the master and margarita pdf: *Hungary and Other Emerging EU Countries in the Financial Storm* Júlia Király, 2020-08-18 This book analyzes the banking crisis and the events surrounding it in Hungary and other emerging EU member countries in 2007-2013. Written by Júlia Király, a former policymaker, and the Deputy Governor of the Hungarian Central Bank at the time of the crisis, it also offers a firsthand account of the processes in and responses to the financial crisis. While there is extensive literature on the crisis, most of it focuses on the US or the Eurozone, sometimes mentioning the "emerging world" in passing. However, Central and Eastern Europe experienced the crisis very differently than other emerging countries. In the pre-crisis years, the region in accession to the EU attracted abundant fresh capital, but the seemingly unconstrained

global liquidity fuelled credit bubbles. After the Lehman crisis, capital rapidly fled these countries. In this part of the world, the recession proved to be much worse than elsewhere, with double-digit growth soon turning into a double-digit decline in GDP. Several countries had to turn to the IMF and the EU for stand-by credit. Based on her own inside experience as a top central banker, the author offers a personal yet professional analysis of the causes and consequences of the financial hurricane.

the master and margarita pdf: *Drilling Down* Joseph A. Tainter, Tadeusz W. Patzek, 2011-09-18 For more than a century, oil has been the engine of growth for a society that delivers an unprecedented standard of living to many. We now take for granted that economic growth is good, necessary, and even inevitable, but also feel a sense of unease about the simultaneous growth of

complexity in the processes and institutions that generate and manage that growth. As societies grow more complex through the bounty of cheap energy, they also confront problems that seem to increase in number and severity. In this era of fossil fuels, cheap energy and increasing complexity have been in a mutually-reinforcing spiral. The more energy we have and the more problems our societies confront, the more we grow complex and require still more energy. How did our demand for energy, our technological prowess, the resulting need for complex problem solving, and the end of easy oil conspire to make the Deepwater Horizon oil spill increasingly likely, if not inevitable? This book explains the real causal factors leading up to the worst environmental catastrophe in U.S. history, a disaster from which it will take decades to recover.

the master and margarita pdf: Who Will Bring Me Home? Jan Willem Kirpestein, 2023-10-06 This book is a profound meditation on power and love and in its wake on trust and hope. The author offers a new approach of these ancient biblical values. If human love is fascinated by power, what is power's attraction and charm? Love is fascinated by a promise of rootedness in a real future life. This promise is experienced as a revelation of our true home. It means that human love is expecting something from the one who possesses power. Is he or she able to make the promise true? Power should be cute, otherwise it will be experienced as a repulsive force. However, without the possibility to become a repulsive force power is unable to unveil its executing force. But the promise needs to be unconditional. Love is a movement of one's free will. Therefore, love can become disappointed. How were love, trust, and hope at work in relation to Gods revelation in the Torah and at work in the consciousness and live of Jesus Christ? What does that mean for us?

the master and margarita pdf: Socialist Economic Systems Steven Rosefielde, 2023-06-29 Bernie Sanders' socialist advocacy in the United States, communist China's economic successes and a Marxist revival are inspiring many to muse about improved strategies for building superior socialist futures. Socialist Economic Systems provides an objective record of socialism's promises and performance during 1820-2022, identifies a feasible path forward and provides a rigorous analytic framework for the comparison of economic systems. The book opens by surveying pre-industrial utopias from Plato to Thomas More, and libertarian communal designs for superior living. It plumbs all aspects of the revolutionary and democratic socialist political movements that emerged after 1870 and considers the comparative economic, political and social performance of the USSR and others from the Bolshevik Revolution onwards. The book also provides case studies for all revolutionary Marxist-Leninist regimes, and supplementary discussions of Mondragon cooperatives, Israeli kibbutzim, Nordic corporatism and European democratic socialism. It investigates the theoretical and practical complexities of command-planning, reform communism, market communism, worker economic management and egalitarianism. It examines communism as an engine of economic growth, and a mechanism for improving people's quality of existence, including living standards, labor self-governance, egalitarianism, social justice, and prevention of crimes against humanity before addressing the perennial question of what needs to be done next. A suggested path forward is elaborated drawing lessons from the warts-and-all historical performance of socialist economies during 1917-2022 and failed socialist prophesy. The evidence indicates that the key to 21st-century socialism success lies in empowering workers of all descriptions to govern democratically for their mutual protection and welfare without the extraneous imposition of priorities imposed by other movements. The book is essential reading for anyone interested in socialism, political economy, comparative economic systems, and political and social history.

the master and margarita pdf: Humanity's Strings Ritwick Bhattacharjee, 2021-12-30
Humanity's Strings: Being, Pessimism, and Fantasy interrogates the nature of reality against fantasy as the two are presented to and created by the human consciousness—a consciousness that is in constant struggle with the omnipresence of misery and the inevitability of death. The book shows that being, pessimism, and fantasy as the strings which are made up of forces unseen, unknown, and ungoverned that control the human being like a puppet. Through a study of the metaphysical and existential philosophies of thinkers, such as Franz Brentano, Edmund Husserl, Søren Kierkegaard, Arthur Schopenhauer, Friedrich Nietzsche, and Jacques Derrida, the book interrogates not only how the self interacts with fantasy but why it does as well. It also asks why fantasy forces the self towards a unity that impacts existence in the modern world with its questions of justice, politics, and materiality. Furthermore, it situates the fantasy novels of authors, such as Stephen King, Brandon Sanderson, Douglas Adams, and Robert Jordan, as discourses which delineate the considerations above as ideas which modulate the existence of the human. Additionally, the book shows how it is not just the human that is affected by the machinations of the cosmos but also time and space—ostensibly a priori entities of existence—as these two interact with the human and its consciousness.

the master and margarita pdf: In the Labyrinth of the KGB Olga Bertelsen, 2022-02-15
2024 Winner, Kjetil Hatlebrekke Memorial Book Prize, King's College Centre for the Study of Intelligence This book focuses on the generation of the sixties and seventies in Kharkiv, Soviet Ukraine, a milieu of writers who lived through the Thaw and the processes of de-Stalinization and re-Stalinization. Special attention is paid to KGB operations against what came to be known as the dissident milieu, and the interaction of Ukrainians, Jews, and Russians in the movement, their persona friendships, formal and informal interactions, and the ways they dealt with repression and arrests. This study demonstrates that the KGB unintentionally facilitated the transnational and intercultural links among the Kharkiv multi-ethnic community of writers and their mutual enrichment. Post-Khrushchev Kharkiv is analyzed as a political space and a place of state violence aimed at combating Ukrainian nationalism and Zionism, two major targets in the 1960s-1970s. Despite their various cultural and social backgrounds, the Kharkiv literati might be identified as a distinct bohemian group possessing shared aesthetic and political values that emerged as the result of de-Stalinization under Khrushchev. Archival documents, diaries, and memoirs suggest that the 1960s-1970s was a period of intense KGB operations, "active measures" designed to disrupt a community of intellectuals and to fragment friendships, bonds, and support among Ukrainians, Russians, and Jews along ethnic lines domestically and abroad.

the master and margarita pdf: Developing Intercultural Competence and Transformation Victor Savicki, 2023-07-03 Enrollments in international education programs are projected to grow exponentially as students, parents, and university personnel seek to prepare future leaders who can live and work effectively in a global environment. What do we know about the outcomes of such programs, and how can educators become more intentional about designing,

and assessing, the impact of such courses? How can we help students achieve the intercultural growth and transformation that they may envision as they set forth on their international sojourn? International education provides opportunities for students to grow personally, and to learn in a rich and intense educational environment. The outcomes of such opportunities emphasize not only traditional academic competence, but also changes in motivations, attitudes, self-identity, and values. It is these latter, co-academic, concepts that are the focus of this book. Its goal is to give solid substance to the growth and transformation approach to study abroad. It defines the central concept of intercultural competence, sets it within the framework of transformative learning theory, and offers ideas and strategies for facilitating its development. In doing so, it goes far beyond traditional emphases on the achievement of such formal skills as foreign language acquisition or specific knowledge of course content in national literatures, arts, or history. This book provides study abroad educators with a theoretical framework and examples of practice to craft more meaningful activities that will make a long-term difference in the quality of student experiences, and set the stage for transformative change. If we plan to send a million students a year to study abroad within the decade, we need approaches to maximize student growth outcomes in an efficient and effective way. It is also relevant for anyone engaged in courses in adult education, college student services, comparative and international education, international business, intercultural relations, and service learning that involve study abroad, and that raise corresponding issues of curriculum design.
