encouragement letter to students: *How College Students Succeed* Nicholas A. Bowman, 2023-07-03 Receiving a college education has perhaps never been more important than it is today. While its personal, societal, and overall economic benefits are well documented, too many college students fail to complete their postsecondary education. As colleges and universities are investing substantial resources into efforts to counter these attrition rates and increase retention, they are mostly unaware of the robust literature on student success that is often bounded in disciplinary silos. The purpose of this book is to bring together in a single volume the extensive knowledge on college student success. It includes seven chapters from authors who each synthesize the literature from their own field of study, or perspective. Each describes the theories, models, and concepts they use; summarizes the key findings from their research; and provides implications for practice, policy, and/or research. The disciplinary chapters offer perspectives from higher education, public policy, behavioral economics, social psychology, STEM, sociology, and critical and post-structural theory.

encouragement letter to students: The Reader of Gentlemen's Mail David Kahn, 2008-10-01 One of the most colorful and controversial figures in American intelligence, Herbert O. Yardley (1889-1958) gave America its best form of information, but his fame rests more on his indiscretions than on his achievements. In this highly readable biography, a premier historian of military intelligence tells Yardley's story and evaluates his impact on the American intelligence community. Yardley established the nation's first codebreaking agency in 1917, and his solutions helped the United States win a major diplomatic victory at the 1921 disarmament conference. But when his unit was closed in 1929 because gentlemen do not read each other's mail, Yardley wrote a best-selling memoir that introduced-and disclosed-codemaking and codebreaking to the public. David Kahn de-scribes the vicissitudes of Yardley's career, including his work in China and Canada, offers a capsule history of American intelligence up to World War I, and gives a short course in classical codes and ciphers. He debunks the accusations that the publication of Yardley's book caused Japan to change its codes and ciphers and that Yardley traitorously sold his solutions to Japan. And he asserts that Yardley's disclosures not only did not hurt but actually helped American codebreaking during World War II.

encouragement letter to students: Microhistories of Composition Bruce McComiskey, 2016-04-01 Writing studies has been dominated throughout its history by grand narratives of the discipline, but in this volume Bruce McComiskey begins to explore microhistory as a way to

understand, enrich, and complicate how the field relates to its past. Microhistory investigates the dialectical interaction of social history and cultural history, enabling historians to examine uncommon sites, objects, and agents of historical significance overlooked by social history and restricted to local effects by cultural history. This approach to historical scholarship is ideally suited for exploring the complexities of a discipline like composition. Through an introduction and eleven chapters, McComiskey and his contributors—including major figures in the historical research of writing studies, such as Louise Wetherbee Phelps, Kelly Ritter, and Neal Lerner—develop focused narratives of particular significant moments or themes in disciplinary history. They introduce microhistorical methodologies and illustrate their application and value for composition historians, contributing to the complexity and adding momentum to the emerging trend within writing studies toward a richer reading of the field's past and future. Scholars and historians of both composition and rhetoric will appreciate the fresh perspectives on institutional and disciplinary histories and larger issues of rhetorical agency and engagement enacted in writing classrooms that are found in *Microhistories of Composition*. Other contributors include Cheryl E. Ball, Suzanne Bordelon, Jacob Craig, Matt Davis, Douglas Eyman, Brian Gogan, David Gold, Christine Martorana, Bruce McComiskey, Josh Mehler, Annie S. Mendenhall, Kendra Mitchell, Antony N. Ricks, David Stock, Kathleen Blake Yancey, Bret Zawilski, and James T. Zebroski.
