difficult conversations pdf: *Sacramental Theology* Bruce T. Morrill, 2019-11-18 Throughout the second half of the twentieth century, sacramental theology has evolved as a discipline advancing comprehensive theories of sacraments and sacramentality as integral to the Christian faith while also studying the history and theology of the particular rites. Now, in the twenty-first century, the need for attention to the actual performance and specific social settings of sacramental worship has become well established. This makes the work of sacramental theology necessarily engaged with multiple, cross-disciplinary theories attentive to particular contexts, whether local, national, or global. Still, the divine human encounter at the heart of Christian symbol and ritual likewise beckons to philosophical-theological reflection. The essays in this volume begin with profound philosophical perspectives on the personal and communal sacramental experience, expanding from traditional cosmology to evolutionary and chaos theories of our planetary existence, continuing with shifts, especially among youth, to interreligious and non-institutional perspectives, consideration of change in popular notions of guilt, and social-ethical issues in relation to liturgical theology and practice, so as finally to return to fundamental theological reflection on human sacramentality and divine revelation.

difficult conversations pdf: Untranslatability Duncan Large, Motoko Akashi, Wanda Józwikowska, Emily Rose, 2018-07-27 This volume is the first of its kind to explore the notion of untranslatability from a wide variety of interdisciplinary perspectives and its implications within the broader context of translation studies. Featuring contributions from both leading authorities and emerging scholars in the field, the book looks to go beyond traditional comparisons of target texts and their sources to more rigorously investigate the myriad ways in which the term untranslatability is both conceptualized and applied. The first half of the volume focuses on untranslatability as a theoretical or philosophical construct, both to ground and extend the term's conceptual remit, while the second half is composed of case studies in which the term is applied and contextualized in a diverse set of literary text types and genres, including poetry, philosophical works, song lyrics, memoir, and scripture. A final chapter examines untranslatability in the real world and the challenges it brings in practical contexts. Extending the conversation in this burgeoning contemporary debate, this volume is key reading for graduate students and researchers in translation studies, comparative literature, gender studies, and philosophy of language. The editors are grateful to the University of East Anglia Faculty of Arts and Humanities, who supported the book with a publication grant.
