secret stories free pdf: *Conjunction.World* Elly Flippen, 2024-10-05 A must read. I cannot recommend highly enough. Bring a lot of highlighters. This book has been blowing me away. I'd say it's a must read. So far it has validated certain thoughts I've had and experienced, regarding OBE/NDE, UAPs, the cover up, our history, consciousness - and brought new ideas forward. Very well written and organized with detailed footnotes with references. You could almost use it like a guidebook in research. It's amazing how much we actually have in common with one another. My uncle, the renowned Ingo Swann, was a man of mystery and intrigue. As one of the US Government's top psychic spies, he held secrets that few knew and even fewer understood. One day, he confided in me with a hushed tone and a glint in his eye: "We are not alone on this planet." This wasn't entirely new to me. I had encountered numerous inexplicable events, but I couldn't believe they were actually real. It just seemed too impossible. Years later, however, my curiosity drove me to learn more. Amidst this learning adventure, I stumbled upon a declassified briefing from 1973 stating a group of Nazis was to blame for releasing an arcane terror upon the world. Unless one is deeply rooted in the essence of the divine, the paper concludes, they will not survive this perilous journey into the ominous world of existence. In other words, if you want to survive in the actual reality we live in, you better be well-equipped with some heavy-duty light protection. After that moment, my inquisitiveness was sparked. I dove in headfirst, compiling theories about non-human entities. From potential extraterrestrial origins to interdimensional beings, I unraveled a complex narrative about advanced technology that could account for the anomalous aerial and aquatic vehicles we have witnessed. But my explorations didn't end there - I also embarked on a journey to understand the evolution of Remote Viewing, also known as psychic spying. Along the way, I discovered fascinating connections between Remote Viewing, UFO bases, and encounters with non-human beings. I then found myself venturing into mysterious lands shrouded in secrecy. Places where barriers and gateways intertwined, where "haunted spaces" lingered and temporal distortions shifted reality. I encountered apparitions, witnessed unexplainable events, and had enigmatic experiences with UFOs/UAPs - which I began to view as vision quests. As my investigation progressed, I uncovered hidden secrets about our world - first-hand accounts of untold tales from the lands where reality blends with the unknown; the places where the mirror has cracks.

secret stories free pdf: *International Journal of Transmedia Literacy (IJTL) Vol 1, No 1 (2015)* AA. VV., 2016-04-20T15:05:00+02:00 Forms of fiction and literature underwent a process of disembodiment and cross-fertilization during the revolution from the Gutenberg Galaxy (printed paper, mass distribution) to the McLuhan Galaxy (new media, hypertext, cooperative writing). The dimension of literacy has moved from a semiotically measured geometry to a dislocation and a deconstruction of contents and channels that give expression to new products. The impact of social media on narratology has redefined the meaning of readership and authorship. The author not only loses his/her traditional role, but becomes an icon of himself/herself, a collective-minded producer that is self-perceived through the extroflexed eye of the amniotic network in which he/she defines his/her narrative experience. Transmedia culture defines a new cross-networked and amniotic literacy, considering that we are not facing a simple adaptation of different narrative forms from one media to another: different media and languages participate and contribute to the construction of a transmedia environment. The first issue of the IJTL seeks to shed light on transmedia literacy according to the epistemological crisis of authorship and the new dimension of participation and relationship offered by both the Web and New Media. Moving from the state of the art, the aim is to investigate the interdisciplinary relations in the field of transmedia literacy, in order to favour a pattern recognition about theories, technologies, and social dimensions of the phenomena to offer a critical toolkit to understand and map out the emerging knowledge and practices created by this new field.
