shel silverstein poems pdf: *Building School and Home Connections* ,

shel silverstein poems pdf: Love Earth Now Cheryl Leutjen, 2018-01-15 How to live sustainably in an unsustainable society—and not let the world discourage your spirit. Do you find yourself wondering what on Earth you can do about the very serious environmental challenges we face on our planet today? Do you worry there's nothing any one person can do that will make a difference? Most people say that they would like to do something to make the world a better place, but they just don't believe they have the time, energy, money, or power to make a real difference. Love Earth Now invites us to explore our own thoughts and feelings about the challenge, and to

check in with internal guidance about the waste and negative environmental impacts we see on a daily basis. While most of us can't stop the Arctic icepack from melting, we can decide to make better choices like avoiding excessive packaging with our purchases, walking more and driving less, planting organic veggies in the front yard instead of a water-wasting lawn, and even going as green as possible at work and at home. Does your office lack a recycling and composting program? Do the research and start one yourself! Each chapter concludes with a "Diving In" section, a simple and immediate exercise, much like a guided meditation, to prompt us toward our own sustainable solutions. By practicing eco-mindfulness, we can discover that one thing we can do to make a difference today and for all our tomorrows. This is not only a source of inspiration but a sourcebook of direct actions—large and small—we can all take to ensure our children and their children's children have a healthy future on this planet. Drawing from her experiences as an engineering geologist, environmental law attorney, small shop owner, and mindfulness practitioner, Cheryl Leutjen also reminds us about the importance of simplicity—and how all our possessions and the constant shopping for more are no better for us than they are for the planet itself, contributing to landfills and a tech-tethered society that is increasingly isolated. Both helpful and hopeful, *Love Earth Now* is brimming with creative suggestions that will get us closer to a sustainable lifestyle, one day at a time.

shel silverstein poems pdf: *Developing Independent Learners* Jane C. Wiatr, Mario C. Barbieri, 2023-07-14 This book for parents is a step-by-step process in the field of positive behavioral management. It clearly and concisely explains how to develop positive parenting skills. It helps parents make positive adjustments to their behavior, as well as their child's and helps them facilitate their child into someone who takes the onus for his or her own learning, in order to become a self dependent and a regulated person. This field guide is specifically written with the parent in mind, and will provide strategies and techniques for setting up an atmosphere that is conducive to helping your child gain self-control, self-regulation and success in learning and life. Throughout the chapters, we reference and encourage parents to make a good home/school connection to further their child's growth and change of behavior from negative to positive by partnering with the school teacher and staff. Our Student Empowerment Program contains the 5 R's which are responsibility, reflection, rules, regulation and rubrics. Each of these 5 components is found in a separate chapter with details regarding how the parent will build the foundational skills needed for learning self control and self regulation, and will continue until the child is able to display the techniques and skills with little or no facilitation from the parent. The skills, techniques and activities are outlined in a process that provides the parents practice time for each of the strategies. Once the strategies are learned and are fairly successful, the parent is encouraged to move forward into learning another strategy, before finally putting all together in a culmination of what is "the new natural norm" for the household. These strategies include breathing techniques, use of positive "real" language developing through what we call sightings, the development of family rule and goal setting with clear boundaries. Behavioral consequences for rules broken are addressed in short, until the rules become true boundaries to live by, and are not broken any longer. Ultimately, the parental goal of our program is for the child and family to resort to breathing through the problem, learning self regulation and control, and choosing the right path to solving the problem without a meltdown, and in a responsible way. The book is filled with visualization techniques, surveys regarding reflection, rubrics for self assessment and suggestions to make positive changes in the atmosphere of the home when necessary. There is no additional cost, just commitment and the need to want to make the change by dedicating time and positive energy to the same.
