the norton anthology of american literature 10th edition pdf: LatinAsian Cartographies Susan Thananopavarn, 2018-03-19 LatinAsian Cartographies examines how Latina/o and Asian American writers provide important counter-narratives to the stories of racial encroachment that have come to characterize twenty-first century dominant discourses on race. Susan Thananopavarn contends that the Asian American and Latina/o presence in the United States, although often considered marginal in discourses of American history and nationhood, is in fact crucial to understanding how national identity has been constructed historically and continues to be constructed in the present day. Thananopavarn creates a new "LatinAsian" view of the United States that emphasizes previously suppressed aspects of national history, including imperialism, domestic racism during World War II, Cold War operations in Latin America and Asia, and the politics of borders in an age of globalization. LatinAsian Cartographies ultimately reimagines national narratives in a way that transforms dominant ideas of what it means to be American.

the norton anthology of american literature 10th edition pdf: *Veer Ecology* Jeffrey Jerome Cohen, Lowell Duckert, 2017-12-15 The words most commonly associated with the environmental movement—save, recycle, reuse, protect, regulate, restore—describe what we can do to help the environment, but few suggest how we might transform ourselves to better navigate the sudden turns of the late Anthropocene. Which words can help us to veer conceptually along with drastic environmental flux? Jeffrey Jerome Cohen and Lowell Duckert asked thirty brilliant thinkers to each propose one verb that stresses the forceful potential of inquiry, weather, biomes, apprehensions, and desires to swerve and sheer. Each term is accompanied by a concise essay contextualizing its meaning in times of resource depletion, environmental degradation, and global climate change. Some verbs are closely tied to natural processes: compost, saturate, seep, rain, shade, sediment, vegetate, environ. Many are vaguely unsettling: drown, unmoor, obsolesce, power down, haunt. Others are enigmatic or counterintuitive: curl, globalize, commodify, ape, whirl. And while several verbs pertain to human affect and action—love, represent, behold, wait, try, attune, play, remember, decorate, tend, hope—a primary goal of *Veer Ecology* is to decenter the human. Indeed, each of the essays speaks to a heightened sense of possibility, awakening our imaginations and inviting us to think the world anew from radically different perspectives. A groundbreaking guide for the twenty-first century, *Veer Ecology* foregrounds the risks and potentialities of living on—and with—an alarmingly dynamic planet. the norton anthology of american literature 10th edition pdf: Decolonizing Literature Anna Bernard, 2023-08-15 Recent efforts to diversify and decentre the literary canon taught at universities have been moderately successful. Yet this expansion of our reading lists is only the start of a broader decolonization of literary studies as a discipline; there is much left to be done. How can students and educators best participate in this urgent intellectual and political project? Anna Bernard argues that the decolonization of literary studies requires a change to not only what, but how, we read. In lively prose, she explores work that has already been done, both within and beyond the academy, and challenges readers to think about where we go from here. She suggests ways to recognize and respond to the political work that texts do, considering questions of language and translation, comparative reading, ideological argument, and genre in relation to the history of anticolonial struggle. Above all, Bernard shows that although we still have far to go, the work of decolonizing literary studies is already under way. *Decolonizing Literature* is a must-have resource for all those concerned by the development and future of the field.
