania, Turkey, Uganda, and Zambia. Countries received scores and rankings based on 33 indicators spanning four dimensions: country commitment, mobile capacity, regulatory environment, and adoption of traditional and digital financial services. The authors' analysis provides several takeaways with respect to expanding financial inclusion across diverse cultural, economic, and political contexts: · Country commitment is fundamental. · Movement toward digital financial services will accelerate financial inclusion. · Geography generally matters less than policy, legal, and regulatory changes, although some regional trends in terms of financial services provision are evident. · Central banks, ministries of finance, ministries of communications, banks, nonbank financial providers, and mobile network operators play major roles in achieving greater financial inclusion. · Full financial inclusion cannot be achieved without addressing the financial inclusion gender gap. This year's Report and Scorecard are the first of a series of publications intended to provide policymakers, the private sector, nongovernmental organizations, and the general public with information that can help improve financial inclusion in these countries and around the world.

annabel lee pdf: *Educating the Neglected Majority* Richard A. Jarrell, 2016-05-01 *Educating the Neglected Majority* is Richard Jarrell's pioneering survey of the attempt to develop and diffuse agricultural and technical education in nineteenth-century Canada's most populous regions. It explores the efforts and achievements of educators, legislators, and manufacturers as they responded to the rapid changes resulting from the Industrial Revolution. Identifying the resources that the state, philanthropic organizations, private schools, moral reform societies, and churches harnessed to implement technical education for the rural and industrial working classes, Jarrell illuminates the formal and informal learning networks of Upper Canada/Ontario and Lower Canada/Quebec at this time. As these colonial societies moved towards mechanization, industrialization, and nationhood, their educational leaders looked to US and British developments in pedagogy and technology to create academic journals, evening classes, libraries, mechanics' institutes, museums, specialist societies, and women's institutes. Supervising these varied activities were legislatures and provincial boards, where key figures such as E.-A. Barnard, J.-B. Meilleur, and Egerton Ryerson played dominant roles. Portraying the powerful hopes and sometimes unrealistic dreams that motivated energetic and determined reformers, *Educating the Neglected Majority* presents Ontario and Quebec's response to the powerful industrial and demographic forces that were reshaping the North Atlantic world.

annabel lee pdf: *The Diversity of Darkness and Shameful Behaviors* Tim Delaney, 2022-05-06 The premise of *The Diversity of Darkness and Shameful Behaviors* is to emphasize the need for enlightened, rational thinking as a paradigm of thought as the culture of shamelessness continues to grow and cast its repulsive dark shadow over those who embrace enlightened reason and basic human rights for all. *Diversity of Darkness* is an innovative work and represents the third book of a trilogy written by the author that underscores the reality that there are many shamefully hateful and deadly behavioral threats that have jeopardized the very notions of civility, decency and justice around the world. This unique book utilizes evidence-based approaches in the examination of human behaviors in society that have become increasingly shameful and tolerated among a growing number of enablers. Key features include a combination of academic analyses that draw on numerous and specific examples of the diversity of darkness that encompasses the world along with a balanced practical, everyday-life approach to the study of the socio-political world we live in through the use of contemporary culture references and featured popular culture boxes. Social scientists, social thinkers and the general audience alike will be intrigued by the diversity of topics covered, including anti-civil rights movements; the rise of supremacist groups; hate crimes; mass shootings and active shootings; terrorism, war and genocide; an increase in shameful behaviors and

attempts to shame others; and attacks on science, reason and rationality. We should realize that humanity has the intellect to accomplish great feats but heed the growing culture of shamelessness, irrationality and the diversity of darkness.

annabel lee pdf: Inventories and Surveys for Heritage Management David Myers, Janet Hansen, 2024-07-30 This open-access publication provides essential guidance on digital inventories and surveys for the identification, conservation, and management of heritage places. A critical first step in the conservation of cultural heritage is to identify and understand the places we want to protect. Inventories and surveys are essential tools in this effort, and their use in managing national, regional, and local heritage is mandated in heritage-related legislation across the globe. Despite the widespread understanding of the importance of inventories and surveys, however, practical, up-to-date guidance on how they should be created, implemented, and maintained has been substantially lacking—until now. This publication draws from the Getty Conservation Institute's ongoing work with heritage inventories and on the Los Angeles Office of Historic Resources' experience with SurveyLA. It provides technical advice, guidance, and lessons learned for employing inventories and surveys as tools for heritage conservation and management. The free online edition of this open-access publication is available at www.getty.edu/publications/inventories-and-surveys. Also available are free PDF and EPUB downloads of the book.

annabel lee pdf: The Art and Science of Poisons Olen R. Brown, 2018-06-04 Poisons, due to their lethal nature, invoke a sense of fear in humans. Yet, they have also impacted other aspects of human life. Poisons have been used by nomadic hunters to kill their prey, by scientists to explore complex biochemical mechanisms of the body, by physicians to lower cholesterol and to kill cancer cells, by farmers and the general public to destroy pests, by the evil minded for homicide, and by tyrants as weapons of war. The Art and Science of Poisons presents two facets of poisons: the science behind them and their place in history and art. The science of poisons describes their biochemistry and how they kill. The science story voyages into the sub-microscopic world of atoms, molecules, and cells. Only there can we see the true miracles and mysteries of life and death. Chapters in the book explore poisons from snakes, spiders, scorpions, sea creatures, as well as poisons made by humans in the laboratory, and those which are derived from beautiful plants. The art of poisons, on the other hand, encompasses everything else about these agents that conjures up the image of the skull and crossbones. This side of the story explores the legends and tales of intrigue and surreptitious deaths of well-known personalities such as Socrates, Cleopatra, Hitler, and many more. General readers with a curiosity about science and an interest in history and human nature will enjoy both facets presented in this brief, yet varied exploration into the world of poisons.

annabel lee pdf: Journalism Tim P. Vos, 2018-05-22 This volume sets out the state-of-the-art in the discipline of journalism at a time in which the practice and profession of journalism is in serious flux. While journalism is still anchored to its history, change is infecting the field. The profession, and the scholars who study it, are reconceptualizing what journalism is in a time when journalists no longer monopolize the means for spreading the news. Here, journalism is explored as a social practice, as an institution, and as memory. The roles, epistemologies, and ethics of the field are evolving. With this in mind, the volume revisits classic theories of journalism, such as gatekeeping and agenda-setting, but also opens up new avenues of theorizing by broadening the scope of inquiry into an expanded journalism ecology, which now includes citizen journalism, documentaries, and lifestyle journalism, and by tapping the insights of other disciplines, such as geography, economics, and psychology. The volume is a go-to map of the field for students and scholars—highlighting emerging issues, enduring themes, revitalized theories, and fresh conceptualizations of journalism.

annabel lee pdf: The Coherence Factor Thomas R. Flanagan, Craig H. Lindell, 2018-11-01 Cogito, ergo sum. (I think, therefore I am.) When Descartes quipped this, he erroneously split thinking from feeling. He assumed thoughts emerge from a substance other than feeling. This is a historic tragedy, and it is unnecessary. It brings us to a risky end-game. When we attempt to meld preconceived thought with evoked feelings, we come to the craft of spin doctors. Instead, there is a natural path for connecting thinking and feeling. It involves emotional reflection at the time that understandings are created. This book draws attention to a form of dialogue which is called design dialogue. Design dialogue constructs new meaning from the bottom up. Individuals construct new meanings through individual thinking. In design dialogue, meaning results from group thinking. Group thinking is not as simple as thinking individually while being present within a group. The design process results in a series of co-constructed learning artifacts which, ultimately, constitute a new understanding. The process is concurrently emotional and cognitive, and melding emotion and cognition is achievable with effective design dialogue methods. The first chapter introduces emotion as the catalyst for considering questions, persisting in reflection, and concluding a cycle of thought. This chapter fills in gaps with the treatment of emotion and cognition. The second chapter lays out the sequence of observation-taking, sensemaking, meaning-making, and perspective-taking that are essential steps in thinking. Frameworks for thinking in educational traditions focus not so much on the neurological mechanics of the thought process but rather on the overall internalization of a way of understanding things. A third chapter presents a methodology for managing a design dialogue. Group facilitators generally invent and modify their own approaches for leading design projects. This chapter presents a codified approach that offers an advantage of supporting continuous

improvement of complex design management methodology. And the final chapter considers the emergence of a sapient group-mind through the agency of design dialogue. This conjectured group-mind is considered in the context of the civic infrastructure that is needed to sustain the continual growth of the human superorganism structure. As humanity has moved from tribes, to cities, to institutions, and now to globally connected networks, each leap forward has been accompanied by profound changes in social practices and belief systems. Recent findings from the field of cognitive science have confirmed a suspicion that we have long held about each other. Individual thinking is biased and flawed. Inclusive and democratically managed discussion, deliberation and design all help to identify and dampen flawed understandings. The individual mind, an essential ingredient in the human spirit, is now, as a matter of practical necessity, bending to the wisdom of a well-informed group mind. The speed and strength of newly emerging social forces and evolving civic trends point to the conclusion that we are on the threshold for a new way of being. This book seeks to evoke reflection on how we can start communicating in a way that prepares us for life in that new future.

annabel lee pdf: Decoding Digital Culture with Science Fiction Alan N. Shapiro, 2024-06-04
How do digital media technologies affect society and our lives? Through the cultural theory hypotheses of hyper-modernism, hyperreality, and posthumanism, Alan N. Shapiro investigates the social impact of Virtual/Augmented Reality, AI, social media platforms, robots, and the Brain-Computer Interface. His examination of concepts of Jean Baudrillard and Katherine Hayles, as well as films such as Blade Runner 2049, Ghost in the Shell, Ex Machina, and the TV series Black Mirror, suggests that the boundary between science fiction narratives and the »real world« has become indistinct. Science-fictional thinking should be advanced as a principal mode of knowledge for grasping the world and digitalization.
