pearsonsuccessnet: Managing the New Tools in K-12 Teaching and Learning Jerome A. Schulz, 2018-02-02 Managing the New Tools in K-12 Teaching and Learning: How Technology Can Enable School Improvement is about how to manage technology for learning at the district and school levels. It provides an overview of the components of learning technology; these include student devices, networking, software productivity toolkits, electronic curricula and resources, and data system infrastructure. And, it discusses how we can manage our technology efforts more effectively to help our students attain the benefits of this technology. The book concludes with case studies of how this is being done at pioneering districts. We are now at a tipping point in implementing learning technology on a larger scale. This is happening very quickly! Historically, learning technology was driven by a strategy of "technology integration," where we called on individual teachers to each determine how to use technology in their classes and make changes in their own ways of working. But to successfully implement technology on the scale we need requires top-down as well as bottom-up efforts. Managing the New Tools in K-12 Teaching and Learning focuses on how districts and schools can now use technology to bring about the big improvements in learning we are all striving for.

Millions of parents with children in public schools can't believe they're asking this question. But they are. And you should be asking it too. Almost overnight, America's public schools have become morally toxic. And they are especially poisonous for the hearts and minds of children from religious families of every faith—ordinary families who value traditional morality and plain old common sense. Parents' first duty is to their children—to their intellect, their character, their souls. The facts on the ground point to one conclusion: get out now.

When students are not progressing or “responding,” academically or behaviorally, to effective instructional conditions,

RtI includes a functional assessment/problem solving process to determine the reason(s) for the lack of success, and the implementation of strategic through intensive interventions to help those students progress and be successful. At an operational level, RtI is often described as working within a flexible, three-tiered system that is guided by students' academic and behavioral outcomes. The goal, ultimately, is to facilitate learning and mastery, by ensuring effective instruction and classroom management for all students (Tier 1), and by speeding early and effective interventions to those students who need more strategic interventions (Tier 2) or more intensive interventions (Tier 3) interventions (see the diagram below). Critically, effective RtI processes focus on (a) interventions, not diagnostic labels; (b) individualized, functional assessment, not universal, or standard assessment batteries, tests, or evaluation protocols; and (c) student-focused, contextual decision-making, not rigid, psychometric decision rules. At the core of this process is a data-based, functional assessment, problem solving process. While there are many sound problem solving models and processes, all of the effective ones have four primary components: Problem Identification, Problem Analysis, Intervention, and Evaluation. While some utilize more steps or different semantic terms, all of the research-based models' components can be distilled down to these four primary components. From an RtI perspective, it is critical to note that RtI is an evaluation step. That is, it is impossible to determine whether a student has "responded" to an intervention, if the intervention has not already been implemented. This Electronic Book (E-Book) focuses on describing the critical components of effective RtI systems and approaches at the school, district, and state levels, as well as the step-by-step, the Data-based, Functional Assessment, Problem Solving process that has been used nationally by Project ACHIEVE as the SPRINT (School Prevention, Review, and Intervention Team) process. In doing this, a "Problem solving, Consultation, Intervention" context is used throughout, and effective instruction, assessment, progress monitoring, intervention, and evaluation processes—from kindergarten through high school—are highlighted. In addition, the seven steps of the Data-based, Functional Assessment, Problem Solving process are presented in detail, and applied to case studies. Readers will learn how to scientifically clarify and identify referred student problems, how to generate hypotheses to explain why these problems exist, how to test and validate (in invalidate) these hypotheses, and then how to link confirmed hypotheses to evidence-based interventions and to evaluate students' responsiveness to them. Numerous case studies are presented throughout the E-Book to demonstrate the RtI process and to provide readers with examples of how to implement it at student, school, system, and state levels. Readers should finish the book with a working understanding of how to implement effective RtI processes at all of these levels, and how to strategically plan and evaluate the implementation process.

pearsonsuccessnet: Preparing the Ghost: An Essay Concerning the Giant Squid and Its First Photographer Matthew Gavin Frank, 2014-07-07 A New York Times Book Review Editors' Choice Selection Named one of the Best Books of the Year by Shelf Awareness Memory, mythology, and obsession collide in this "slyly charming" (New York Times Book Review) account of the giant squid. In 1874, Moses Harvey—eccentric Newfoundland reverend and amateur naturalist—was the first person to photograph the near-mythic giant squid, draping it over his shower curtain rod to display its magnitude. In *Preparing the Ghost*, what begins as Harvey's story becomes spectacularly "slippery and many-armed" (NewYorker.com) as Matthew Gavin Frank winds his narrative tentacles around history, creative nonfiction, science, memoir, and meditations about the interrelated nature of them all. In his full-hearted, lyrical style, Frank weaves in playful forays about his trip to Harvey's Newfoundland home, his own childhood and family history, and a catalog of peculiar facts that recall Melville's story of obsession with another deep-sea dwelling leviathan. "Totally original and haunting" (Flavorwire), *Preparing the Ghost* is a delightfully unpredictable inquiry into the big, beautiful human impulse to obsess.

pearsonsuccessnet: Mapping Corporate Education Reform Wayne Au, Joseph J. Ferrare, 2015-04-10 Mapping Corporate Education Reform outlines and analyzes the complex relationships between policy actors that define education reform within the current, neoliberal context. Using social network analysis and powerful data visualization tools, the authors identify the problematic roots of these relationships and describe their effects both in the U.S. and abroad. Through a series of case studies, each chapter reveals how powerful actors, from billionaire philanthropists to multinational education corporations, leverage their resources to implement free market mechanisms within public education. By comprehensively connecting the dots of neoliberal education reforms, the authors reveal not only the details of the reforms themselves, but the relationships that enable actors to amass troubling degrees of political power through network governance. A critical analysis of the actors and interests behind education policies, Mapping Corporate Education Reform uncovers the frequently obscured operations of educational governance and offers key insights into education reform at the present moment.

This helpful guide is packed with fresh material, including * More than 40 new and updated step-by-step lessons and minilessons that reflect current thinking and best practice. * Dozens of rich suggestions for diving into informational texts. * Updated research and relevant results that show the effectiveness of reciprocal teaching. * Creative and targeted tips that capitalize on the specific benefits of whole-class settings, guided reading groups, and literature circles. * Ideas for differentiating instruction for struggling readers and English language learners. * New and newly designed support materials, including reproducibles, posters, bookmarks, and a lesson planning menu. With a wealth of ideas to get you started—and keep you going—this is the all-inclusive resource you need to help students become active, engaged, and independent readers who truly comprehend what they read. Reviews and Testimonials Literacy coach and author Lori Oczkus knows how to take the best of what works from long-established research and showcase it to make teaching and learning more effective, engaging, and enjoyable. In her latest edition of Reciprocal Teaching at Work, she demonstrates how to scaffold instruction so that all K-12 students can benefit from reciprocal teaching techniques, what she calls the Fab Four—predicting, questioning, clarifying, and summarizing—in whole-group, guided reading, and book club settings, for both fiction and informational texts. In clearly delineated lessons and minilessons, Lori deftly shares how to support students' learning, including English language learners and students who struggle, so they can successfully apply and monitor those four discussion strategies—as well as troubleshoot problems—to yield significant progress in their reading comprehension. Filled with

Through these engaging lessons and smart instructional moves, you will empower your students to build the confidence and competence they need to become strong, independent readers. —Donalyn Miller, author of *The Book Whisperer* On every page of this book, in every activity and plan, the voice of a gifted and empowering teacher inspires the reader. In a major revision of her classic work, Lori Oczkus engages the immediacy and demands of today's classrooms with the most robust constellation of strategies for teaching comprehension. She compellingly demonstrates how the Fab Four are engaged across the grades, and she powerfully scaffolds, supports, and reassures teachers in their efforts to incorporate reciprocal teaching across a broad communication, textual, and digital terrain. —Shane Templeton, Foundation Professor Emeritus of Literacy Studies University of Nevada, Reno, NV
