thomas guide 2023: Engaging with Thomas Aquinas Leonardo De Chirico, 2024-05-16 The influence of Thomas Aquinas on Western theology is beyond dispute, yet his is a contested legacy. In current evangelical studies, there is an emerging infatuation with Thomas, especially as far as his theological metaphysics is concerned. On the occasion of the eighth centenary of Thomas Aquinas, *Engaging with Thomas Aquinas* is a thoughtful introduction aimed at presenting the main contours of the doctor's complex legacy and critically evaluating it, especially in areas where the Roman Catholic Thomas eclipses the classical theology which is attracting renewed attention in evangelical circles. *Engaging with Thomas Aquinas* contributes a thoughtful analysis from an evangelical viewpoint, offering answers to complex questions such as: - Is the thought of Thomas and Thomism(s) the same? - What strengths and dangers does the legacy of Thomas Aquinas present to evangelical thought? - How can Rome's chief doctor be, at the same time, a reference point for evangelical theology? In this book, De Chirico offers an evangelical a framework to think through this contested thinker's legacy, as well as an invitation to the inquiring reader to consider an alternative.

thomas guide 2023: *The Montiers* Donald Scott, 2025-01-31 The important story of an interracial family that can be traced through multiple generations and into the 21st century. The African-American Montier family traces its roots to the British-born Caucasian son of Philadelphia's first mayor, Richard Morrey, who had a relationship with Cremona, a young woman who had been enslaved by the Morrey family, resulting in five mixed-race children. Before his death, Richard would pass to Cremona 200 acres of land, giving her an almost unique position in 18th-century Philadelphia. On this land a small Black town known as Guineatown would grow up, with an associated cemetery. Cremona's descendants and luminaries associated with the family include Cyrus Bustill, a black activist and baker who made bread for the Continental Army; David Bustill Bowser, a 19th-century activist who designed and created the colors for eleven African-American regiments at Camp William Penn; the great Paul Robeson, renowned scholar, lawyer, diplomat, athlete, singer, and actor; and William Pickens, Sr., a co-founder of the NAACP. The Montiers traces this unique family to the present day.

In *Railroads in the Midwest: An Epic History*, renowned historian H. Roger Grant draws on fifty years of research into America's celebrated railroad history to examine what effect railroads had in the heartland and what has happened to them since the early twentieth century.

thomas guide 2023: Romantic Relationships and Media Valerie Ellen Kretz, 2024-12-15 In this book, Valerie Kretz utilizes examples from pop culture and everyday life to provide an examination of current research on romantic relationships and media, with an emphasis on entertainment and digitally-mediated communication. By dividing the book into two major sections – relationship trajectories and different aspects of relationships – Kretz establishes a framework through which to explore relevant theoretical and empirical findings, drawing on established literature, examples in the media, and the lived experiences of interview participants. Kretz covers a wide range of topics through these frameworks, including online dating, representations of love in film and television, social media and romantic jealousy, parasocial romance, and digital breakups, among others. Ultimately, Kretz argues that all available evidence demonstrates the complexity of this intersection, due to the separate roles that several distinct factors like medium, content, social context, frequency of use, and individual differences all play a role in how these intersections are constructed in the real world. Finally, the book identifies potential directions for future research as scholars continue to unpack this complex relationship.

thomas guide 2023: An Interdisciplinary Pedagogical Model for Catholic Studies Ines A. Murzaku, Joseph P. Rice, 2025-04-21 This book offers a vision of an integrated Humanities curriculum, potentiated by the depth and diversity of perspectives that Catholic Studies contributes to both Catholic and secular universities. The result, inspired in various magisterial documents, is a more profound, relevant, and enduring college learning experience. It considers Catholic Studies as a response to the rich legacy of Vatican II, and its opening to contemporary culture, as it is expressed in Catholic education. It answers the dual call of the Declaration on Christian Education Gravissimum Educationis (GE) for cooperation and collaboration among Catholic institutions of

higher learning, and among faculty of the different scholarly disciplines. This book displays the interdisciplinary breadth and disciplinary depth of Catholic Studies, while providing a window into the practical insights gained by experts in research, program design, and teaching in a flourishing Catholic Studies program that has inspired the founding of the Seton Hall University core curriculum. Complemented by the contributions of Catholic Studies experts from outside Seton Hall, this book serves as a pedagogical model for researchers and educators to consider and emulate, nationally and internationally, an interdisciplinary Catholic Studies model as a way to recuperate theology; stop the siege of the humanities; and teach humanities in contact and communication with other disciplines, including STEM and other vocation-oriented fields. In this overall context, this book serves as a guide and a reference for new and established programs of Catholic Studies, nationally and internationally. It seeks to extend a conversation, in the style of a symposium, to campuses and cultural contexts in the United States and internationally.

thomas guide 2023: Corruption Proofing in Africa Dan Kuwali, 2024-03-11 This book outlines evidence-based and data-driven strategies for combating grand corruption in Africa. Although the causes of corruption vary from country to country, this book suggests that corruption in Africa is often a direct consequence of poorly conceived legislation, policies, and institutional loopholes. The authors in this solution-oriented book converge in arguing that effective strategies to combat corruption (corruption proofing) should integrate an independent enforcement system, vigilant civil society, vibrant media, and political leadership. Utilising empirical evidence and a systems thinking approach, the contributors also uncover root causes of corruption and identify high-leverage interventions to prevent abuse of entrusted power for personal gain. The book recommends an integrated proactive strategy that includes top-down, bottom-up, and multi-stakeholder approaches in the implementation of anti-corruption legislation and policies. Bringing together multidisciplinary and transdisciplinary research, the chapters in this volume include case studies from selected countries on the continent, including Cameroon, Kenya, Malawi, Namibia, Uganda, and Zimbabwe. Providing readers with a range of effective and functional initiatives in combating corruption in Africa, this book will be of interest to students and researchers of corruption, governance, ethics, peace and security, development, and African studies, as well as policymakers, practitioners, development partners, among other stakeholders.

thomas guide 2023: Lex Ad Astra Matthew Gillett, Katja Grunfeld, Iva Ramuš Cvetkovič, 2025-03-13 Outer space has long been considered the last untouched wilderness. However, non-State actors are increasingly active in space, heightening the risk of space pollution. Space law, designed during the Cold War, is State-centric and makes inadequate provision for non-State actors. In the face of this emerging threat, this book examines potential avenues of redress in space law, including the Outer Space Treaty, along with international environmental law, international criminal law, international humanitarian law, and international human rights law. It also reviews the national legislation adopted by space-faring States at the domestic level. In parallel, the book examines the deeper theoretical implications addressing non-State actor conduct under international law. Ultimately, it proposes a ground-breaking new international law instrument to hold non-State actors responsible for space pollution.

thomas guide 2023: On Sex and Gender Doriane Lambelet Coleman, 2024-05-21 On Sex and Gender focuses on three sequential and consequential questions: What is sex-as opposed to gender? How does sex matter in our everyday lives? And how should it be reflected in law and policy? All three are front-and center in American politics: They are included in both of the major parties' political platforms. They are the subject of ongoing litigation in the federal courts and of highly contentious legislation on Capitol Hill. And they are a pivotal issue in the culture war between left

and right playing out on battlegrounds from campuses and school boards to op-ed pages and corporate handbooks. Doriane Coleman challenges both sides to chart a new way forward. She argues that denying biological sex would have profound and detrimental effects on women's equal opportunity and on the health and welfare of society generally. Structural sexism needed to be dismantled—a true achievement of feminism and an ongoing fight—but sex blindness is not the next step forward. This book is a clear guide for reasonable Americans on the issue of gender and sex—something everyone is terrified to discuss. Coleman shows equally that the science is settled but there is a middle ground on protecting both women's rights and trans rights. She livens her narrative with a sequence of portraits of exceptional human beings who have fought to advance the cause of equality from legal pioneers like Myra Bradwell and Ketanji Brown Jackson to champion athletes like Caster Semenya and Cate Campbell to civil rights giants like Ruth Bader Ginsburg and Pauli Murray. Above all, Coleman reminds us that sex—the male and the female body—is good for three reasons. Sex is good for procreation, it's good for sexual pleasure, and it's good for something in our natural lives to be beautiful—

thomas guide 2023: The Path to Paralysis Donald G. Nieman, 2024-10-15 How did the world's oldest democracy lose its mojo? How did we get to a point where we face existential crises like climate change yet leaders can't agree that there's a problem let alone develop solutions? Political leaders bear some of the responsibility. Newt Gingrich, Sarah Palin and Donald Trump, to name a few, have shattered political norms and transformed our politics into a free-for-all in which personal attacks, appeals to bigotry and fear, disregard for truth, and disdain for governing have become the norm. But they are more a symptom than the cause. *The Path to Paralysis* examines changes in political culture during the past 60 years – conflict over race, religion and gender; wrenching economic changes and growing concentration of wealth; the end of the Cold War; hardening regional divisions; and dramatic changes in communications – that made Donald Trump possible, if not inevitable. Long in the making, these cross-currents came together in the early 21st century – as the United States experienced the deepest recession since the 1930s and elected its first Black president – to create the perfect storm. The result was toxic and deeply polarised politics that threatened the existence of constitutional government.

thomas guide 2023: Industrial memory in North East England Victoria Claire Allen, 2025-09-30 *Industrial memory in North-East England* examines how the region's industrial myth and memory have been articulated in the renegotiation of northernness. The book offers a critical contextualisation of the concept of northernness and the English North, and introduces the concept of the PopCultural Portfolio, a mixed-methods approach to conjunctural analysis in cultural and memory studies. The book provides six richly illustrated case studies to demonstrate the practical application of cultural studies' expansive and inclusive understanding of texts, bringing together materials from North East football, folk, indie and exhibition culture to establish how the North East's industrial past continues to be remembered and functionalised as industrial memory. In turn, the conjunctural analysis demonstrates how industrial memory is articulated and mythologised as north(east)erness in contemporary popular culture.
