campfire song ukulele: Wired for Music Adriana Barton, 2022-10-11 “Beautifully written... a riveting account of how melodies and rhythms connect us, and help us deal with alienation and anxiety.”—Dr. Bessel van der Kolk, author of *The Body Keeps the Score* In this captivating blend of science and memoir, a health journalist and former cellist explores music as a source of health, resilience, connection, and joy. Music isn’t just background noise or a series of torturous exercises we remember from piano lessons. In the right doses, it can double as a mild antidepressant, painkiller, sleeping pill, memory aid—and enhance athletic performance while supporting healthy aging. Though music has been used as a healing strategy since ancient times, neuroscientists have only recently discovered how melody and rhythm stimulate core memory, motor, and emotion centers in the brain. But here’s the catch: We can tune into music every day and still miss out on some of its potent effects. Adriana Barton learned the hard way. Starting at age five, she studied the cello for nearly two decades, a pursuit that left her with physical injuries and emotional scars. In *Wired for Music*, she sets out to discover what music is really for, combing through medical studies, discoveries by pioneering neuroscientists, and research from biology and anthropology. Traveling from state-of-the-art science labs to a remote village in Zimbabwe, her investigation gets to the heart of music’s profound effects on the human body and brain. Blending science and story, *Wired for Music* shows how our species’ age-old connection to melody and rhythm is wired inside us.

campfire song ukulele: **The Oxford Handbook of Community Singing** Esther M.

Morgan-Ellis, Kay Norton, 2024 The Oxford Handbook of Community Singing shows in abundant detail that singing with others is thriving. Using an array of interdisciplinary methods, chapter authors prioritize participation rather than performance and provide finely grained accounts of group singing in community, music therapy, religious, and music education settings. Themes associated with protest, incarceration, nation, hymnody, group bonding, identity, and inclusivity infuse the 47 chapters. Written almost wholly during the 2020-21 COVID-19 pandemic, the Handbook features a section dedicated to collective singing facilitated by audiovisual or communications media (mediated singing), some of it quarantine-mandated. The last of eight substantial sections is a repository of new theories about how group singing practices work. Throughout, the authors problematize the limitations inherited from the western European choral

music tradition and report on workable new remedies to counter those constraints--
