mission impossible sheet music: Missions Impossible John Waterbury, 2020-10-06 A rigorous examination of higher education policymaking in the Arab world None of the momentous challenges Arab universities face is unique either in kind or degree. Other societies exhibit some of the same pathologies—insufficient resources, high drop-out rates, feeble contributions to research and development, inappropriate skill formation for existing job markets, weak research incentive structures, weak institutional autonomy, and co-optation into the political order. But, it may be that the concentration of these pathologies and their depth is what sets the Arab world apart. Missions Impossible seeks to explain the process of policymaking in higher education in the Arab world, a process that is shaped by the region’s politics of autocratic rule. Higher education in the Arab world is directly linked to crises in economic growth, social inequality and, as a result, regime survival. If unsuccessful, higher education could be the catalyst to regime collapse. If successful, it could be the catalyst to sustained growth and innovation—but that, too, could unleash forces that the region’s autocrats are unable to control. Leaders are risk-averse and therefore implement policies that tame the universities politically but in the process sap their capabilities for innovation and knowledge creation. The result is sub-optimal and, argues John Waterbury in this thought-provoking study, unsustainable. Skillfully integrating international debates on higher education with rich and empirically informed analysis of the governance and finance of higher education in the Arab world today, Missions Impossible explores and dissects the manifold dilemmas that lie at the heart of educational reform and examines possible paths forward.

Pop music didn't begin with the Beatles in 1963, or with Elvis in 1956, or even with the first seven-inch singles in 1949. There was a pre-history that went back to the first recorded music, right back to the turn of the century. Who were these earliest record stars—and were they in any meaningful way pop stars? Who was George Gershwin writing songs for? Why did swing, the hit sound for a decade or more, become almost invisible after World War II? The prequel to Bob Stanley’s celebrated Yeah! Yeah! Yeah!, this new volume is the first book to tell the definitive story of the birth of pop, from the invention of the 78 rpm record at

the end of the nineteenth century to the beginnings of rock and the modern pop age. Covering superstars such as Louis Armstrong, Bessie Smith, Duke Ellington and Frank Sinatra, alongside the unheralded songwriters and arrangers behind some of our most enduring songs, Stanley paints an aural portrait of pop music's formative years in stunning clarity, uncovering the silver threads and golden needles that bind the form together. It’s an essential read for reference librarians (both public and academic), library administrators, and library school students, as well as anyone who works with the public.
