ashton irwin 2023: *The Triumph of Economic Freedom* Donald J. Boudreaux, Phil Gramm, 2025-05-13 This readable and important book makes a strong case that the received version of economic history taught in high schools and colleges across the country is off the mark and that its errors distort current policy debates. It deserves attention from economic policymakers of all persuasions. -LAWRENCE SUMMERS, former Secretary of the Treasury; President Emeritus, Harvard University Since the dawn of the Industrial Revolution, capitalism has unleashed unimaginable growth in opportunity and prosperity. And yet, at key points in American history, economic disruption has led to a greater role for government, ostensibly to protect against capitalism's excesses. Today, government regulates, mandates, subsidizes and controls a growing share of the American economy. In this book, Phil Gramm, one of America's premier public policy advocates, and noted economist Donald J. Boudreaux look at the seven events and issues in American history that define, for most Americans, the role of government and how the 21st century

world works. To many Americans, these 5 periods of American history—the Industrial Revolution, Progressive Era, Great Depression, decline of America’s postwar preeminence in world trade, and the Great Recession--along with the existing levels of income inequality and poverty, represent strong evidence for expanding government in American life. Gramm and Boudreaux argue that the evidence points to a contrary verdict: government interference and failed policies pose the most significant threat to economic freedom. Setting up each topic with a “just the facts” approach that defies partisanship, Gramm and Boudreaux provide a compelling and highly readable powerful reassessment that will challenge open-minded readers to rethink the conventional wisdom and the policies that spring from them.

Our modern fears about the otherness of androids and human replicants have much in common with fears of the Doppelganger, a mythological harbinger of death. Throughout the twentieth century, AI technologies have developed at a rapid pace, bringing us face to face with these ancient fears in a modern context. Examining such films as *The Day the Earth Stood Still*, *Forbidden Planet* and *Blade Runner*, among others, this book charts cinema's fascination with artificial intelligence and the technological double, as well as the historical antecedents of the artificial human.

ashton irwin 2023: Responding to the Culpable State Leo Zaibert, Julian V Roberts, Jesper Ryberg, 2025-02-06 This volume explores ethical aspects relating to claims for mitigation arising from culpable state action (or inaction). It answers the important and controversial question: to what extent should the state mitigate sentencing for defendants who have been victims of state misconduct? The volume explores the normative justifications for mitigation and answers many intriguing questions. For example, in terms of the procedural challenges, should the offender have to prove a causal link between state wrongdoing or neglect and the offending? Can a court take judicial notice of state-induced social adversity and apply this consideration to all affected offenders? Other questions relate to the implications for courts and sentencing commissions which issue guidance to courts regarding mitigation at sentencing. To what extent is the offender less culpable as a result of state misconduct, and what are the limits of any resulting sentence reductions? Do sentence reductions for state misconduct undermine proportionality, or deprecate the seriousness of the impact on the victim of crime? Should this factor be included in any sentencing guidelines or possibly even as a statutory mitigating factor? Each contribution explores a distinct, cross-jurisdictional claim for mitigation on the basis of State negligence or misconduct towards the offender. The chapters all address the appropriate response of courts at sentencing.

The impact of the non-interference policy is assessed and a full consideration is given to the failure of that policy.
