northouse leadership 9th edition pdf: The Dark Side of Leadership: A Cross-Cultural Compendium Adebukola Oyewunmi, Gill Owens, Ogechi Adeola, 2025-06-16 The corporate landscape is rife with instances of leaders who have left a trail of sinister outcomes. In the last three decades, the research in leadership and organisational sciences has expanded in theoretical and typological breadth to include the dark side. These works have aimed at uncovering the complex interplay of personalities, power dynamics, and organisational cultures that can lead to destructive and unethical behaviours in the workplace. While there are volumes of literature on leadership, there is a dearth of research that integrates dark leadership and cross-cultural norms, perspectives, variances, and interventions. The Dark Side of Leadership: A Cross-Cultural Compendium is a collaborative and transdisciplinary venture that draws on the knowledge and experiences of practitioners and scholars across the globe to explore the contentious and evolving subject of dark leadership. northouse leadership 9th edition pdf: Sustainability Management and Strategy Igazeuma Adikema Okoroba, Enoch Opare Mintah, Robert Ebo Hinson, 2025-06-30 With Africa predicted to emerge as a leading market in the coming years, the debate on sustainability, especially on the mitigation of business impact on the continent's environment and society, cannot be underestimated. Prior to the worsening impact of climate change, the continent has historically been struggling to consolidate sustainability efforts in driving social and environmental protection caused by both foreign (majorly) and local business activities in the region. To capture current social and environmental injustice plaguing the African continent, Secretary-General Prof. Petteri Taalas of the World Meteorological Organization (WMO) opined that Africa is responsible for less than 10 percent of global greenhouse gas emissions, but it is the continent which is the least able to cope with the negative impacts of climate change. Heatwaves, heavy rains, floods, tropical cyclones, and prolonged droughts are having devastating impacts on communities and economies, with increasing

numbers of people at risk. Sustainability Reporting Frameworks have empowered sustainability leaders, most especially Chief Sustainability Officers (CSOs), in organizations to develop practical strategies for leading sustainability-related issues while driving systemic change for collective thinking towards mitigating the impact of climate change on society and the environment. While there is undoubtedly a plethora of standards, codes, and toolkits to help frame the sustainability drive, with leading CSOs around the globe sharing their lived experiences, the narrative for best practices, and what the content of sustainability initiatives and reporting should be have been skewed to the Western or advanced economies' narrative. This reporting has drowned out other continent-specific narratives that offer a diverse pool of perspectives and locally rich content on some sustainability actions and achievements, especially from CSOs. The role of business sustainability leaders and CSOs in Africa in positioning the continent as the market of tomorrow with sound and robust sustainability practices needs to be spotlighted. Owing to the gap, this book brings the urgency to light through case studies and stories from leading African businesses, while capturing their sustainability strategies and achievements. This book moves beyond the experience and context of business in advanced economies and responds to the need for an alternative narrative of sustainability leadership in Africa. The focus of this book is on the role of sustainability leadership over the last decade and discusses the contributions and challenges of navigating this multi-disciplinary function in different sectors. The authors share their insight into this under-researched and under-reported perspective highly relevant to business and sustainability, and environmental, social, and governance (ESG) reporting in a growing region like Africa.

northouse leadership 9th edition pdf: Value-creation in Middle Market Private Equity John A. Lanier, 2016-02-17 Value-creation in Middle Market Private Equity by John A. Lanier holistically examines the ecosystem relationships between middle market private equity firms and their portfolio companies. Small business is the job creating engine in the US economy, and consequently is a prime target market for private equity investment. Indeed, private equity backs over six of each 100 private sector jobs. Both the small businesses in which private equity firms invest, and the private equity firms making the investments, face inter- and intra-company fiduciary leadership challenges while implementing formulated strategy. The architecture of each private equity firm-portfolio company relationship must be uniquely crafted to capitalize on the projected return on investment that is memorialized in the investment thesis. Given the leveraged capital structure of portfolio companies, the cost of a misstep is problematic. Individual private equity professionals are typically members of multiple investment teams for the firm. Not only may each investment team have its own unique leadership style, but its diverse members have to assimilate styles for each team in which they participate relative to a specific portfolio company. Acquisitions and their subsequent integrations add exponential complexity for both private equity investment and portfolio company leadership teams; indeed, cultural integration ranks among the most chronic acquisition obstacles. Accordingly, the stakeholders of private equity transactions do well to embrace leadership best practices in applying value-creation toolbox best practices. The perspectives of both the private equity investment team and the portfolio company leadership team are within the scope of these chapters.
