Speech On Welcome Party

speech on welcome party: Itō Hirobumi - Japan's First Prime Minister and Father of the Meiji Constitution Takii Kazuhiro, 2014-01-21 The brilliant and influential statesman, Itō Hirobumi (1841-1909), and the first prime minister of Japan's modern state, has been poorly understood. This biography attempts to set the record straight about Itō's thought and vision for Japan's modernisation based on research in primary sources. It outlines Itō's life: the son of a poor farmer, he showed exceptional talent as a boy and was sent to study in Europe and the United States. He returned home convinced that Western civilisation was the only viable path for Japan. Following the Meiji Restoration of 1868, Itō became a powerful intellectual and political force behind reforms of Japanese laws and institutions aimed to shape a modern government based on informed leadership and a knowledgeable populace. Among his many achievements were the establishment of Japan's first constitution—the Meiji Constitution of 1889, and the founding in 1900 of a new type of constitutional party, the Rikken Seiyukai (Friends of Constitutional Government), which, reformulated after 1945, became the Liberal Democratic Party that has dominated Japanese politics in the postwar period. Concerning Itō's role as Japanese Resident-General in Korea from 1905, the author argues that Itō's aim, not understood by either the Japanese home government or Koreans themselves, was not to colonize Korea. He was determined to modernise Korea and consolidate further constitutional reforms in Japan. This aim was not shared by others, and Itō resigned in 1909. He was assassinated the same year in Manchuria by a Korean nationalist. The Japanese language edition of this book is a bestseller in Japan, and it received the Suntory Prize for Social Sciences and Humanities, one of Japan's most prestigious publishing awards.

speech on welcome party: *Handbook of Communication in the Public Sphere* Ruth Wodak, Veronika Koller, 2008-08-27 As you are reading this, you are finding yourself in the ubiquitous public sphere that is the Web. Ubiquitous, and yet not universally accessible. This volume addresses this dilemma of the public sphere, which is by definition open to everyone but in practice often excludes particular groups of people in particular societies at particular points in time. The guiding questions for this collection of articles are therefore: Who has access to the public sphere? How is this access enabled or disabled? Under what conditions is it granted or withheld, and by whom? We regard the public sphere as the nodal point for the discourses of business, politics and media, and this basic assumption is also reflected in the structure of the volume. Each of these three macro-topics comprises chapters by international scholars from a variety of disciplines and research traditions who each combine up-to-date overviews of the relevant literature with their own cutting-edge research into aspects of different public spheres such as corporate promotional communication, political rhetoric or genre features of electronic mass media. The broad scope of the volume is perhaps best reflected in a comprehensive discussion of communication technologies ranging from conventional spoken and written formats such as company brochures, political speeches and TV shows to emerging ones like customer chat forums, political blogs and text messaging. Due to the books' wide scope, its interdisciplinary approach and its clear structure, we are sure that whether you work in communication and media studies, linguistics, political science, sociology or marketing, you will find this handbook an invaluable guide offering state-of-the-art literature reviews and exciting new research in your field and adjacent areas.

speech on welcome party: Complexifying Religion Andrei-Razvan Coltea, 2023-07-31 This book provides an original and challenging perspective of religions as abstract complex adaptive systems, using an interdisciplinary approach to try to understand what religions are and how they function, two fundamental issues which, despite an intense struggle from several fields, have not yet been resolved. What is the source of religious belief? How do religions work and what are they made of? Why is religion so important for us that it has survived centuries of scientific progress and secularization? Why are people religious even outside religion? The book addresses these questions using an interdisciplinary approach that seeks to untangle the Gordian knot of defining religion. In short, they can be considered entropy-reducing technologies. What differentiates them from other meaning-producing systems is their configuration which employs specific building blocks as tools for mitigating entropy, which are also subsystems and combine in various ways to build a unique configuration: rituals, myths, taboos, supernatural agents, authority, identity, superstitions, moral obligations, afterlife beliefs and the sacred. As a reaction to perturbances or pressure, systems can collapse. Inspired by Nicholas Nassim Taleb, it is, in this book, referred to as fragility—the negative reaction of systems to random events, and four parameters can be used to evaluate it in religious systems: monotonicity (the inability to learn from past mistakes), coupling (linking with other systems: such as political or economic), centralization and stress starvation. Several case studies are provided in order to test the theoretical claims made in this book, based on the author's field research in Romania, Japan, North Korea and Mongolia, and offering details that could be of interest to casual readers, students and researchers of religion.
