go dog go coloring pages: My Redemption Journey Elijah Levy Ph.D., 2023-07-18 In this collection of poetry, individuals living with mental illness write in an intimate, evocative and vivid style their longing for acceptance, respect and recovery. For the mentally ill, writing poetically by using imagery, figurative language, symbolism and metaphor is a safe passage to capture hope, redemption and purpose. Individuals living with disorders on the Schizophrenia Spectrum and Bipolar Disorder are a vessel of truth and writing poetically transforms that truth in a way that makes it amenable to healing. What is dormant and shameful to disclose is awakened, and it energizes one to act in some way to heal and defeat ongoing devaluation, loneliness, stigmatization and alienation. In the end, it is hope that gives life meaning and sustains faith for the good life. Without hope, one lives in despair and futility. The evocative nature of poetry transforms silence, alienation and insignificance to sound. The written word, the poem, is shared so others can understand and empathize with the mentally ill to abolish alienation, stigma and to welcome integration. The healthy mind will invariably understand the depth of suffering of the mentally ill and through empathy, the ability to take the role of the other, become more compassionate toward the mentally ill. Although each of the poets in this book lives a mental illness, they are unique in how they creatively express their thoughts.

Framed by meditations on the beginnings and possible post-human ends of culture, the new poems reflect on the callings and limits of art in responding to desire, history, mortality, and injustice. Set in the American South, Wales, France, the Czech Republic, and Sudan, the poems address and invoke the divine.

go dog go coloring pages: The ABCs of Autism in the Classroom Wendela Whitcomb Marsh, 2018-06-15 What's the biggest challenge facing teachers today? Behavior. And which students present the most baffling and unique behavior problems? Our awesome kids on the autism spectrum. We love them, but it can be difficult to understand and deal with their challenging behaviors. But behavior analysts aren't in the classroom; teachers are. And most teachers can't call a behavior analyst every time a behavior problem crops up. Even when they do call in a behavior analyst, they might not understand all that talk about the "discriminative stimulus" and the "conditioned reinforcer." It's all so dry and confusing. Teachers don't have time to wade through all that jargon, they're too busy teaching. So what's a teacher to do when a student throws a chair, or bites her hand, or refuses to work? It's up to teachers to figure out solutions before the behavior gets worse. They need help. *The ABCs of Autism in the Classroom: Setting the Stage for Success* was written by a Board-Certified Behavior Analyst who was also a teacher for many years, as well as an autism mom. Here you will find evidence-based, research-supported behavioral tools presented in teacher-friendly language. You'll meet a virtual village of students with problem behaviors you might find in your own classroom. You'll also read stories shared by kids and adults on the autism spectrum, in their own words.
