modest proposal pdf: *The Human Right to Housing in the Face of Land Policy and Social Citizenship* Michael Kolocek, 2017-08-02 This book explores the human right to housing, presenting the findings of a global discourse analysis to analyse the right to housing from the perspective of theories on land policy and social citizenship. The book concludes that planners and policy makers will not be able to completely fulfil the human right to housing. For that reason, the book presents a theory of de-commodification of land use that highlights the meaning of land use rights for people affected by inadequate housing. Students and scholars across a range of disciplines, including social policy, global social policy, human rights law, discourse theory, and sociology will find this study of interest.

modest proposal pdf: *What's Yours Is Mine* Adam D. Thierer, Clyde Wayne Crews, 2003-05-25 In *What's Yours Is Mine: Open Access and the Rise of Infrastructure Socialism*, authors Adam Thierer and Clyde Wayne Crews Jr. examine the hazards of mandatory open access-- a trend in which hyper-regulatory bureaucrats and central planners are increasingly commanding technology companies and industry sectors to share networks, facilities, or specific technologies with rivals. Telephone and cable companies, wireless carriers, electric utilities, the Visa/Mastercard network, Microsoft's Windows operating system -- all these and more have been targets of demands for forced access. Although supporters claim that open access is pro-competitive, the opposite is true. Forced access policies inevitably mean price and quality controls, stagnation, increased litigation, and a crippling of innovation. Genuine competition requires that firms have the ability to exclude rivals. Government seizure of existing networks and technologies on behalf of rivals means that next-generation technologies will not be created by those rivals or the incumbents. The recent decision by the FCC to continue such micro-management of local telecom markets illustrates this principle; regulators have opted to continue to require sharing of local telephone lines and switches despite the fact that those rules have decimated innovation and investment in the U.S. telecom market. The key message for policymakers hoping for a high-tech renaissance: Competition in the creation of networks is as important as competition in the goods and services that get sold across those networks. Competition, innovation, and consumers will suffer if forced sharing policies are not abandoned. In today's world of increasing global communications and digital technologies, *What's Yours Is Mine* makes an urgently needed pro-consumer case for laissez-faire in the evolution of technology industries.

modest proposal pdf: Sustainable Communities Woodrow W. Clark II, 2010-01-12 This book would not have been possible without the dedication and commitment of each of the chapter authors. For some authors, writing a chapter was beyond their "9-5" job, and this book reflects their commitment to sustainability at the local level for their communities. To every chapter author and their staff, friends, and families, thank you. This dynamic and paradigm-changing volume on the topic of sustainable development is focused on communities such as cities, schools, and colleges where the future of our families and children are most at risk. We must act today as each of the chapters represents in their presentations. This book marks a new era: the Third Industrial Revolution. The new age of the Third Industrial Revolution has been labeled by some as the "green era" or "green economy," but it had already started around the world, especially in Europe and Japan, for over a decade - since the end of the 20th century. More significantly, the book highlights people and communities who have a shared concern and vision along with the will and determination to enact programs and policies that make sustainable development real - not just political rhetoric or "branding" or even the current "buzz word" for obtaining funds and grants. The book presents "The Sequel to an Inconvenient Truth" - actual examples of how communities can and have changed in order to mitigate climate change. Again, thanks to everyone and their colleagues.

modest proposal pdf: Handbook of Social Justice in Loss and Grief Darcy L. Harris, Tashel C. Bordere, 2016-02-05 The Handbook of Social Justice in Loss and Grief is a scholarly work of social criticism, richly grounded in personal experience, evocative case studies, and current multicultural and sociocultural theories and research. It is also consistently practical and reflective, challenging readers to think through responses to ethically complex scenarios in which social justice is undermined by radically uneven opportunity structures, hierarchies of voice and privilege, personal and professional power, and unconscious assumptions, at the very junctures when people are most vulnerable—at points of serious illness, confrontation with end-of-life decision making, and in the throes of grief and bereavement. Harris and Bordere give the reader an active and engaged take on the field, enticing readers to interrogate their own assumptions and practices while increasing, chapter after chapter, their cultural literacy regarding important groups and contexts. The Handbook of Social Justice in Loss and Grief deeply and uniquely addresses a hot topic in the helping professions and social sciences and does so with uncommon readability.

modest proposal pdf: **Government Control of News** Corydon B. Dunham, 2011-12-22 Because of the overwhelming changes in media within the past twenty years, First Amendment values are more vital than ever to this country's freedom. This thorough study brings to the forefront the reasons that government regulation of news content violates the public interest and the fundamental principles of the First Amendment. A recent FCC decision may even threaten the freedom of news on the Internet. The U.S. State Department urged at World Press Freedom Day in 2011 that journalists should not be the only ones standing for press freedom. Each one of us who recognize the value of an informed citizenry must also stand up for this fundamental right. - www.misa.org/mediarelease/pressfreedom.html I do not endorse any author's view. I am a mere writer, book editor, and book reviewer, but I can appreciate a superbly-researched and well-written book when I see one, regardless of that author's point of view. - The Bookpleasures.com Review

modest proposal pdf: US Intelligence Failure and Knowledge Creation Carl W. Ford, Jr., Kathleen M. Vogel, 2025-10-16 This book examines the roots and elements of the research and knowledge-generation problems in US intelligence. The work identifies the crux of the problem as

the lack of a research capability in US intelligence, which has developed over the past 40 years due to a variety of organizational decisions that prioritized current intelligence reporting and a focus on structural solutions to fix intelligence failures. The book argues that this is the principal cause of recent major intelligence failures regarding 9/11, the 2003 Iraq War, and the current Russia-Ukraine War. Throughout the book, the authors aim to provide short-, medium-, and long-term, policy-relevant recommendations to intelligence officials and members of the US Congress, in the form of workforce, leadership, and organizational changes that can be implemented to address existing research shortcomings in intelligence analysis. The book's conclusions will also be relevant to the intelligence agencies of other countries. This book will be of much interest to students of intelligence studies, national security, US politics, defense studies, and international relations.

modest proposal pdf: *Cryptoassets* Chris Brummer, 2019 Cryptoassets represent one of the most high profile financial products in the world, and fastest growing financial products in history. From Bitcoin, Ethereum and Ripple's XRP-so called utility tokens used to access financial services-to initial coin offerings that in 2017 rivalled venture capital in money raised for startups, with an estimated \$5.6 billion (USD) raised worldwide across 435 ICOs. All the while, technologists have hailed the underlying blockchain technology for these assets as potentially game changing applications for financial payments and record-keeping. At the same time, cryptoassets have produced considerable controversy. Many have turned out to be lacklustre investments for investors. Others, especially ICOs, have also attracted noticeable fraud, failing firms, and alarming lapses in information-sharing with investors. Consequently, many commentators around the world have pressed that ICO tokens be considered securities, and that concomitant registration and disclosure requirements attach to their sales to the public. This volume assembles an impressive group of scholars, businesspersons and regulators to collectively write on cryptoassets. This volume represents perspectives from across the regulatory ecosystem, and includes technologists, venture capitalists, scholars, and practitioners in securities law and central banking.

modest proposal pdf: *Feral* George Monbiot, 2014-09-26 An optimistic approach to

environmentalism that focuses on the wonders of rewilding, not just the terrifying consequences of climate change. To be an environmentalist early in the twenty-first century is always to be defending science and acknowledging the hurdles we face in our efforts to protect wild places and fight climate change. But let's be honest: hedging has never inspired anyone. So what if we stopped hedging? What if we grounded our efforts to solve environmental problems in hope instead, and let nature make our case for us? That's what George Monbiot does in *Feral*, a lyrical, unabashedly romantic vision of how, by inviting nature back into our lives, we can simultaneously cure our "ecological boredom" and begin repairing centuries of environmental damage. Monbiot takes readers on an enchanting journey around the world to explore ecosystems that have been "rewilded": freed from human intervention and allowed—in some cases for the first time in millennia—to resume their natural ecological processes. We share his awe as he kayaks among dolphins and seabirds off the coast of Wales and wanders the forests of Eastern Europe, where lynx and wolf packs are reclaiming their ancient hunting grounds. Through his eyes, we see environmental success—and begin to envision a future world where humans and nature are no longer in conflict, but are part of a single, healing world.

modest proposal pdf: [Human Rights and Economic Inequalities](#) Gillian MacNaughton, Diane Frey, Catherine Porter, 2021-09-02 Economic inequalities are among the greatest human rights challenges the world faces today due to the past four decades of neoliberal policy dominance. Globally, there are now over 2,000 billionaires, while 3.4 billion people live below the poverty line of US \$5.50 per day. Many human rights scholars and practitioners read these statistics with alarm, asking what impact such extreme inequalities have on realizing human rights and what role, if any, should human rights have in challenging them? This edited volume examines these questions from multiple disciplinary perspectives, seeking to uncover the relationships between human rights and economic inequalities, and the barriers and pathways to greater economic equality and full enjoyment of human rights for all. The volume is a unique contribution to the emerging literature on human rights and economic inequality, as it is interdisciplinary, global in reach and extends to several under-researched areas in the field.

modest proposal pdf: *The Meanings of Europe* Claudia Wiesner, Meike Schmidt-Gleim, 2014-01-03 What is Europe? What are the contents of the concept of Europe? And what defines European identity? Instead of only asking these classical questions, this volume also explores who asks these questions, and who is addressed with such questions. Who answers the questions, from which standpoints and for what reasons? Which philosophical, historical, religious or political traditions influence the answers? This book addresses its task in three parts. The first concentrates on the controversies around the meaning of Europe. The second focuses on the role of the European Union. The third discusses Europe and its relations to different types of otherness, or rather, non-European-ness. The volume produces a complex and plural picture of the concepts, ideas, debates and (ex)changes associated with the concept of Europe, and has a clear significance for today's debates on European identity, Europeanization, and the EU.

modest proposal pdf: Evaluation of the Information on Nutrition, Food Security and Resilience for Decision Making (INFORMED) Programme Food and Agriculture Organization of the United Nations , 2021-01-28 The INFORMED programme, implemented by FAO from 2015 to 2019, was designed to contribute to “increasing the resilience of livelihoods to threats and crises and contributing to the reduction of food insecurity and malnutrition”. The programme’s increased focus on Early Warning for Early Action (EWEA) was very relevant to fill existing gaps with a comparative advantage for FAO in slow onset and food chain crises contexts. Promoting the use of pre-agreed plans and pre-identified anticipatory actions, the project effectively improved risk analysis and decision making, including through the Global Report on Food Crises, and increased access to appropriate financing instruments, while the EWEA country toolkit initial positive spinoffs remain to be built on. Efforts to support resilience measurement and analyses by applying the resilience index measurement and analysis (RIMA) methodology are relevant given the significant investments in resilience programming and the continuing methodological gaps. However, although RIMA provides a basis for creating evidence on resilience investments, and FAO has been an important pioneer in resilience measurement, a wider system supporting resilience analysis is needed, based on a range of methodologies, responding to the information needs of decision-makers. Also, RIMA baseline lacks sufficient detail to allow articulating the feasibility of possible response options and have a practical impact on planning decisions; it has not demonstrated its added value over pre-existing food security, nutrition and risk indicators to help target interventions, and is not well adapted as an impact evaluation tool. Assessing INFORMED results against its intention to support knowledge production and sharing, to promote the replication of good practices and circular learning, the evaluation questioned the choice of creating a new knowledge management platform versus adopting a collaborative approach building on similar initiatives’ strengths. Poor strategic choices represented a fundamental constraint to reach intended objectives, such as, an insufficient understanding of users explaining the difficulty to trace the uptake and use of knowledge products. Nevertheless, the evaluation recognized the progressive investments in knowledge management and sizeable accomplishments of a relatively small team. The evaluation suggests strengthening capacities for the production and dissemination of forecast, scenario-based early warning as a basis for early action; developing a corporate strategy for partnering to strengthen early warning system capacities at various levels; promoting the use of a toolkit of approaches and investing in a knowledge management function dedicated to capturing and disseminating lessons on the effectiveness of EWEA and resilience interventions.
