- Understand the evaluation criteria for your role.
- Communicate regularly with your rater to ensure mutual understanding of expectations.
- Seek feedback proactively to improve performance before the evaluation.

Best Practices for Completing an Effective OER

For raters and officers alike, the quality of the OER is directly impacted by preparation and clarity.

Here are some best practices:

1. Be Specific and Objective

- Highlight competencies such as tactical proficiency, strategic thinking, and adaptability.

3. Provide Constructive Feedback

- Balance recognition of strengths with areas for improvement.

- Offer actionable suggestions to enhance future performance.

4. Focus on Potential

- When assessing potential, consider leadership qualities, adaptability, and capacity for increased responsibility.
- Be honest but fair, avoiding overly conservative or overly optimistic assessments.

5. Use the Narrative Sections Wisely

- Write clear, concise, and impactful comments.

Common Challenges and How to Address Them

While the Army OER process is designed to be straightforward, common issues can arise:

- Inconsistent Ratings: Ensuring fairness and objectivity requires understanding the rating scale and avoiding bias.
- Lack of Supporting Examples: Ratings without concrete examples weaken credibility.
- Failure to Meet Deadlines: Timely submission is crucial; plan ahead to avoid delays.

Solutions:

- Regularly review Army evaluation standards.
- Keep ongoing documentation of performance activities.
- Communicate early with raters to clarify expectations and timelines.

The Significance of the Army OER Form in Career Development

A well-crafted OER can significantly influence an officer's career trajectory. High ratings and positive comments can:

- Accelerate promotion prospects.

army oer form: U.S. Army Officer Perceptions of the New OER (DA Form 67-8). Allan C. Hardy, Keith B. Harker, 1982 The U.S. Army has long been trying to develop a performance appraisal system which allows selection boards at Department of the Army to discriminate among officers (for promotion, schooling, and assignments), while also providing for the professional

development and counseling of these officers. The current Army Officer Evaluation Report which was adopted in November 1979, is largely based upon the concepts of management by objectives (MBO). In order to determine the perceptions of Army Officers in the field concerning this OER, a sample of officers in the grades of O-3, O-4, and O-5 from the three Army installations in Central California was surveyed by the authors. The results of this survey show a high general level of support for keeping the present OER, even though specific problem areas do exist where the perceptions of the officers surveyed differ significantly from published official statements and policy. In those monographs, Wardynski, Lyle, and Colarusso adumbrated an officer corps strategy based on the theory of talent management. This volume aims to provide a historical context for their discussion of an officer strategy (and for what has passed for such a strategy in the past). Like the earlier monographs, this volume is organized around the functionally interdependent concepts of accessing, developing, retaining, and employing talent. Each chapter will take the reader up to the point where the earlier monographs began their story, which generally falls in the timeframe of the late-1980s and early-1990s. The purpose of the present volume is to supplement these OEMA (Office of Economic and Manpower Analysis) monographs by providing a historical context for their discussion of an officer strategy. First an overview is provided, outlining some key developments and assumptions that have guided and shaped the Officer Corps and the way it has been managed over the last century.
