history alive the ancient world: *Rule Makers, Rule Breakers* Michele Gelfand, 2019-08-20 A celebrated social psychologist offers a radical new perspective on cultural differences that reveals why some countries, cultures, and individuals take rules more seriously and how following the rules influences the way we think and act. In *Rule Makers, Rule Breakers*, Michele Gelfand, “an engaging writer with intellectual range” (The New York Times Book Review), takes us on an epic journey through human cultures, offering a startling new view of the world and ourselves. With a mix of brilliantly conceived studies and surprising on-the-ground discoveries, she shows that much of the diversity in the way we think and act derives from a key difference—how tightly or loosely we adhere to social norms. Just as DNA affects everything from eye color to height, our tight-loose social coding influences much of what we do. Why are clocks in Germany so accurate while those in Brazil are frequently wrong? Why do New Zealand’s women have the highest number of sexual partners? Why are red and blue states really so divided? Why was the Daimler-Chrysler merger ill-fated from the start? Why is the driver of a Jaguar more likely to run a red light than the driver of a plumber’s van? Why does one spouse prize running a tight ship while the other refuses to sweat the small stuff? In search of a common answer, Gelfand spent two decades conducting research in more than fifty countries. Across all age groups, family variations, social classes, businesses, states, and nationalities, she has identified a primal pattern that can trigger cooperation or conflict. Her fascinating conclusion: behavior is highly influenced by the perception of threat. “A useful and engaging take on human behavior” (Kirkus Reviews) with an approach that is consistently riveting, *Rule Makers, Rule Breakers* thrusts many of the puzzling attitudes and actions we observe into sudden and surprising clarity.

history alive the ancient world: *Reclaiming a Plundered Past* Magnus T. Bernhardsson, 2005
The looting of the Iraqi National Museum in April of 2003 provoked a world outcry at the loss of artifacts regarded as part of humanity's shared cultural patrimony. But though the losses were unprecedented in scale, the museum looting was hardly the first time that Iraqi heirlooms had been plundered or put to political uses. From the beginning of archaeology as a modern science in the nineteenth century, Europeans excavated and appropriated Iraqi antiquities as relics of the birth of Western civilization. Since Iraq was created in 1921, the modern state has used archaeology to forge a connection to the ancient civilizations of Mesopotamia and/or Islamic empires and so build a sense of nationhood among Iraqis of differing religious traditions and ethnicities. This book delves into the ways that archaeology and politics intertwined in Iraq during the British Mandate and the first years of nationhood before World War II. Magnus Bernhardsson begins with the work of British archaeologists who conducted extensive excavations in Iraq and sent their finds to the museums of Europe. He then traces how Iraqis' growing sense of nationhood led them to confront the British over antiquities law and the division of archaeological finds between Iraq and foreign excavators. He shows how Iraq's control over its archaeological patrimony was directly tied to the balance of political power and how it increased as power shifted to the Iraqi government. Finally he examines how Iraqi leaders, including Saddam Hussein, have used archaeology and history to legitimize the state and its political actions.

history alive the ancient world: *Mediterranean Collections in Australia and Aotearoa New Zealand* Candace Richards, Elizabeth Minchin, 2025-04-04 This volume brings together academics and museum professionals responsible for ancient Mediterranean collections across Australia and Aotearoa New Zealand to report on their collections' legacies and their ongoing value for research, education, and community engagement in the twenty-first century. An introductory chapter offers an overview of the themes that unite these Mediterranean collections: their colonial legacies, their more recent history, and the network of scholars who have fostered their development. Subsequent chapters offer thematic case studies from the perspective of curators, museum professionals, educators, and researchers working with collections across Australasia. They explore several themes, including museum archaeology, provenance studies, pedagogy, and participatory programming and engagement, and they address two issues that are of interest to everyone who engages with museum collections today: restitution and the ethical management and display of human remains. Taken together, these contributions situate the region's collections on a global scale, highlighting their continued relevance in the present and for the future. The volume includes a distribution guide to all known ancient Mediterranean collections in Australia and Aotearoa New Zealand, a much-needed resource for students, provenance researchers, and museum professionals. This volume will be of interest to researchers in Mediterranean archaeology and related disciplines, to museum studies scholars and postgraduate students, and to a general audience.
