smithwesson forum: Save me from the Lion's Mouth James Clarke, 2013-09-18 Save Me From the Lion's Mouth investigates the increasing conflict between people and wildlife in Africa and what needs to be done about it. It describes the human suffering and perceptions of those who live outside the reserve fences among man-eaters and marauders yet are excluded from the economic benefits accruing from the wildlife around them. It provides evidence of a growing resentment among rural communities, especially near game reserves and warns how it is threatening the existence of Africa's game reserves. The book suggests that many in the Northern Hemisphere who support African wildlife conservation are blind to the seriousness of the situation. Some African states - notably Kenya and Tanzania - adopt wildlife policies to please donor countries from whom they receive millions of dollars. Thus government policies, many of them patently disastrous and certainly detrimental to rural Africans and to wildlife, are dictated from middle class homes across Europe and America. Fortunately there is a growing international lobby that is seeking solutions.

smithwesson forum: An Evil Day in Georgia Robert Neil Smith, 2015-04-15 Follows a homicide case committed in Georgia in 1927 from the crime to the executions of those convicted of the crime almost a year later. Along the way, the narrative highlights a number of issues impacting the death penalty process, many of which are still relevant in the modern era of capital punishment in the United States ... Moreover, the case in question illustrates a range of themes prevalent in post-Progressive Georgia and brings them together to create a broader narrative. Thus, issues of race, class, and gender emerge from what was supposed to be a neutral process; ... demonstrates that capital punishment cannot be administered in an untainted fashion, but its finality demands that it must be--From Athenaeum@UGA website.

The book dives right into the process of creating a production-level web application using agile methodologies and test-driven development combined with Rails best practices. You'll take advantage of the latest crop of Rails plug-ins and helpers that will radically improve your programming schedule. You'll also create a real application step-by-step, plus the book is driven by real-world cases throughout. You will begin by learning how to install Rails and quickly create a product catalog interfaced with your choice of database technologies. Then you'll discover how to build modern, Ajax-powered shopping carts and add useful features like customer feedback modules. Next you'll learn how to integrate your application with open source packages like the Ferret full-text search engine, and how to interface with back-end electronic payment systems. You'll also learn how to make your application work flawlessly with existing production systems using web services, and then ultimately deploy and tune your application for

production use.

That's the premise underlying litigation against manufacturers of cigarettes, guns, lead paint, fatty foods, and alcoholic beverages. Meanwhile, our antitrust laws have been co-opted by frustrated competitors who curry favor with bureaucrats to attack market leaders such as Microsoft. In effect, antitrust is now a subsidy used to promote the parochial interests of politically favored companies. In *Shakedown*, Robert A. Levy uncovers the worst abuses of a judicial system run amok, then offers concrete proposals to fix the problems.

smithwesson forum: **The New Power Politics** Deborah Avant, Oliver Westerwinter, 2016-06-02 Traditional analyses of global security cannot explain the degree to which there is governance of important security issues -- from combatting piracy to curtailing nuclear proliferation to reducing the contributions of extractive industries to violence and conflict. They are even less able to explain why contemporary governance schemes involve the various actors and take the many forms they do. Juxtaposing the insights of scholars writing about new modes of governance with the logic of network theory, *The New Power Politics* offers a framework for understanding contemporary security governance and its variation. The framework rests on a fresh view of power and how it works in global politics. Though power is integral to governance, it is something that emerges from, and depends on, relationships. Thus, power is dynamic; it is something that governors must continually cultivate with a wide range of consequential global players, and how a governor uses power in one situation can have consequences for her future relationships, and thus, future power. Understanding this new power politics is crucial for explaining and shaping the future of global security politics. This stellar group of scholars analyzes both the networking strategies of would-be governors and their impacts on the effectiveness of governance and whether it reflects broad or narrow concerns on a wide range of contemporary governance issues.

Although social media in their many forms have only come to dominate modern U.S. life during the past decade, there has been little academic exploration of gun owner communities on the Internet and social media. How do gun owners use social media? How do they meet other gun owners online? What do they talk about as relates to guns?
